

# Making Innovation Happen: Motors and Brakes

Stéphan Vincent-Lancrin

Senior Analyst & Project Leader  
OECD Centre for Educational Research  
and Innovation

# OECD Innovation Strategy: Launch at Ministerial Council Meeting 2010

- Principles to promote innovation, including in education and public sector activities
  - *The OECD Innovation Strategy. Getting a head start on tomorrow*
  - *Measuring Innovation. A new perspective*
- CERI's project:
  - Skills and Education for Innovation
  - Innovation in Education

# Skills and education for innovation

« 21st Century Skills »

# Innovation strategy for education and training

- Stimulating science-driven innovation
- Stimulating business-driven innovation
- Stimulating practitioner-driven innovation
- Stimulating user-driven innovation

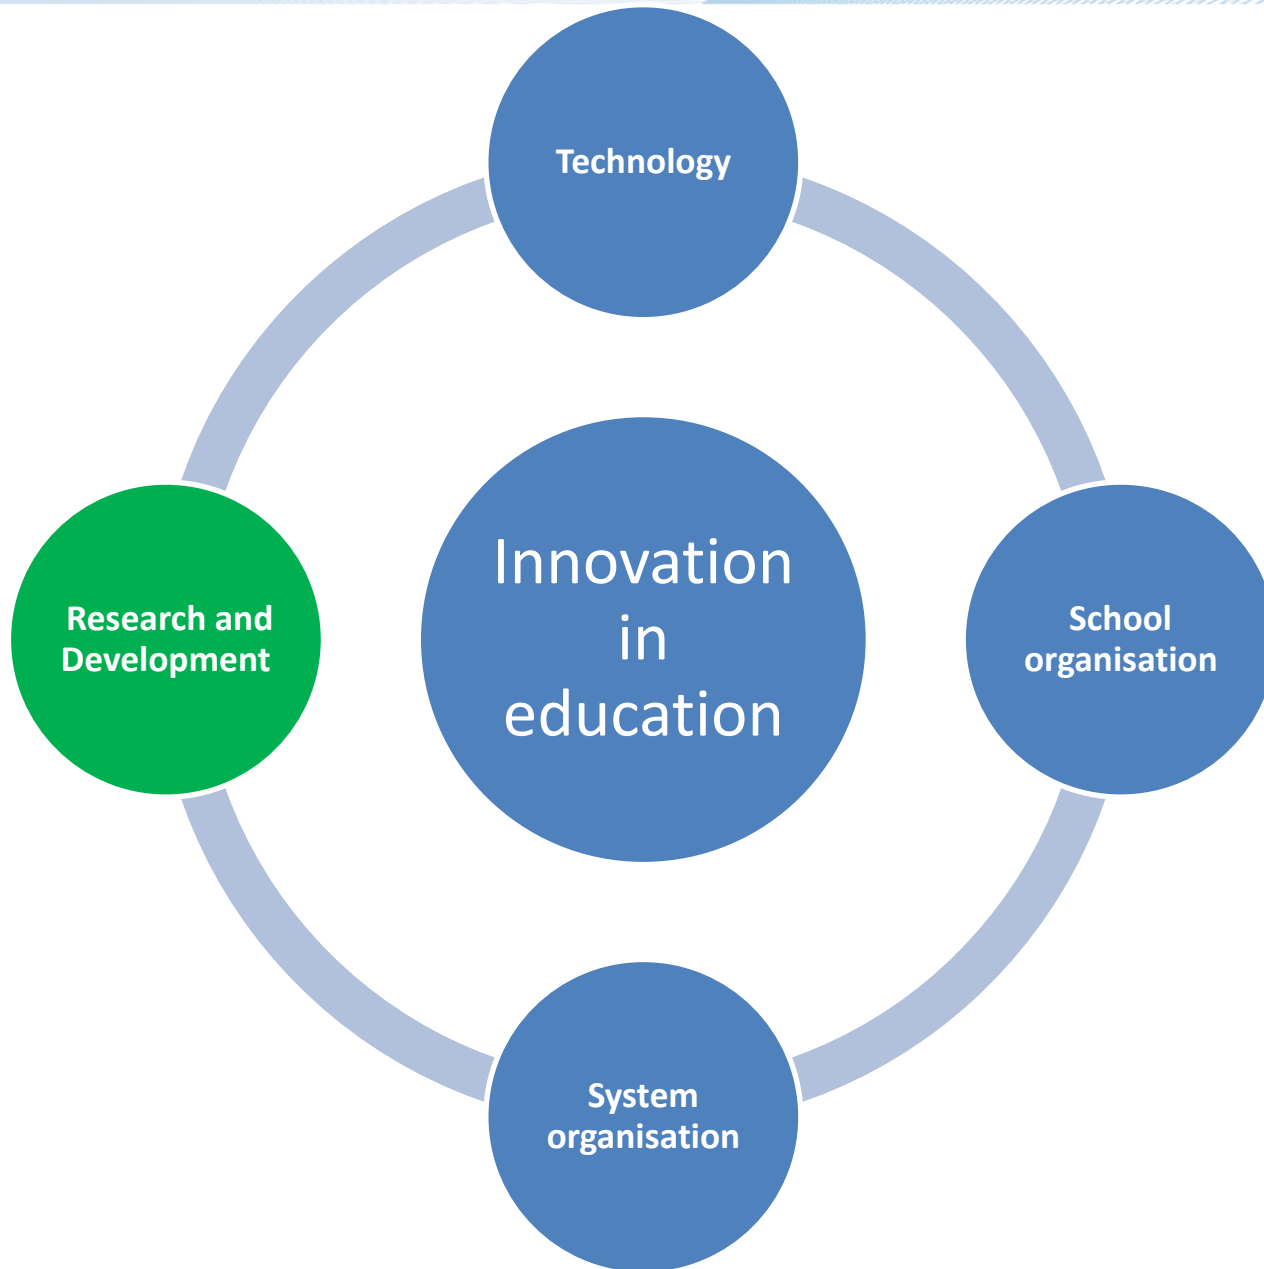

# Different types of innovation in education

- Science-driven and business-driven innovation
  - Tool builders (educational products and services for systems, schools and people)
  - New knowledge generation
  - Application or scaling up of evidence-based practices
- Practitioner-driven and user-driven innovation
  - School builders (new school models)
  - Project developers (new ideas and practices)
  - Inexpensive tool builders (OER, etc.)

