

# **CLINICAL EVALUATION OF BIOMARKERS**

**Christopher P Price**

**Clinical Biochemistry,  
University of Oxford,  
Oxford, UK**

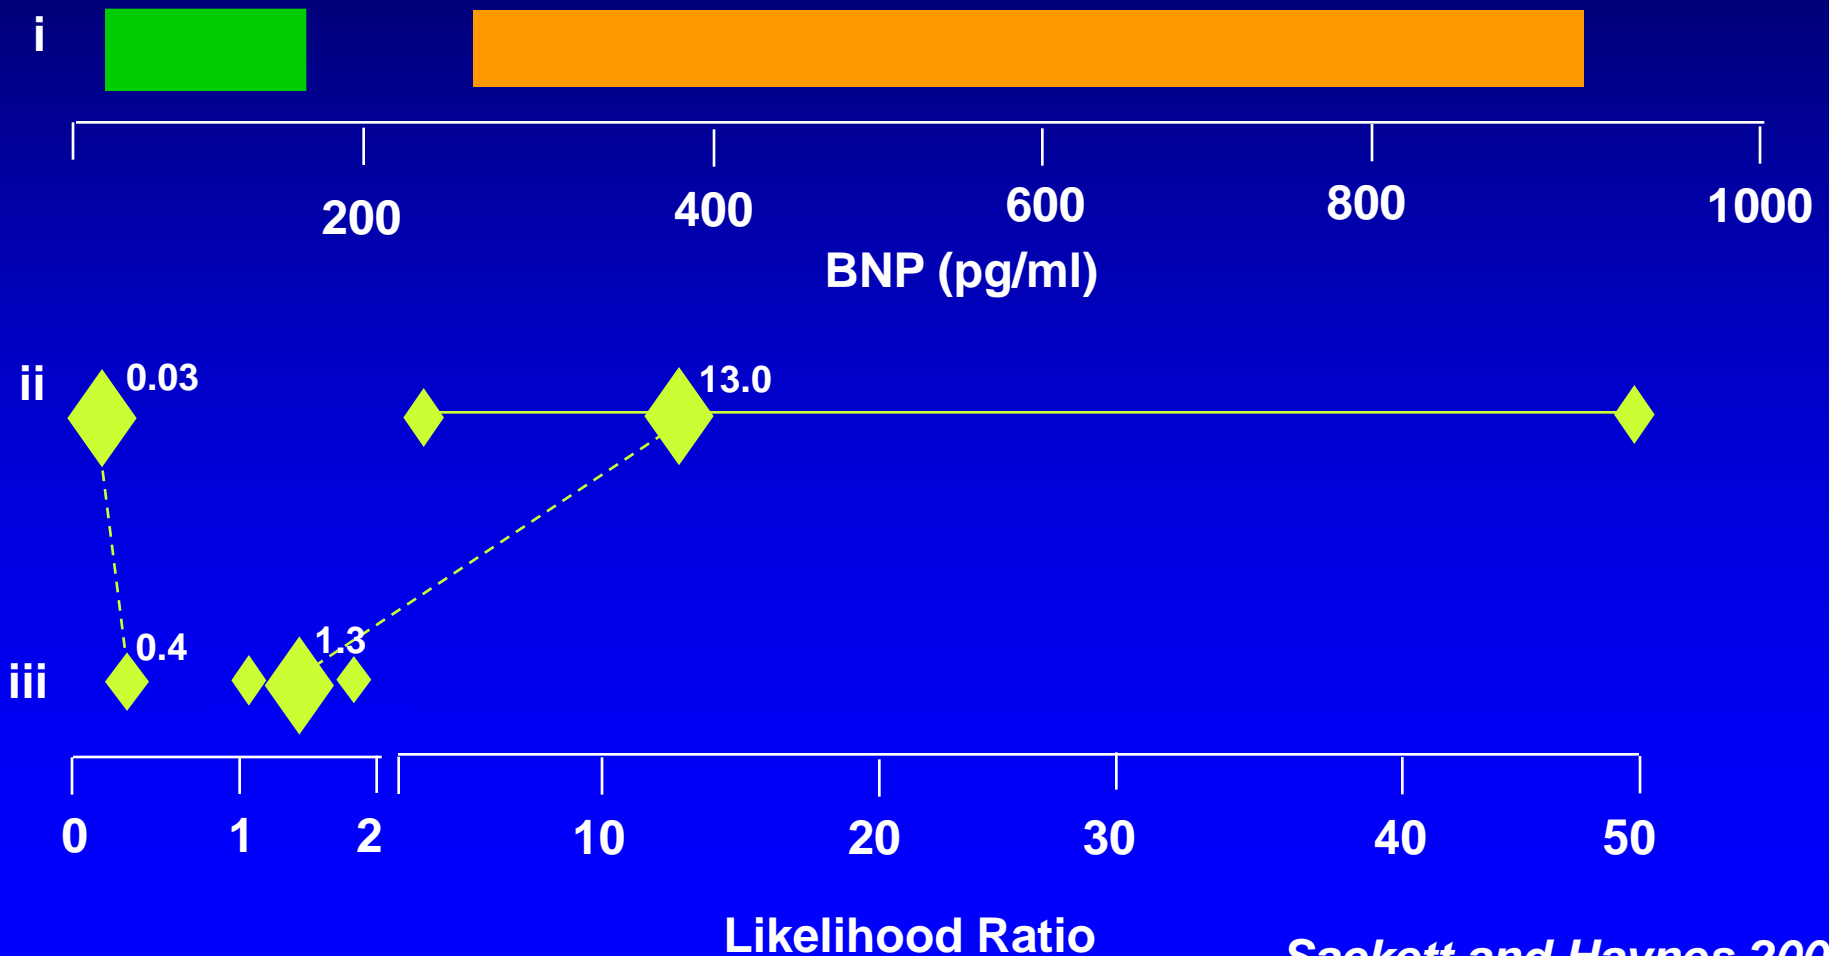

# Clinical Evaluation of a Biomarker

- Pathology and identification of marker
- Measurement of marker
  - :analytical variation
  - :biological variation
- Results; affected differ from normals: relation to disease severity
- Patients with certain results more likely to have the condition
- Results differentiate those with disease from those without disease
- **Patients having the test have better outcomes**

