THE GLOBAL RELATIONS PROGRAMME

ABOUT US: ACTIVITY OF THE GLOBAL RELATIONS PROGRAMME

The Global Relations Programme (GRP) was established in 1992 as the main conduit for OECD non-member countries to engage with the Committee on Fiscal Affairs (CFA) and its work. The GRP has evolved to adjust to the changing environment of international taxation to engage effectively non-OECD members throughout the years, taking into account the re-structuring of the Global Forum on Transparency and Exchange of Information in 2009, and more recently, the BEPS Project and the establishment of the Inclusive Framework on BEPS.

The GRP is mainly delivered through the OECD Multilateral Tax Centres (MTCs), located in Europe (Ankara, Budapest and Vienna), Latin America (Mexico City) and Asia (Seoul and Yangzhou). However, in 2019, the Global Relations programme launched the first **OECD e-learning project** offering free online courses that cover various international taxation topics. Every year, new e-learning courses are developed and updated to meet the current needs of tax officials in developing countries. These interactive courses give participants a solid knowledge base on key topics of international taxation, providing an OECD certificate to those who complete them successfully. By the end of 2023, more than 20.000 officials will have used the OECD e-learning courses.

The GRP is possible thanks to generous cash and in-kind contributions. A big part of the GRP expenses are covered by the Voluntary Contribution of Japan, as well as those of Australia, Italy, Korea, Netherlands and Türkiye. In-kind contributions through the provision of country experts are also very important.

All the Global Relations Programme e-learning modules are available for free on the Knowledge Sharing Platform (KSPTA_{TA}), a global online resource for sharing knowledge and expertise in tax administration. Officials from tax administrations, tax policy departments, regional tax organisations and international tax organisations can register for free and access the platform at any time and from any device.

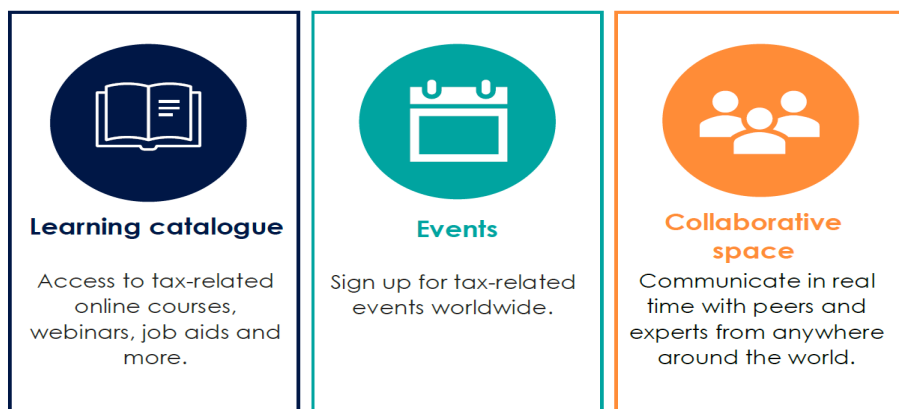

What is the KSP_{TA}?

A global online resource for sharing knowledge and expertise in tax administration. Users can access the platform anytime, anywhere, from any device.

In the **Learning catalogue** section, users can register for online courses or view reference materials. Users can also browse the calendar and register for worldwide tax related events in the Events section.

In a **Collaborative space**, users can collaborate on tax capacity building initiatives and share best practices with peers.

Who can register?

Officials from tax administrations, tax policy departments, regional and international tax organizations.

To create an account:

1. Go to <https://ksp-ta.org/#/registration>.
2. Complete the form using your work email address.
You will receive two emails to
 - confirm your email address; and
 - create a password.

To register for online courses.

1. Log in to www.ksp-ta.org.
2. Click the Learning catalogue.
3. Enter keywords of the course title in the search box or use the filters on the left.
4. Click "Register". Select the language of your choice before starting the course.

For more details, contact info@ksp-ta.org.

Contents:

E-learning modalities

Our self-paced training on taxation topics is delivered in three formats:

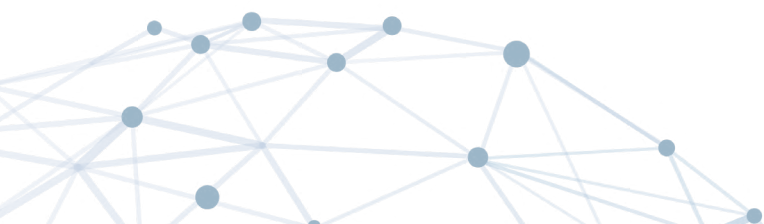

Interactive modules: 45-120 minute online learning modules which provide solid knowledge of key issues on a topic. Participants learn through a combination of interactive elements, video, quizzes and activities.