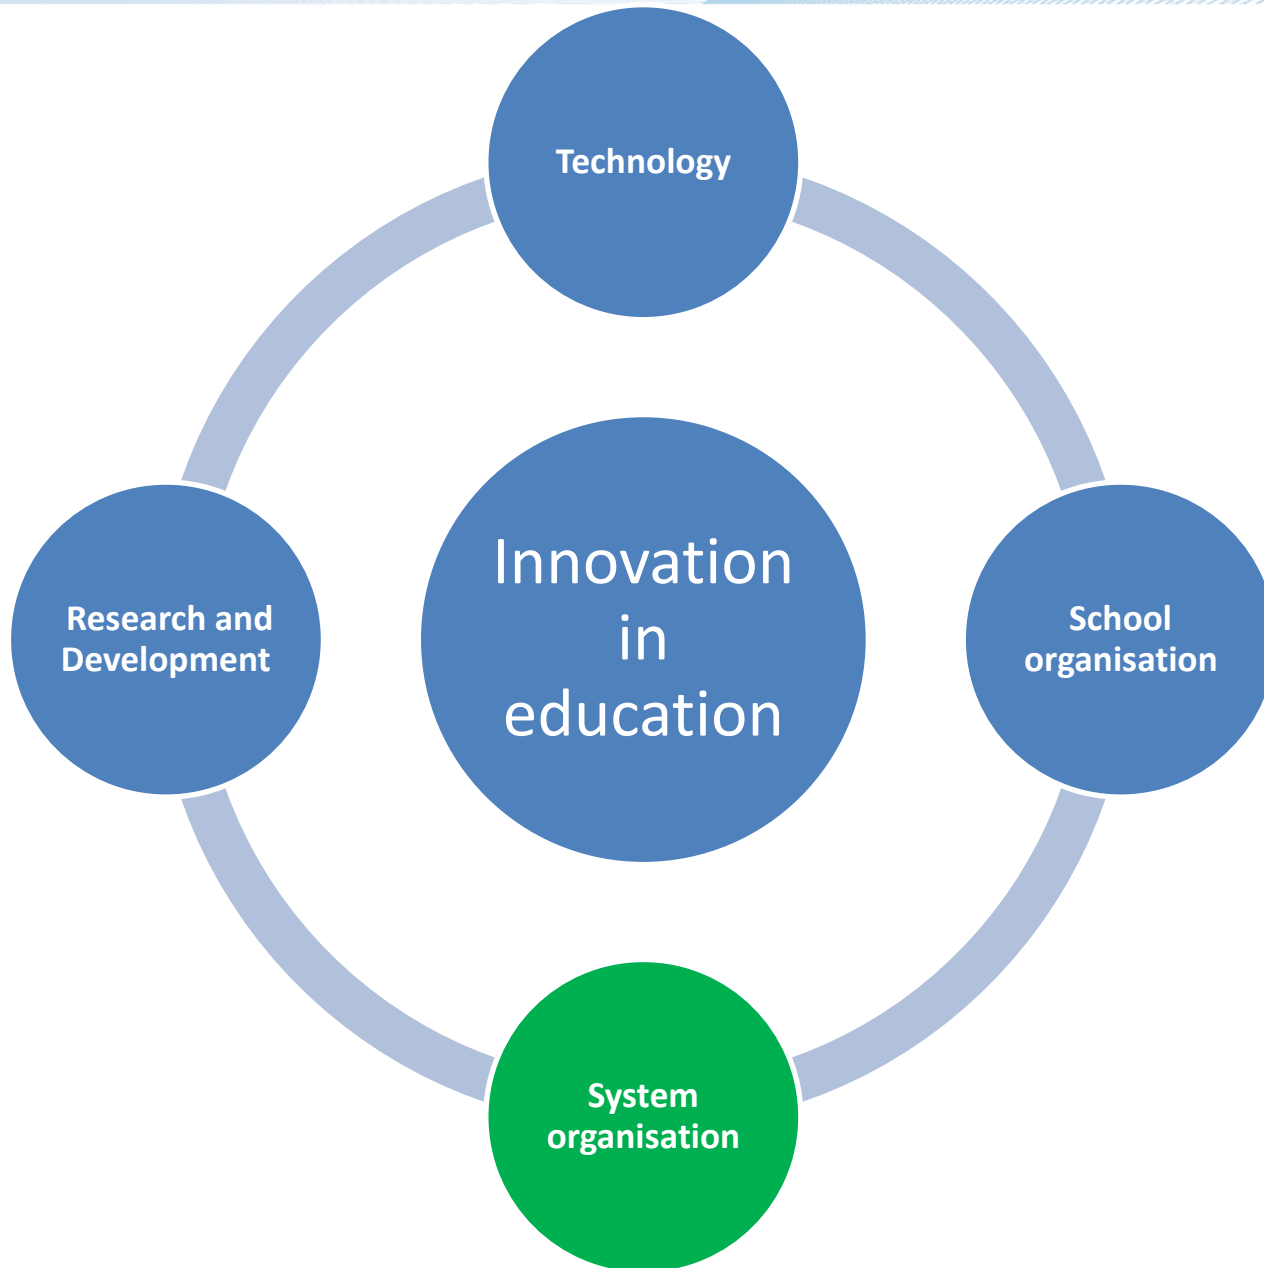

# Innovation in education

# Motors of innovation in education

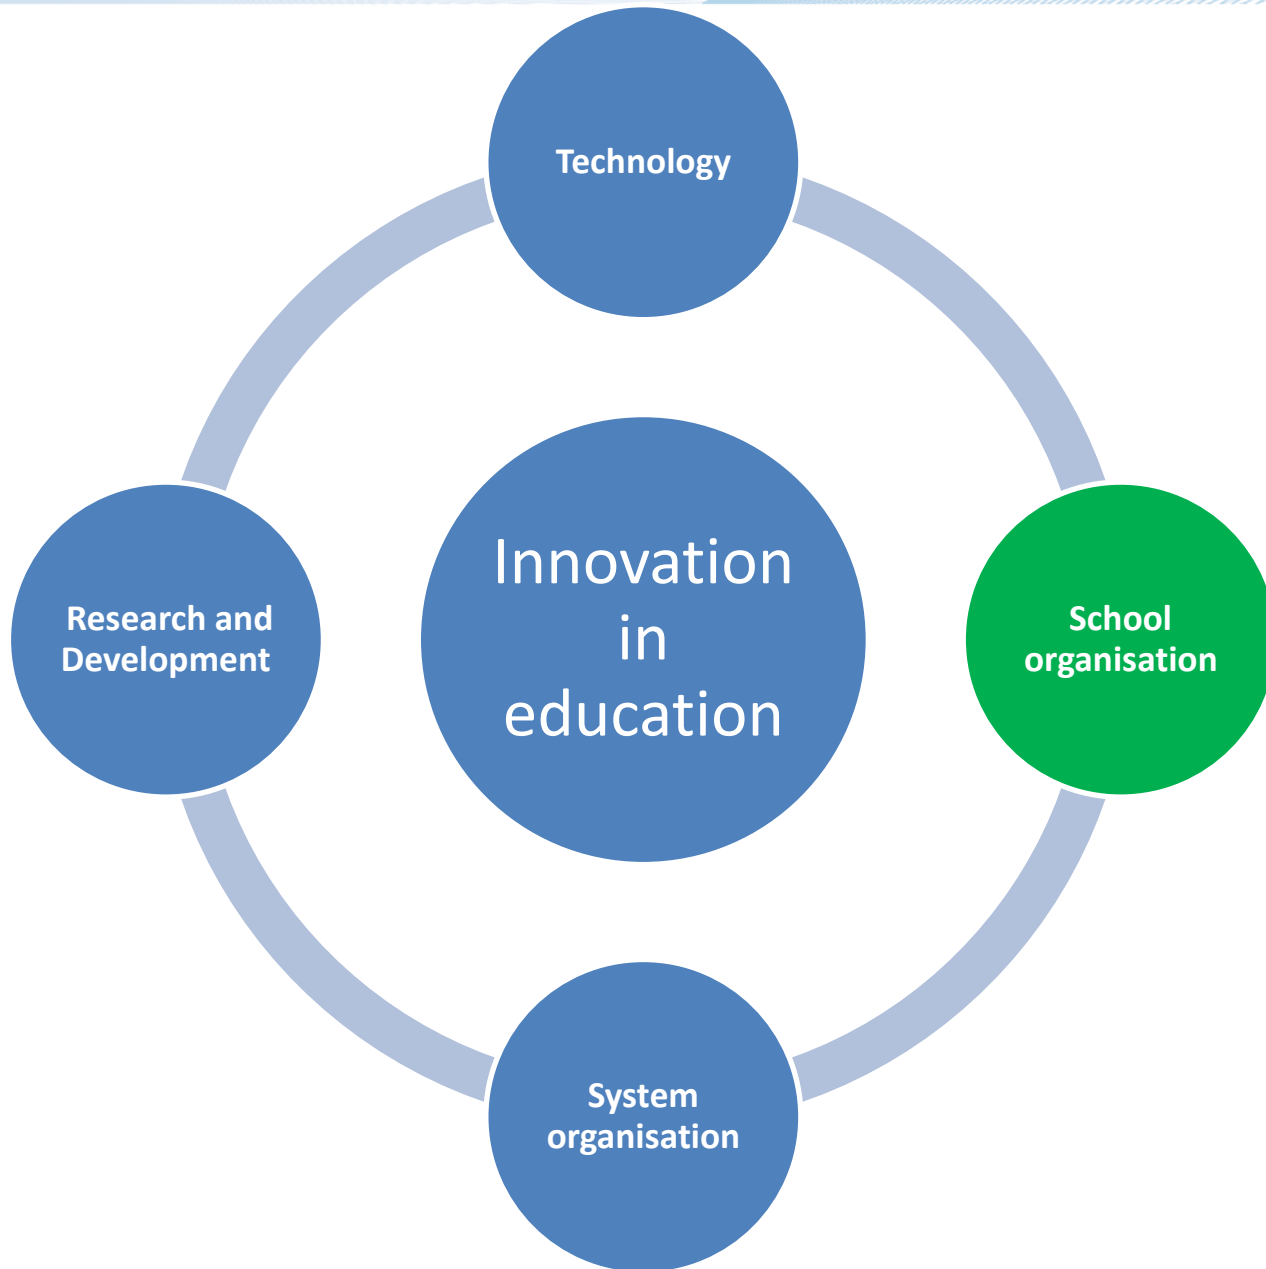

# Motors of innovation in education

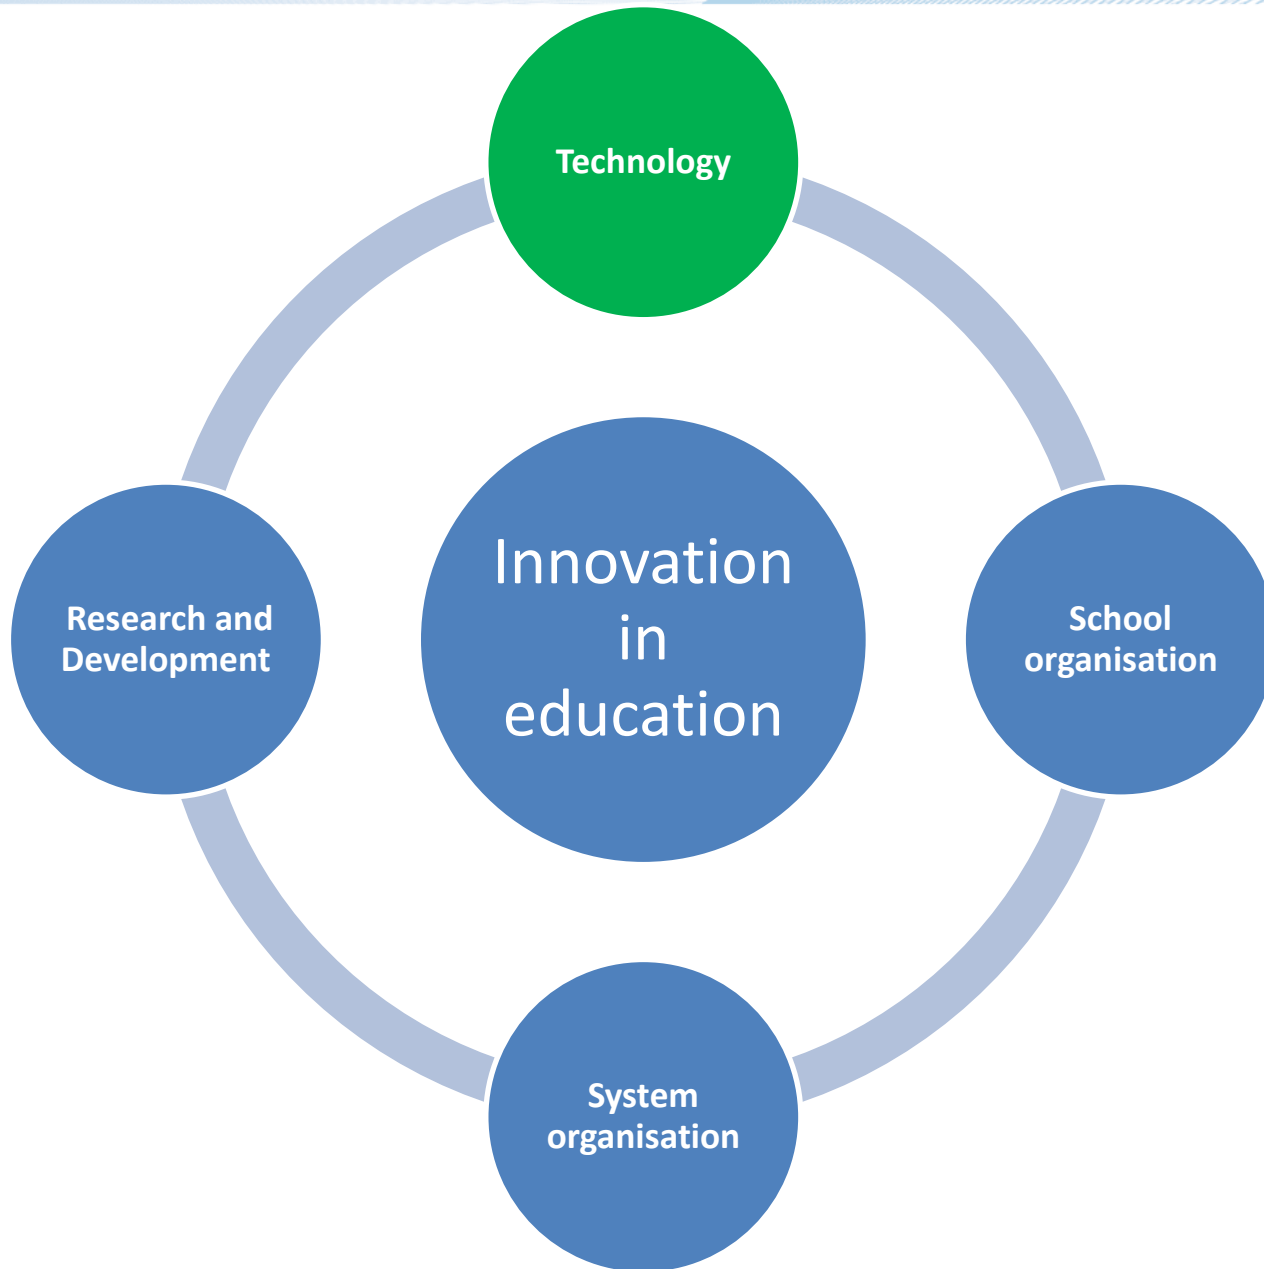

# Motors of innovation in education

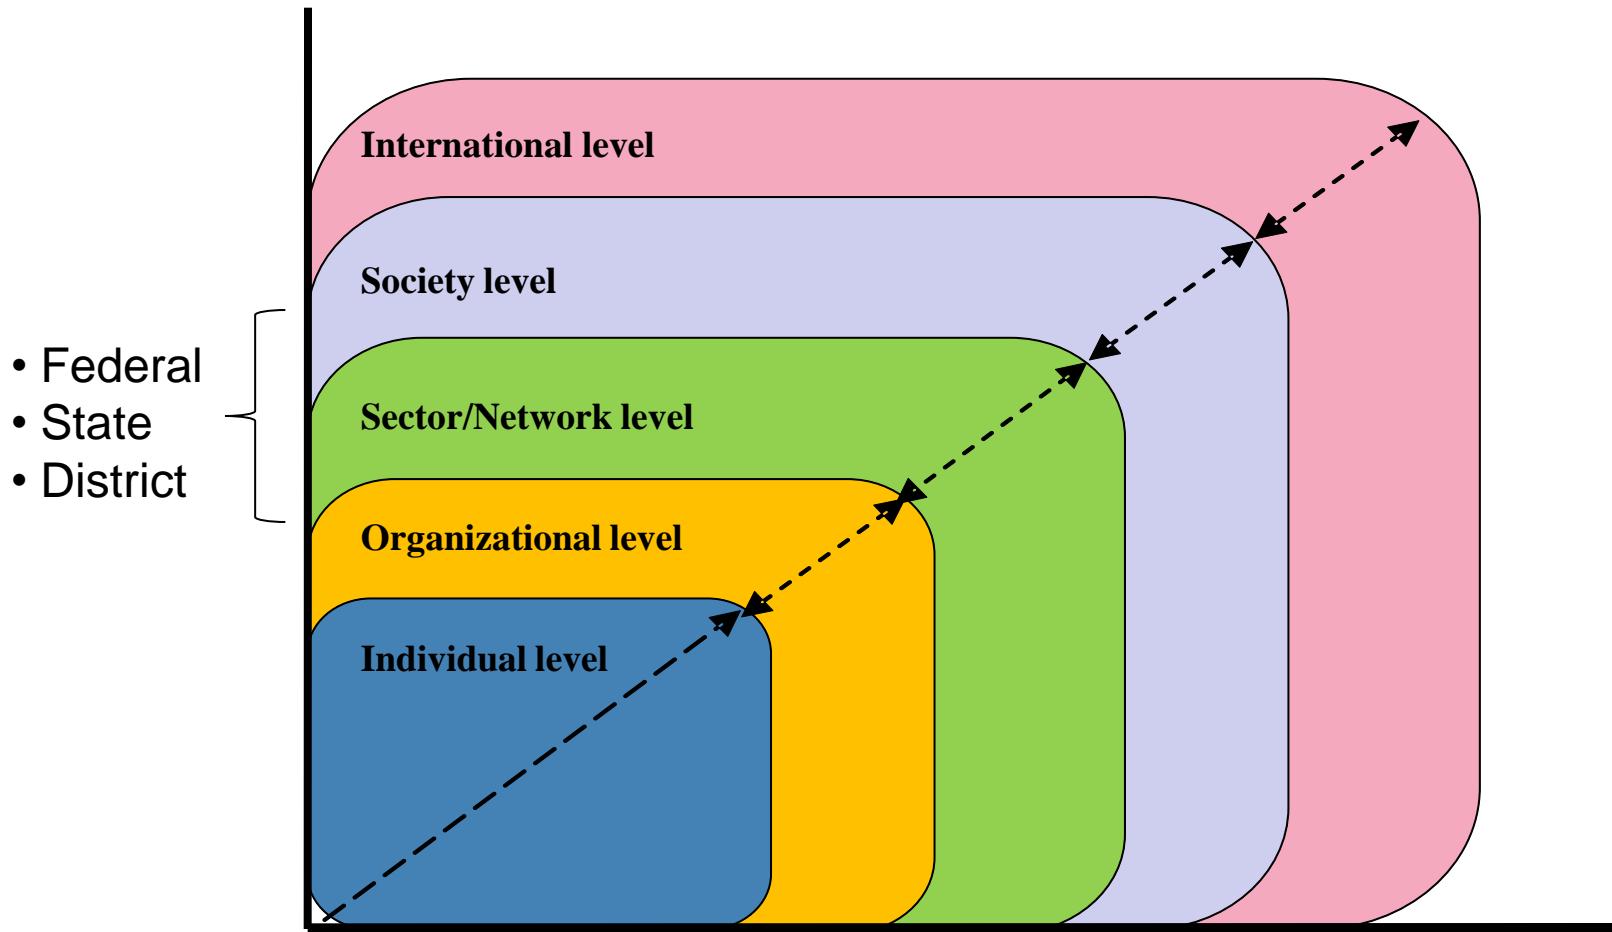