# Laboratory Medicine

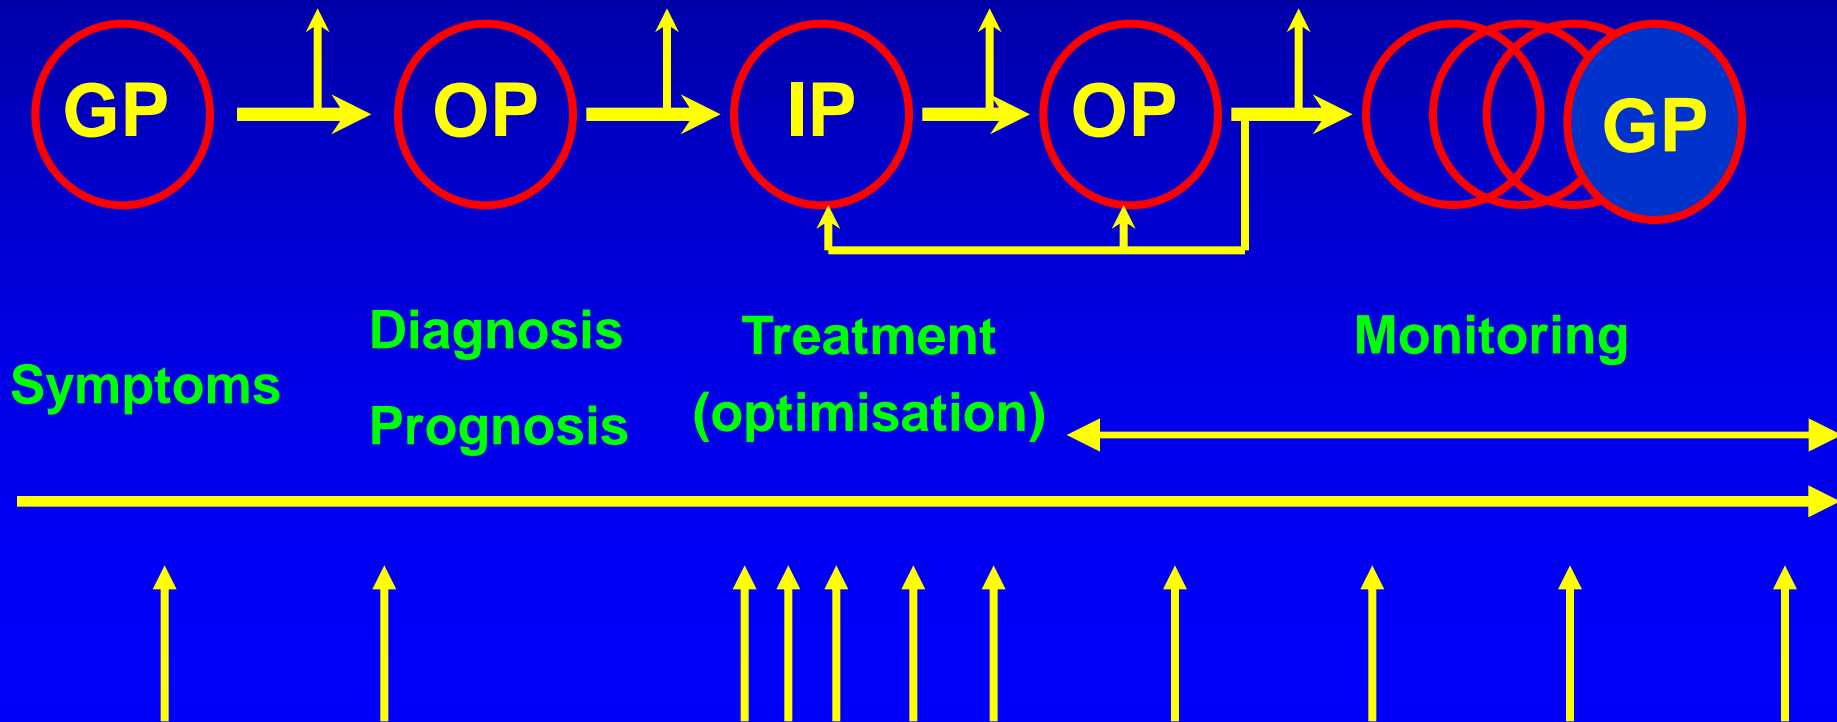

## architecture of diagnostic research

### *BNP in heart failure*

# Biomarkers and the Patient Journey

## applications and outcomes

# Health Outcomes

care of individual patients