Recorded webinars: recordings of past webinars / virtual classes and pre-recorded lecture content in which OECD experts introduce the fundamentals of a topic.

Training capsules: 5-15 minute videos to raise awareness on emerging issues/initiatives and/or introduce basic relevant concepts.

Transfer Pricing

Transfer prices are the prices at which an enterprise transfers physical goods and intangible property or provides services to associated enterprises. Transfer prices are significant for both taxpayers and tax administrations because they determine in large part the income and expenses, and therefore taxable profits, of associated enterprises in different tax jurisdictions. Transfer pricing issues originally arose in transactions between associated enterprises operating within the same tax jurisdiction. The international aspects are difficult to deal with because they involve more than one tax jurisdiction and therefore any adjustment to the transfer price in one jurisdiction implies that a corresponding change in another jurisdiction is appropriate. However, if the other jurisdiction does not agree to make a corresponding adjustment, the MNE group will be taxed twice on this part of its profits. In order to minimise the risk of such double taxation, an international consensus is required on how to establish for tax purposes transfer prices on cross-border transactions..

For information on the live workshops on Transfer Pricing, please visit our webpage: [OECD's live training in taxation - OECD](#)

E-learning modules

Basic Concepts of Transfer Pricing

This module offers an introduction to the basic concepts of transfer pricing. It contains a description of the arm's length principle, the five OECD-recognised transfer pricing methods, and the role of comparables in the transfer pricing analysis.

[EN/FR/ES](#)

Pg 7

Introduction to Transfer Pricing

An introduction to the fundamentals of transfer pricing, including how to calculate whether the price of a transaction between associated enterprises is arm's length or whether it may require adjustment.

[EN/FR/ES](#)

Pg 8

A Toolkit for Addressing Difficulties in Accessing Comparables Data for Transfer Pricing Analyses

The toolkit puts into context the search for comparables information providing an outline of the comparability analysis process, and cross-references more detailed guidance material where needed. In particular, the importance of accurately delineating the transaction under review is emphasised.

Transfer Pricing

Recorded Webinars on Transfer Pricing

The recorded webinars on transfer pricing cover a range of specialised topics. These include the transfer pricing aspects of intra-group services transactions and financial transactions, the updated content in the 2022 Transfer Pricing Guidelines, and the implications of the LIBOR transition."

Recorded webinars

Transfer Pricing Aspects of Intra-Group Services

In this webinar, OECD expert Wanda Montero Cuello explains the transfer pricing aspects of intra-group services. The webinar covers an introduction to transfer pricing aspects of intra-group services and the benefits test.

[EN](#)

Special Considerations for Intra-Group Services

In this webinar, OECD expert Wanda Montero Cuello explains some special considerations on the transfer pricing aspects of intra-group services. The webinar covers pricing intra-group services and low value-adding intra-group services.

[EN](#)

Transfer Pricing Aspects of Financial Transactions

In this webinar, OECD expert Manuel de los Santos explains the content of the Transfer Pricing Guidance on Financial Transactions, released in February 2020, that follows-up the reports on BEPS Action 4 (Limiting base erosion involving interest deductions and other financial payments) and Actions 8-10 (Aligning Transfer Pricing Outcomes with Value Creation).

[EN](#)

Recorded webinars

OECD Transfer Pricing Guidelines

The webinar discusses the updates in the 2022 version of the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations. In particular, it provides a brief overview of the updated guidance on the transactional profit split method, the approach to hard-to-value intangibles and the new Chapter X on financial transactions.

[EN/ES](#)

Implications of the LIBOR transition - Part I

In this webinar experts Dini Ajmani (U.S. Treasury) and David Bowman (Federal Reserve and FSB OSSG) provide an overview of the LIBOR transition.

[EN](#)

Implications of the LIBOR transition - Part II

This webinar presents the Swiss Approaches to Intercompany Loans and Transfer and the U.S. proposed tax regulations related to the LIBOR transition and thoughts on transfer pricing.