# Motors of innovation in education

# Motors of innovation in education

# A multi-level innovation ecosystem with different stakeholders, levers (and obstacles)

# Brakes to innovation

- **Brake #1: supply of innovation**
  - Insufficient public and private investment in research and development
  - Insufficient incentives for entrepreneurial tool development in education (but this might be changing)
  - Insufficient room for experimentation and action research by practitioners

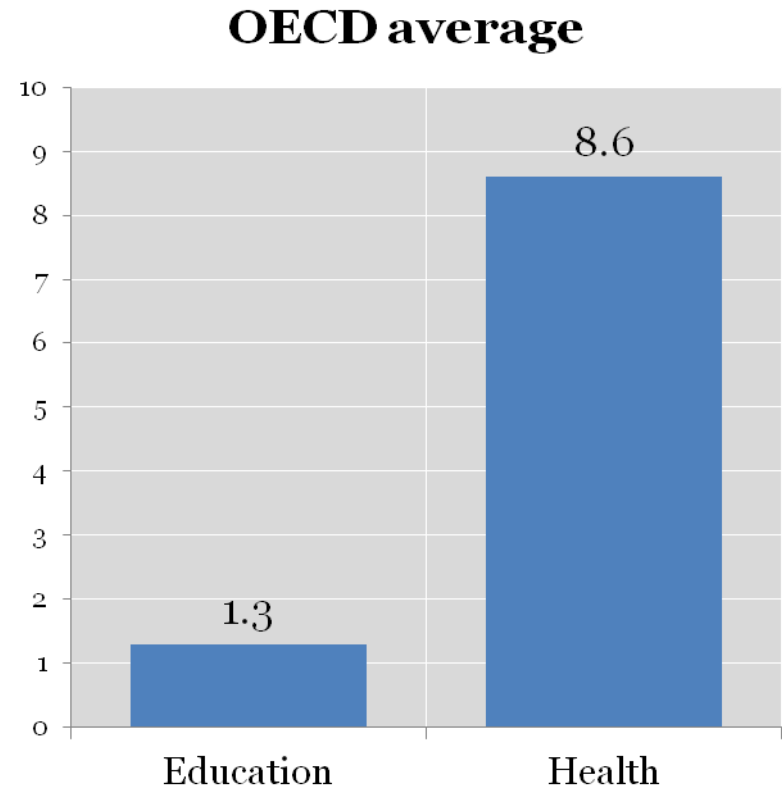

# Educational Research and Development

## Science-driven innovation

Public expenditures in education and health as % of GDP (2008)