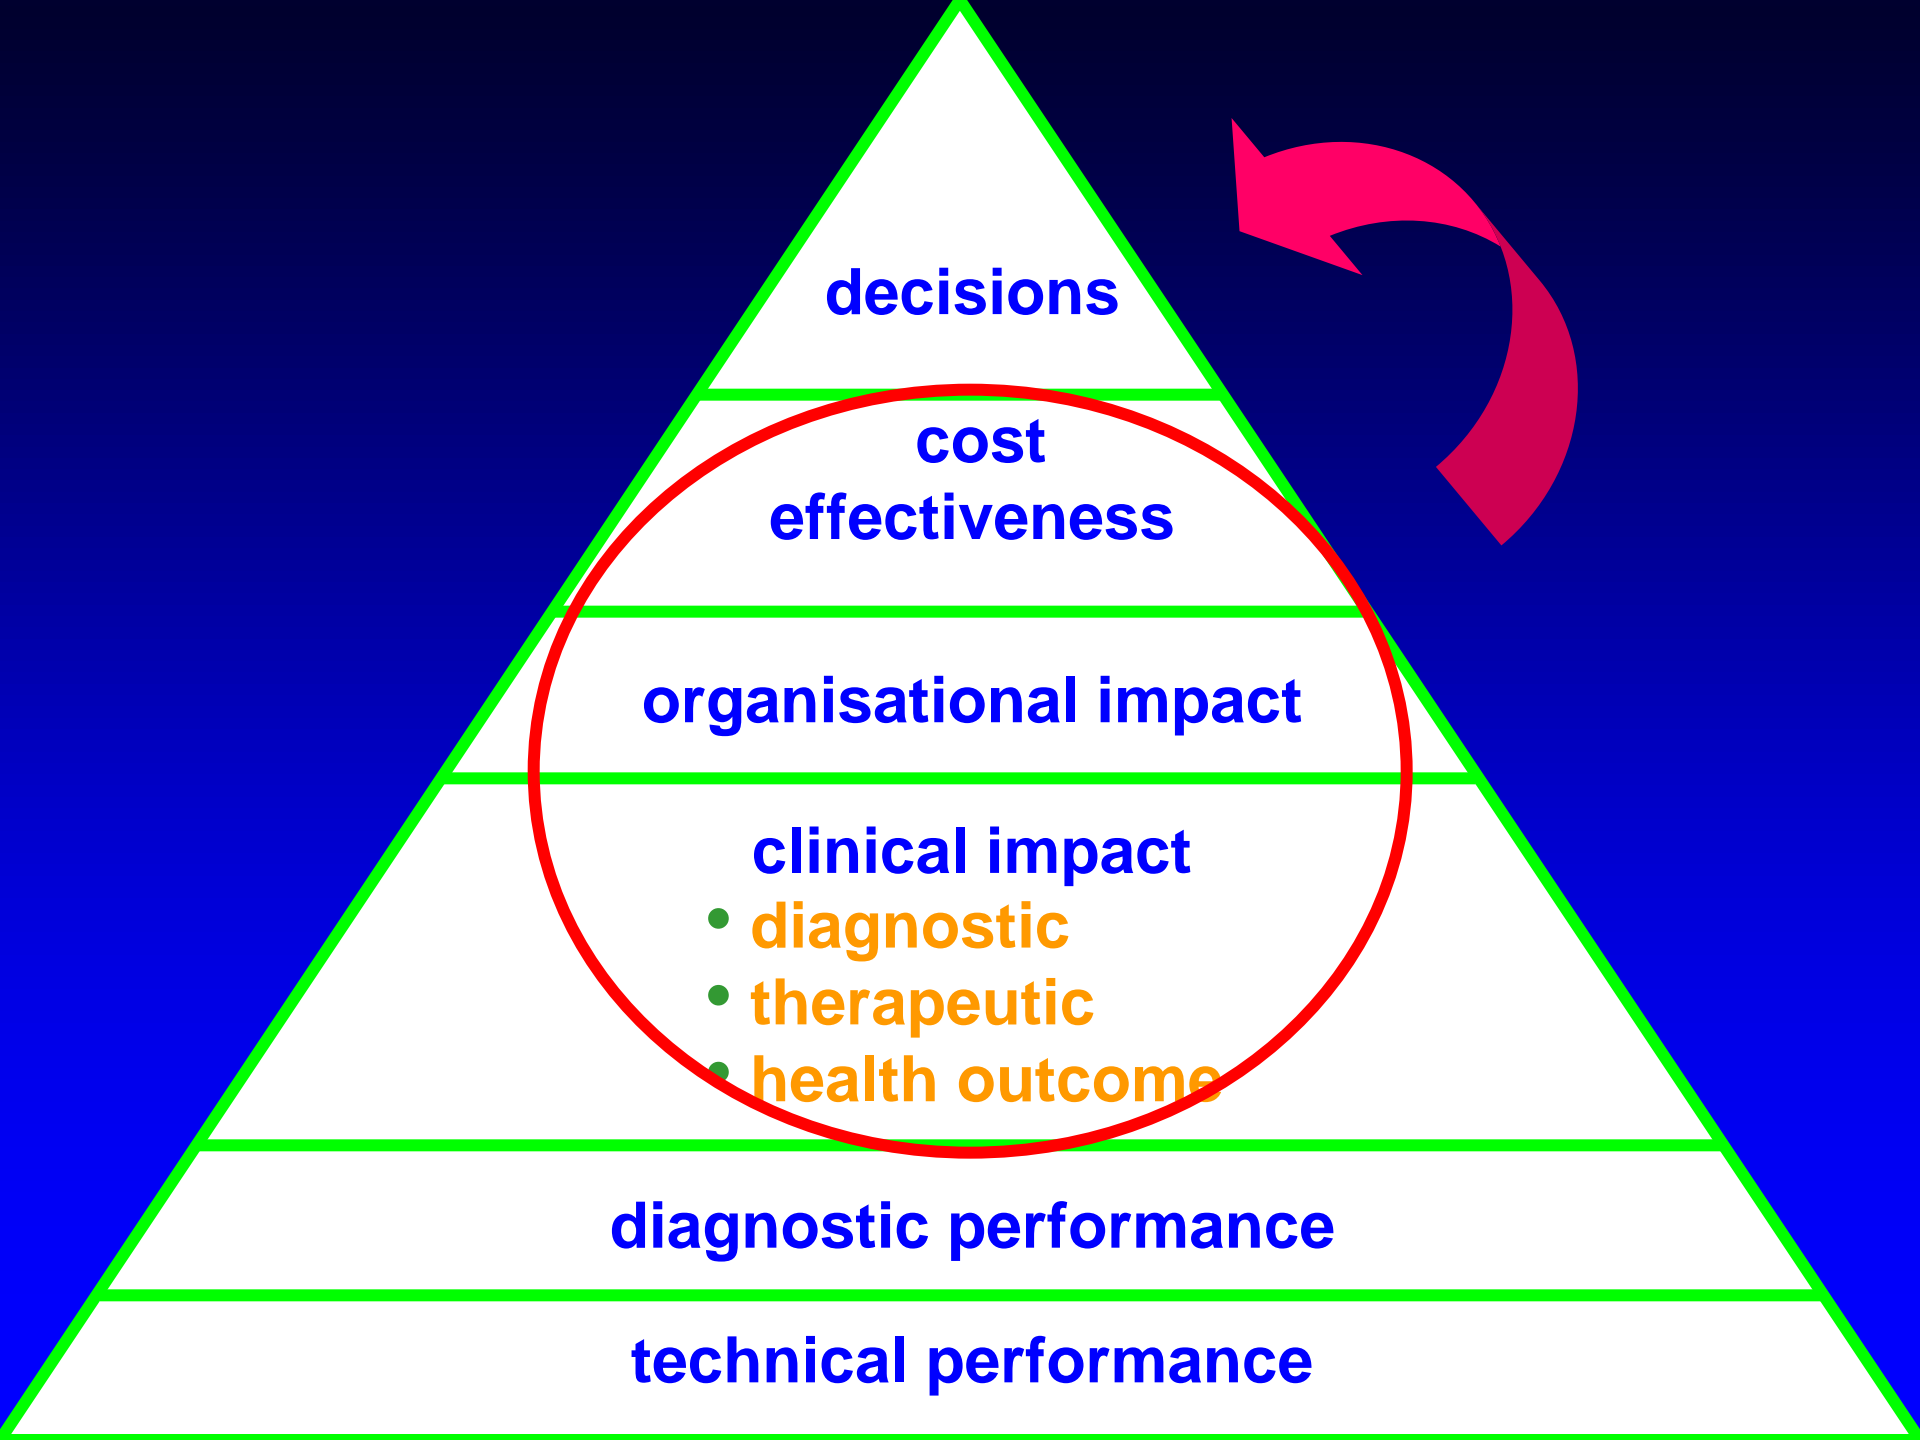

maximisation of benefit

minimisation of risk

reasonable cost

*Clinical*  
*Operational*  
*Economic*

# Biomarker Utilisation

what are the consequences?

PATIENT

question

test

decision

action

OUTCOME

# **Biomarker Utilisation**

what are the key issues?

- **evidence of effectiveness**
- **reimbursement**
- **resource reallocation**
- **change in practice**
- **adoption**
