

**Pieter de Bruijn** is senior policy advisor Spatial Economic Policies at the Ministry of Economic Department. Currently, he is involved in the coordination of the Peaks in the Delta spatial economic subsidy scheme and the design of the future national government involvement in spatial economic policies. Before joining the Ministry of Economic Affairs in 2007, he worked as consultant Spatial Economics at the Netherlands Organization for Applied Physical Sciences TNO in Delft. As project manager, he has conducted a wide range of studies on the monitoring of regional economic development and innovation, economic sector studies of (amongst others) creative industries and construction and studies on regional economic coherence in clusters and knowledge corridors. Since 2002, he combines his work as consultant and policy advisor with an external PhD position at the Radboud University's Faculty of Management Sciences (Department of Human Geography).