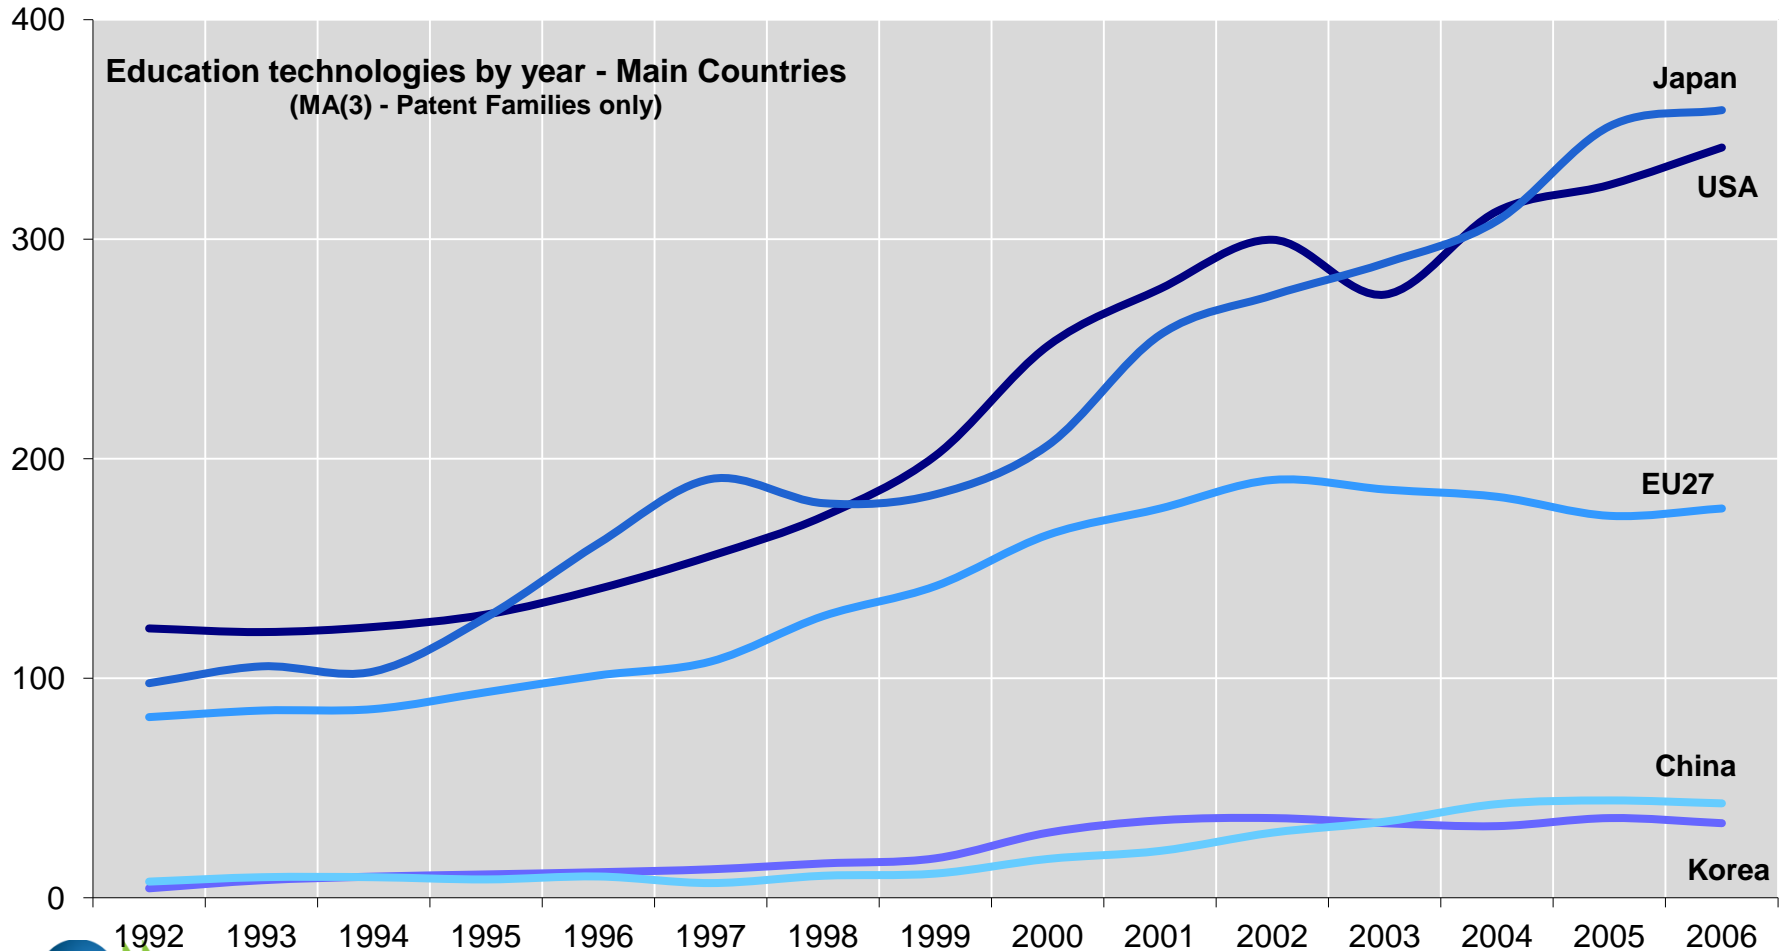

Share (%) of public research expenditures on education and health (2008)

# Educational Research and Development

## Business-driven innovation

Growth of patent applications: Worldwide new education technologies (1990-2006)