Two-Pillar Solution

Recorded Webinars on the Two-Pillar Solution

Pillar One

The OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting (IF) has agreed a two-pillar solution to address the tax challenges arising from the digitalisation of the economy.

Pillar One brings dated international tax rules into the 21st century by offering market jurisdictions new taxing rights over MNEs, whether or not there is a physical presence. Pillar One includes: the reallocation of taxing rights to market jurisdictions where users or customers are located; the simplification of the application of the arm's length principle to certain marketing and distribution activities; new measures for dispute prevention and dispute resolutions connected with the new taxing right; and recommendations on Digital Services Taxes (DSTs) and similar measures to prevent harmful disputes.

Recorded webinars

Overview of the Pillar One building blocks

In this recorded webinar OECD expert John Stokes provides an overview of the Pillar One building blocks, with a particular emphasis on Amount A, which introduces a new taxing right over a portion of the profit of large and highly profitable multinational groups, in favor of market jurisdictions.

[EN/ES/FR/ARA](#)

Essential aspects of the Draft Model Rules for Nexus and Revenue Sourcing - Part I

In this webinar, OECD expert Olivia Long outlines the operation of the Nexus and Revenue Sourcing rules. This includes an overview of the different categories of revenue used for the purposes of revenue sourcing and how the rules are expected to apply to each category

[EN](#)

Essential aspects of the Draft Model Rules for Nexus and Revenue Sourcing - Part II

Recorded webinars

Administration and Tax Certainty Aspects Of Pillar One

In this recorded webinar (excerpted from a December 2022 presentation), OECD expert Sriram Govind presents a summary of the administration and tax certainty aspects of Amount A, as set out in the October 2022 Progress Report. The summary covers how Amount A will be administered, the tax certainty framework for the new Amount A taxing right, and the tax certainty mechanism for issues “related to Amount A” (e.g. transfer pricing and profit attribution disputes with a potential impact on the allocation of Amount A).

[EN](#)

Tax Certainty Framework for Amount A

In this recorded webinar (an excerpt from a workshop held in October 2022), OECD expert Mark Johnson provides a comprehensive overview of the Amount A tax certainty framework. Through this innovative framework, MNE groups and tax administrations will obtain coordinated and multilateral certainty with respect to all aspects of the application of the new Amount A taxing right.

[EN](#)

The Two-Pillar Solution

Recorded Webinars on the Two-Pillar Solution

Pillar Two

As part of the Two-Pillar Solution to address the tax challenges arising from the digitalisation of the economy, Pillar Two provides a minimum 15% tax on corporate profit, putting a floor on tax competition. Governments worldwide agree to allow additional taxes on the foreign profits of MNEs headquartered in their jurisdiction at least to the agreed minimum rate. This means that tax competition will now be backstopped by a minimum level of taxation wherever an MNE operates. A carve-out allows countries to continue to offer tax incentives to promote business activity with real substance, like building a hotel or investing in a factory.

Recorded webinars

Overview of the Pillar Two - Focus on GloBE Rules

This video provides an overview of Pillar Two of the Two-Pillar Solution to address the tax challenges arising from the digitalisation of the economy, with a focus on the Global Anti-Base Erosion (GloBE) rules.

[EN](#)

The Key Provisions of the GloBE Rules (1) Identifying Constituent Entities within Scope

Exchange of Information

Exchange of information is a powerful tool that allows tax authorities to obtain information from other jurisdictions in order to ensure tax compliance.

The effective use of exchange of information for tax purposes is achieved through the implementation of two complementary international standards. The first standard on exchange of information on request (EOIR) allows a tax authority to request information to progress a specific tax investigation. The second provides for the international automatic exchange of information (AEOI), where a pre-defined set of information is automatically exchanged each year.

For information on the live workshops on Exchange of Information, please visit our webpage: [OECD's live training in taxation - OECD](#)

E-learning modules

The Global Forum: Exchange of Information as a tool to combat tax evasion

Exchange of Information

Beneficial Ownership (BO)

Beneficial owner refers to the natural person(s) who ultimately owns or controls a customer and/or the natural person on whose behalf a transaction is being conducted. It also includes those persons who ultimately exercise effective control over a legal person or arrangement. This concept is crucial to guarantee transparency, and to ensure that corporate layers or other mechanisms do not prevent you from finding the individual who ultimately controls an entity or an asset. This e-learning course takes a deep dive into the requirements and standards related to beneficial ownership information, and looks at what countries around the world are doing to implement them.

