# MAP Statistics prior to 2016

## Background

In 2006 the OECD began to compile annual statistics on the mutual agreement procedure (MAP) caseloads of all its member countries and of partner economies that agreed to provide such statistics. The statistics for each reporting period up to 2015 (generally a calendar year) included:

- opening inventory of MAP cases on the first day of the reporting period;
- number of MAP cases initiated during the reporting period;
- number of MAP cases completed during the reporting period;
- ending inventory of MAP cases on the last day of the reporting period;
- cases closed or withdrawn with double taxation during the reporting period; and
- average cycle time for cases completed, closed or withdrawn during the reporting period.

## Note on the calculation of MAP Statistics for 2006-2015

The MAP Statistics for 2006-2015 (pre-*MAP Statistics Reporting Framework*<sup>90</sup>) were provided by reporting jurisdictions based on their own methodology without following a common reporting framework and thus, are presented differently from the Statistics available for 2016 and onwards (that follow the *MAP Statistics Reporting Framework*).