# Brakes to innovation

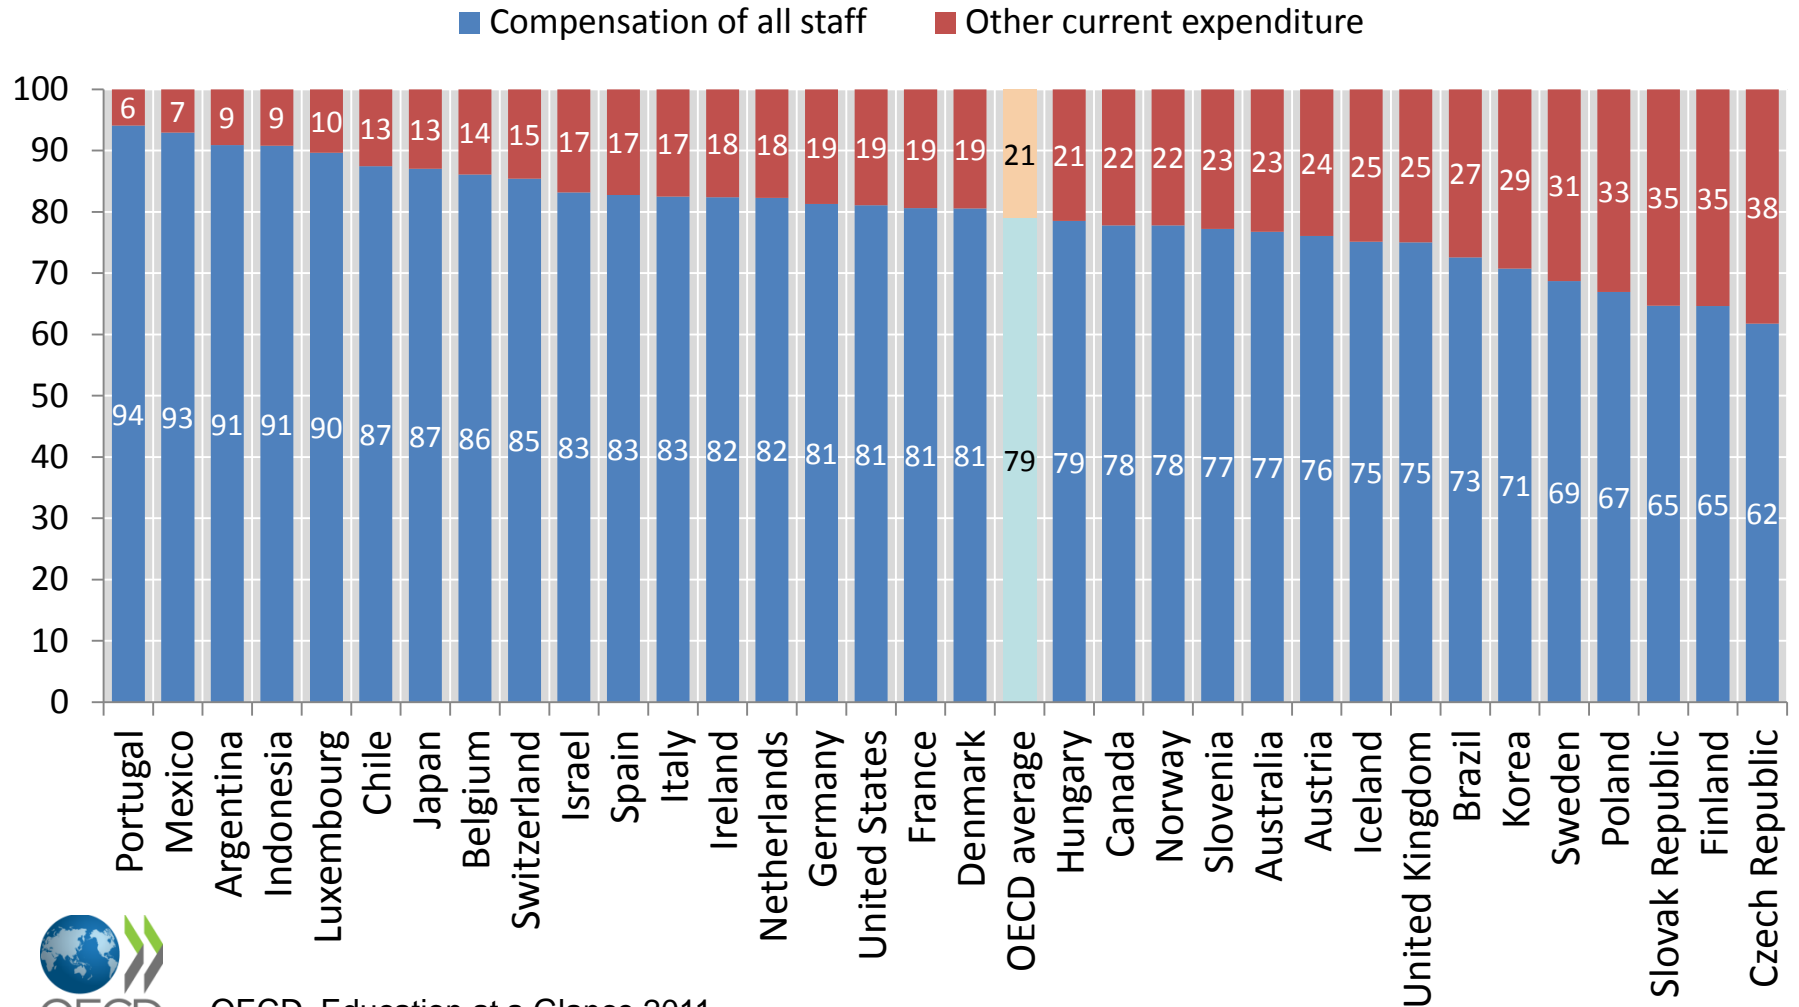

- **Brake #2: demand for innovation**

- Accountability policy leads to risk-aversion
- Innovation funds / Venture capital are insufficient (?)
- Schools/teachers lack (budget and) culture for innovation (action research)
- Parental demand for educational innovation is marginal

