<b>Notes:</b>														
Definition of a MAP case and counting of MAP cases			The definition of MAP case and the counting of MAP cases are consistent with items (a) and (b) of Annex C of the MAP Statistics Reporting Framework											
Category of cases			Korea reported that for pre-2016 cases for determining whether a case is considered an attribution/allocation MAP case cases it followed the rules contained in Annex D of the MAP Statistics Reporting Framework. Annex D of MAP Statistics Reporting Framework defines such case as: "a MAP case where the taxpayer's MAP request relates to (i) the attribution of profits to a permanent establishment (see e.g. Article 7 of the OECD Model Tax Convention (OECD, 2015a)); or (ii) the determination of profits between associated enterprises (see e.g. Article 9 of the OECD Model Tax Convention (OECD, 2015a)), which is also known as a transfer pricing MAP case".											
Potential mismatches between 2018 start inventory and 2017 end inventory			Two cases in the "Other" category have been reclassified as "Attribution/Allocation," resulting in a net increase of two cases in the 2022 initial inventory compared to the 2021 year-end inventory. Two cases in the "Other" category have been reclassified as "Attribution/Allocation," resulting in a net decrease of two cases in the 2022 initial inventory compared to the 2021 year-end inventory. Additionally, other two cases had a simple error, and it has been adjusted.											
Notes on the computation of average time			The average time taken to close pre-2016 cases was computed by applying the following rules: (i) start date: when the MAP request is filed in Korea, the date on which the Korean competent authority receives a notification from the other competent authority concerned of its intention to accept the request; or when the MAP request is filed in the other state concerned, the date on which the Korean competent authority notifies this other competent authority of its intention to accept the request; and (ii) end date: one of the following dates: the date on which a MAP agreement is reached or the date on which closing letters are exchanged in case no MAP agreement is reached or the date on which Korea closes the case unilaterally if after five years of the start date no agreement is reached, or the date of notification to the taxpayer in case of unilateral relief, the date of the final court ruling in case of domestic remedies or the date of withdrawal of a MAP request by the taxpayer in case of relief granted via administrative proceedings or in case of a mere withdrawal of a MAP request.

The average time taken to close MAP cases that started before 1 January 2016 was computed by applying the following rules:

- (i) start date: when the MAP request is filed in Korea, the date on which the Korean competent authority receives a notification from the other competent authority concerned of its intention to accept the request; or when the MAP request is filed in the other state concerned, the date on which the Korean competent authority notifies this other competent authority of its intention to accept the request; and
- (ii) end date: one of the following dates: the date on which a MAP agreement is reached or the date on which closing letters are exchanged in case no MAP agreement is reached or the date on which Korea closes the case unilaterally if after five years of the start date no agreement is reached, or the date of notification to the taxpayer in case of unilateral relief, the date of the final court ruling in case of domestic remedies or the date of withdrawal of a MAP request by the taxpayer in case of relief granted via administrative proceedings or in case of a mere withdrawal of a MAP request.

# MAP Statistics prior to 2016

## Background

In 2006 the OECD began to compile annual statistics on the mutual agreement procedure (MAP) caseloads of all its member countries and of partner economies that agreed to provide such statistics. The statistics for each reporting period up to 2015 (generally a calendar year) included:

- opening inventory of MAP cases on the first day of the reporting period;
- number of MAP cases initiated during the reporting period;
- number of MAP cases completed during the reporting period;
- ending inventory of MAP cases on the last day of the reporting period;
- cases closed or withdrawn with double taxation during the reporting period; and
- average cycle time for cases completed, closed or withdrawn during the reporting period.

## Note on the calculation of MAP Statistics for 2006-2015

The MAP Statistics for 2006-2015 (pre-*MAP Statistics Reporting Framework*<sup>73</sup>) were provided by reporting jurisdictions based on their own methodology without following a common reporting framework and thus, are presented differently from the Statistics available for 2016 and onwards (that follow the *MAP Statistics Reporting Framework*).
