The study has been produced with the financial assistance of the United Kingdom Foreign and Commonwealth Office's South East Asia Prosperity Fund and in close co-operation with the British Embassy in Bangkok.

The review team visited Bangkok from 29 June to 3 July 2015. During the week-long visit, the review team met with government officials, representatives from ministries and government agencies, energy producers and suppliers, bilateral donor agencies, multilateral investment banks, think tanks, interest groups and various other organisations and stakeholders. The team returned for a follow-up visit from 20 to 22 January 2016.

This report was drafted on the basis of these meetings, the government of Thailand's response to the IEA energy policy questionnaire and other information. The team is grateful for the co-operation and hospitality of the many people it met during the visit. Thanks to their openness and candour, the review visit was highly productive.

In particular, the team wishes to express its gratitude to Mr Areepong Bhoocha-Oom, Permanent Secretary, Ministry of Energy, Thailand, for his support for the review process and to his staff for providing detailed briefings on energy policy in Thailand. Their willingness to share information and their gracious hospitality contributed in no small way to a successful and productive visit. The author is particularly thankful to Dr Sarawut Kaewtathip, Executive Director, Policy and Planning Office, Ministry of Energy, Thailand and his team including Dr Sompop Pattanariyankool, Chatchai Kunlohit, Woranon Chansiri, Pasita Leesakul, Krittiya Petsee, Jomkwan Polak, for co-ordinating the team visit and their ongoing support throughout the drafting process.

The core members of the review team were:

Florian Kitt, Programme Manager and Team Leader, South East Asia, IEA

Matthew Wittenstein, Energy Analyst, Electricity Markets, IEA

Sylvia Spruck, Deputy Head of Section, Department for Access to Electricity Networks and Cross-Border Electricity Trade, Bundesnetzagentur, Germany

Dr Sopitsuda Tongsovit, Researcher, Energy Research Institute, Chulalongkorn University, Thailand

Additional members of the review team were:

Costanza Jacazio, Senior Gas Analyst, IEA

Sara Pasquier, Energy Analyst, IEA

Cedric Philibert, Senior Energy Analyst, Renewable Energy Technologies, IEA

Remi Gigoux, Energy Data Manager/Statistician, IEA

Matthew Wittenstein and Florian Kitt managed the review and are the lead authors of the report. The chapters were jointly drafted by the review team: Dr. Sopitsuda Tongsovit (renewables), Sylvia Spruck (transmission and distribution), Sara Pasquier (energy demand and efficiency), Matthew Wittenstein (generation and regulation), Remi Gigoux (data and policy), Costanza Jacazio (gas), Florian Kitt (policy and institutions) and Remi Gigoux.

Shelly Hsieh, Lisa-Marie Grenier and Lucy Shedden provided essential support.