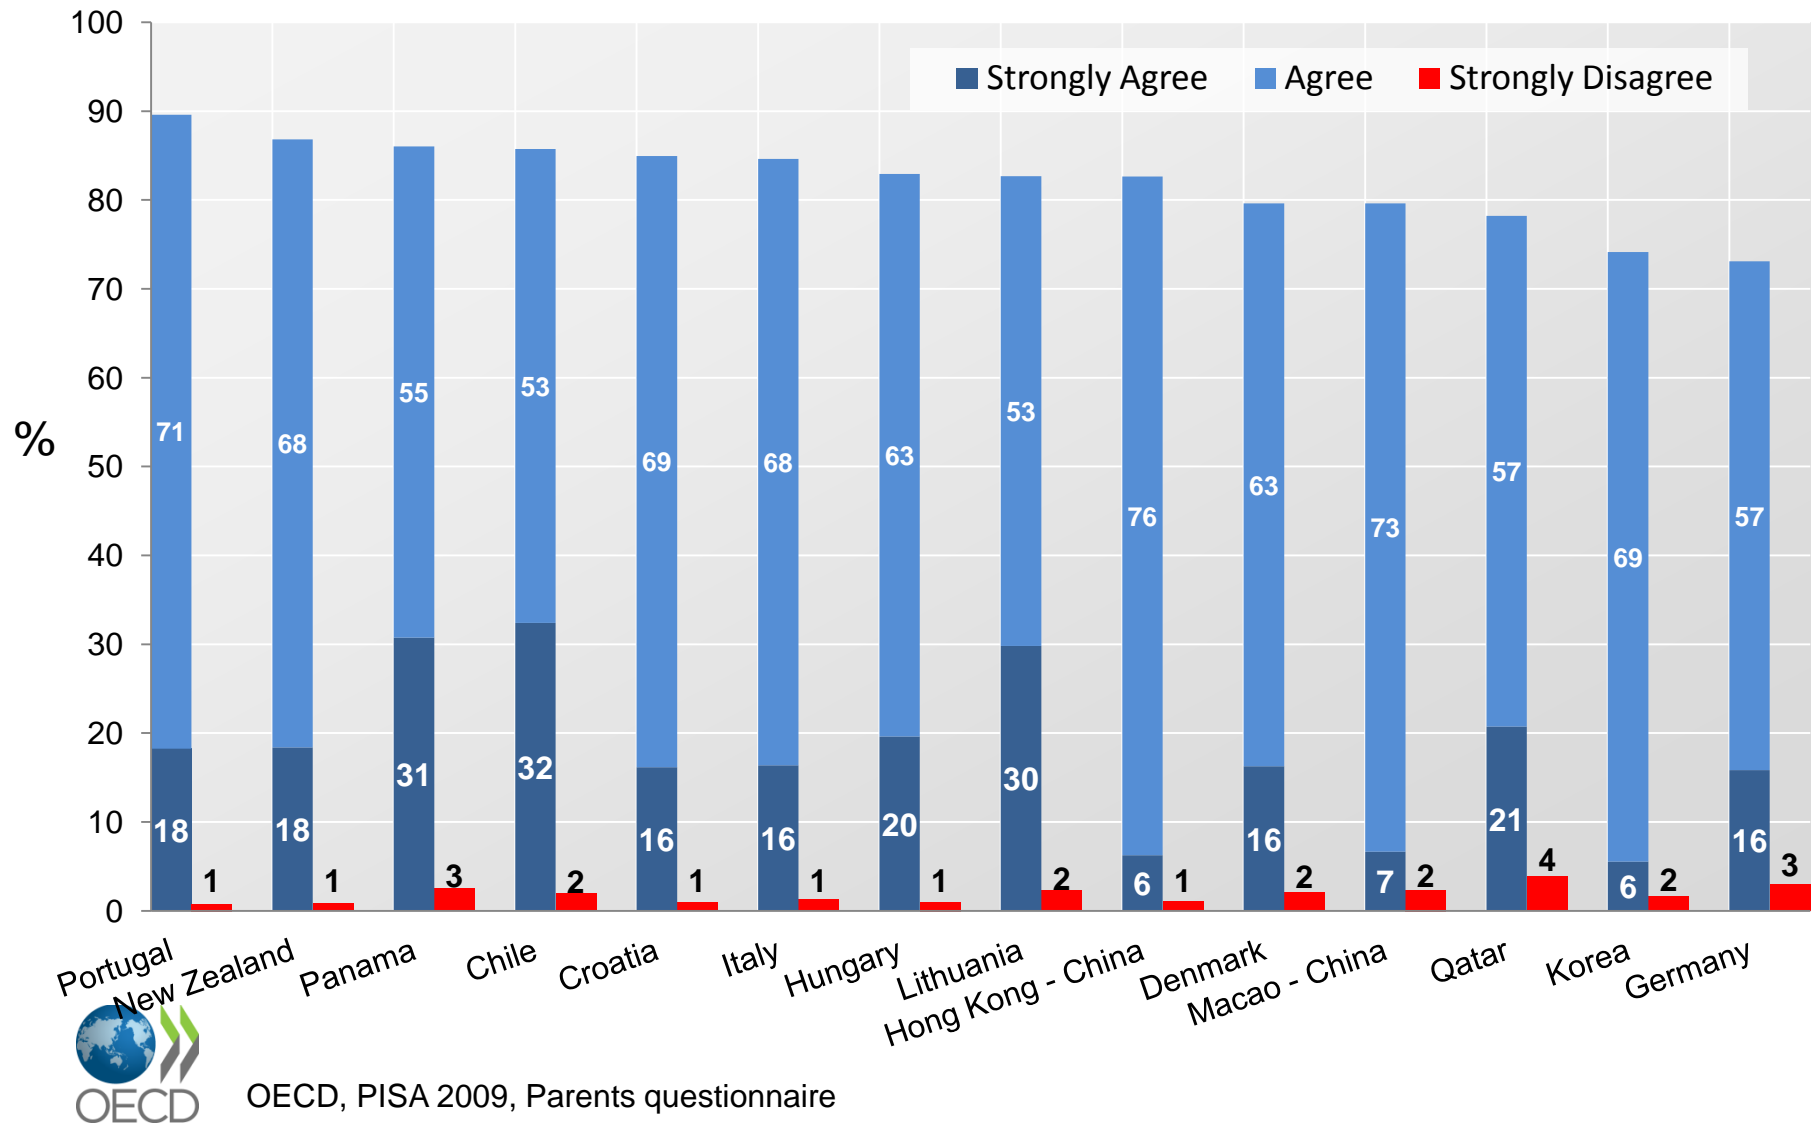

# Can school buy (or fund) innovations?

Distribution of current expenditure by educational institutions in primary, secondary and post-secondary non-tertiary education (2008)

# Parents are happy with pedagogy and content

“I am happy with the content taught and the instructional methods used in my child’s school”

# Pedagogy and curriculum: socio-economic distribution of “happiness”

“I am happy with the content taught and the instructional methods used in my child’s school”

