Q7: Who provided funding?

Multilateral organization

Q8: Project/Programme type

Multi-country

Q9: Your textcase story

In developing countries, financial services will be provided to over 2 billion people who currently have no access to bank accounts.

ITU standardization is working to build a human-centered ICT environment where physical space and cyberspace are managed in unison. As technology advances, more of our lives are mirrored in cyberspace.

Daily tasks and duties will be automated. Digital devices assist with the detection of medical conditions. ITU standardization will work to ensure that our digital identities are as trusted as our identities in the real world.

We see a future built on international standards created in a spirit of collaboration. Standards that are created by ITU.