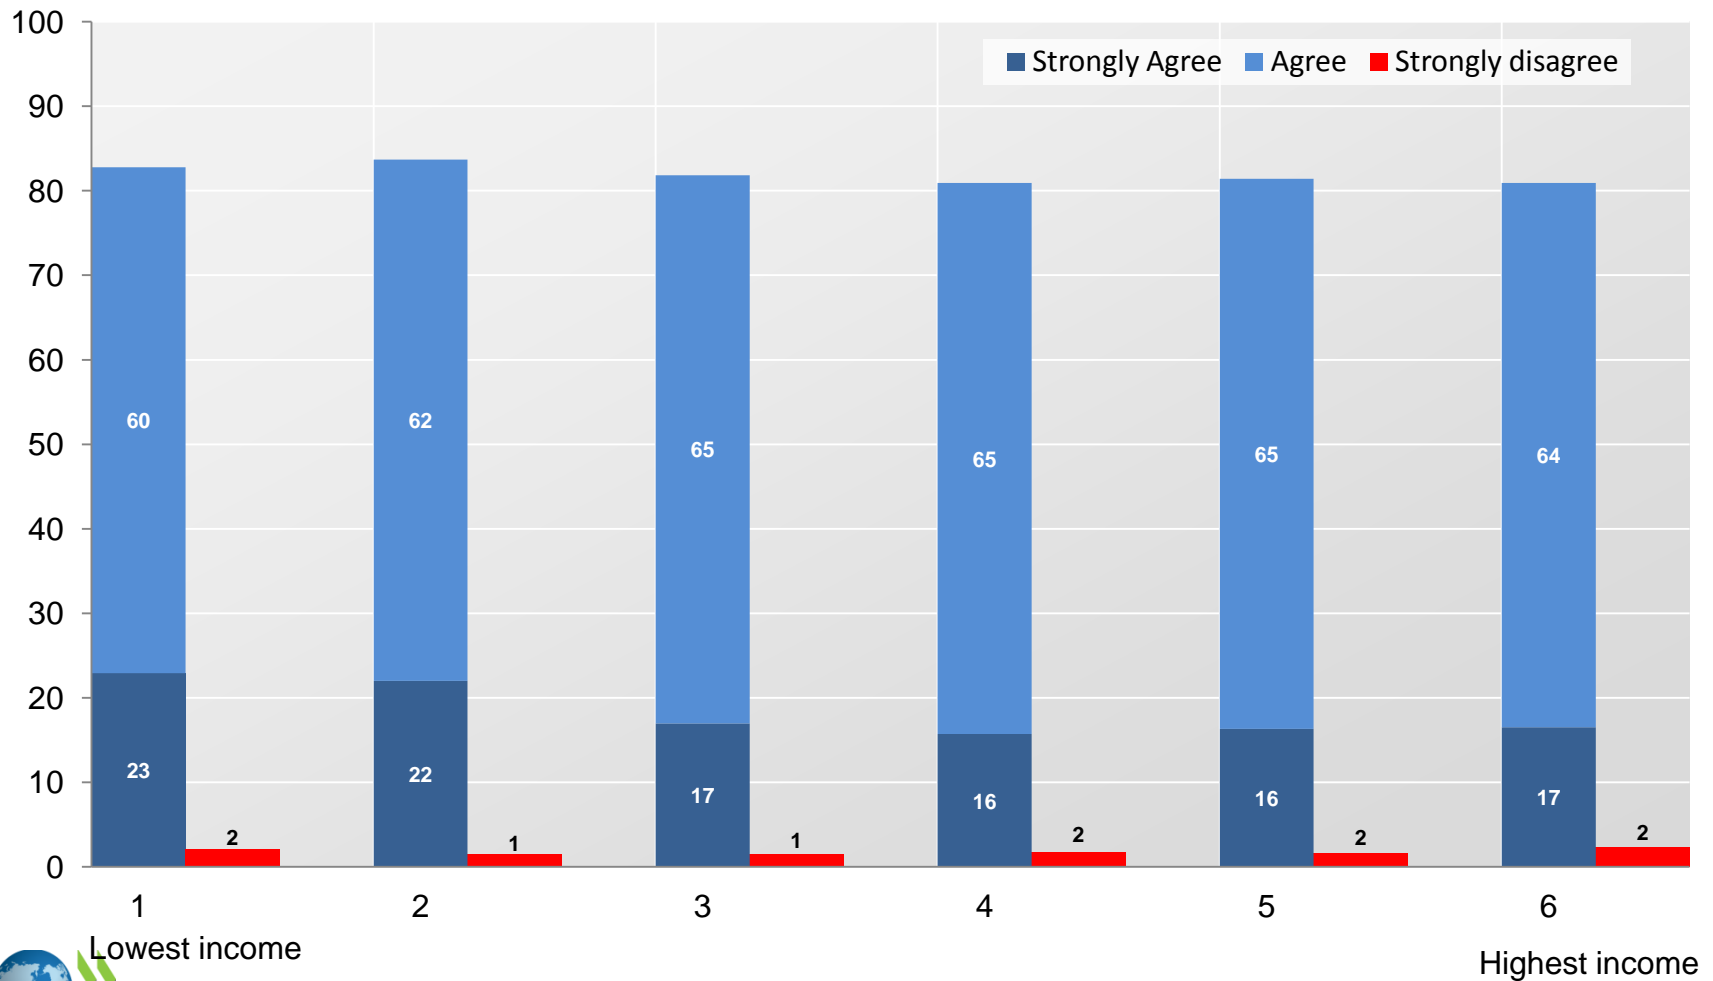

# Parents are happy with their children's school

"My child's school does a good job in educating students"

# School education: socio-economic distribution of “happiness”

"My child's school does a good job in educating students"

# Brakes to innovation

- **Brake #3: knowledge management**

- Insufficient organisational learning within school and across the education sector (?)
- Inappropriate format and delivery of professional knowledge for practitioners
- Difficulty to produce evidence on the impact of specific educational innovations

# Brakes to innovation

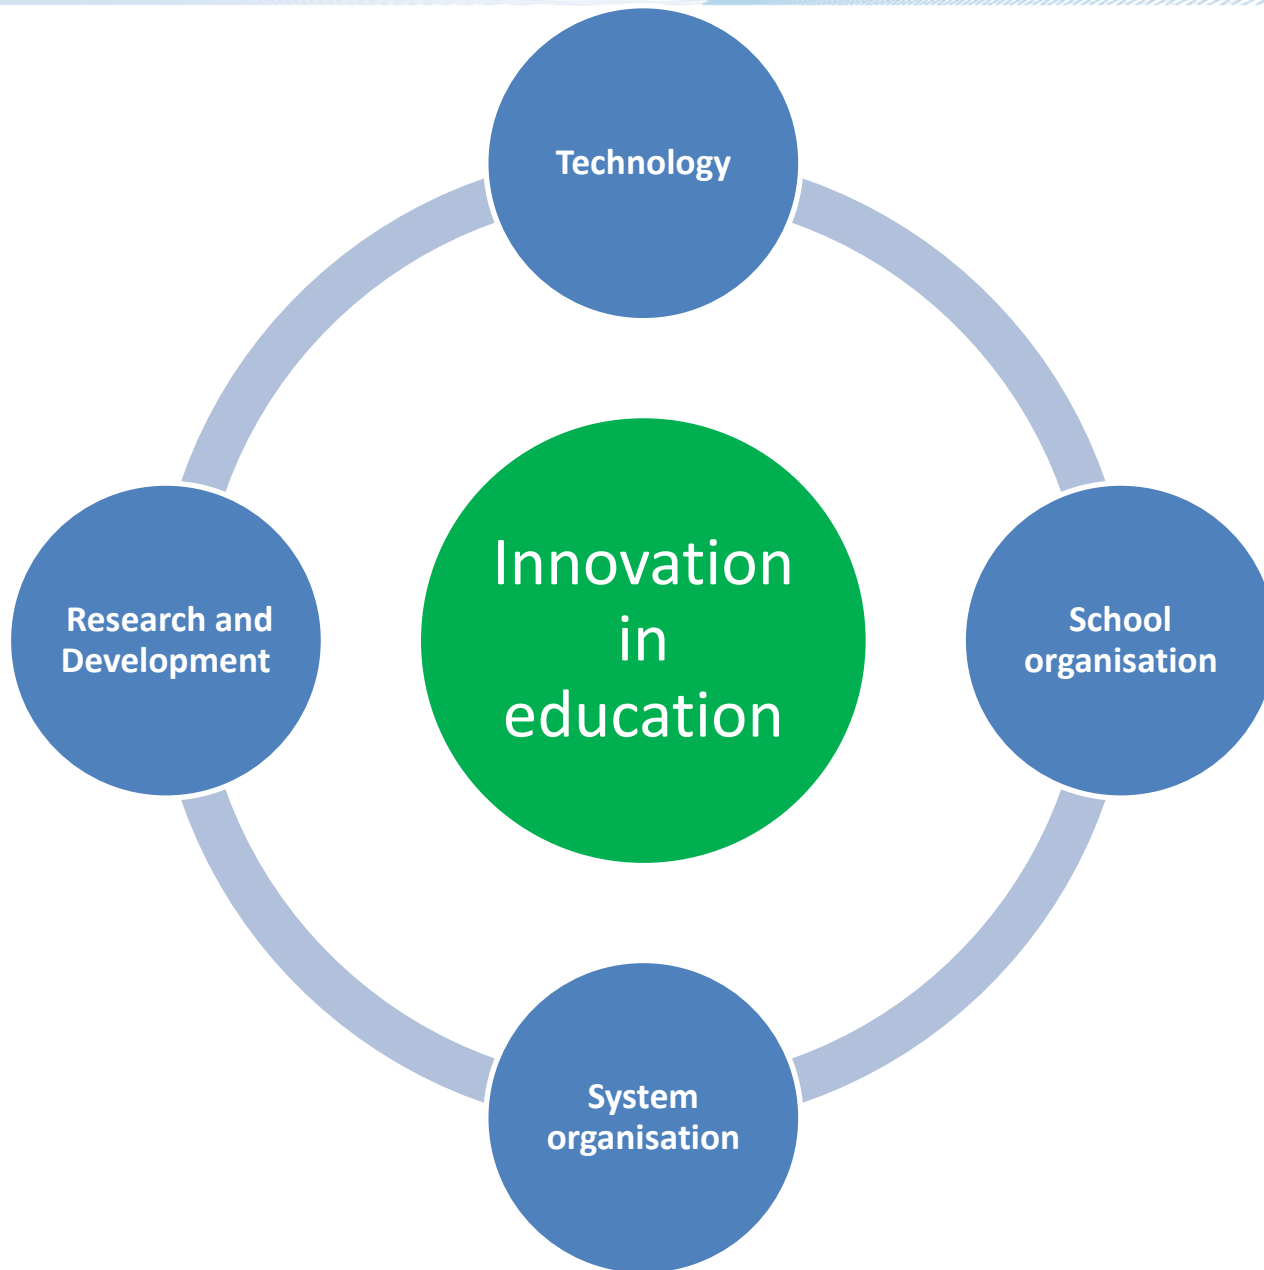

- Brake #1: supply of innovation
- Brake #2: demand for innovation
- Brake #3: knowledge management

# Selected action points to (try) unleash innovation

- Evaluate and measure innovation in education
  - Develop next-generation education information systems
  - Invest in research and evaluation of educational practices
  - Develop with CERI a measurement pilot?
- Foster (international) communities of practice (sectoral and organisational learning)
  - ILE network, other CERI and OECD work
  - Foster teacher professionalism around learning organisations
- Develop explicit innovation strategies for education (and finance and evaluate them)

# Innovation in education