Exchange of Information

CRS-Automatic Exchange of Financial Account Information (CRS-AEOI)

This course provides a comprehensive overview of the Automatic Exchange of Information (AEOI) standard. Under the standard, jurisdictions obtain information from their financial institutions and automatically exchange that information with other jurisdictions on an annual basis. The course covers the financial account information to be exchanged, the financial institutions that need to report, the different types of accounts and taxpayers covered, as well as common due diligence procedures to be followed by financial institutions. The course provides an introduction to CRS-AEOI, and will teach participants: (1) how to identify reporting financial institutions; (2) how to identify financial accounts and reportable accounts; (3) how to apply the due diligence procedures; and (4) what relevant information needs to be reported.

BEPS (Base Erosion and Profit Shifting)

Base erosion and profit shifting (BEPS) refers to tax planning strategies used by multinational enterprises that exploit gaps and mismatches in tax rules to avoid paying tax. Developing countries' higher reliance on corporate income tax means they suffer from BEPS disproportionately. BEPS practices cost countries an estimated USD 100-240 billion in lost tax revenue annually. Working together in the OECD/G20 Inclusive Framework on BEPS, 145 countries and jurisdictions (as of December 2023) are collaborating on the implementation of BEPS measures to tackle tax avoidance, improve the coherence of international tax rules, and ensure a more transparent tax environment.

For information on the live workshops on BEPS, please visit our webpage: [OECD's live training in taxation - OECD](#)

Tax Crime Investigation Maturity Model

This e-learning module describes the Tax Crime Investigation Maturity Model, a tool allowing jurisdictions to assess the robustness and effectiveness of their tax crime investigation regime. The Tax Crime Investigation Maturity Model is a self-assessment diagnostic tool for evaluating the legal, institutional, and operational frameworks for combatting tax crimes in a jurisdiction.

By completing this e-learning course and fulfilling other prescribed requirements, you can become an Expert Facilitator able to assist jurisdictions in conducting a self-assessment.

VAT

Consumption taxes such as Value Added Tax (VAT) or Goods and Services Tax (GST) are a major source of revenue for governments around the world. Some 165 countries operated a VAT at the time of the completion of the International VAT/GST Guidelines in 2016, more than twice as many as 25 years before. As VAT continued to spread across the world, international trade in goods and services has also expanded rapidly in an increasingly globalised economy. One consequence of these developments has been the greater interaction between VAT systems, along with growing risks of double taxation and unintended non-taxation in the absence of international VAT co-ordination.

E-learning modules

Securing VAT Revenue on Cross-Border Trade

This module provides an overview of the key features of VAT and its importance as a source of revenue for governments worldwide. It examines the impact of the digitalisation of the economy and the growth of digital cross-border trade on VAT collection and reviews the challenges that tax administrations are facing.

[EN/FR/ES/AR](#)

Pg 37

OECD VAT Standards and Guidelines

This module covers the OECD VAT standards, guidelines and recommendations on the application of VAT to internationally traded services and intangibles in general and examines in particular the collection of VAT on supplies of goods, services and digital products in online sales.

[EN/FR/ES](#)

Pg 38

Implementing the VAT Standards and Guidelines

This module describes the main steps for the implementation of the OECD standards and guidance to ensure the efficient collection of VAT on digital sales. It also highlights the importance of administrative co-operation, including the exchange of information, for VAT collection.

Tax Administration

The Forum on Tax Administration (FTA) was established in July 2002 to develop a global response to tax administration issues. The FTA aims to influence the environment within which tax systems operate and to move away from a confrontational dialogue to more constructive engagement with taxpayers. It brings together Commissioners from 53 OECD and non-OECD countries (as of December 2023) to share information and experience and to identify international good practices for resolving particular administration issues.

E-learning modules

Enterprise Risk Management:

The Essentials

Every organisation needs to have an overview of the risks that could potentially endanger its operations (risk management), and a strategy to ensure continuity should those risks materialise (crisis management). This module covers the essentials of enterprise risk management.

Tax Administration

Enterprise Risk Management: The Essentials

Enterprise Risk Management (ERM) provides organisations with a reliable approach for identifying, assessing and managing the risks that could materialise in an organisation. A traditional risk management approach identifies and assesses risks for each particular business unit or process; tends to look at risks on a one-by-one basis; and defines risk only in terms of the probability of financial losses. ERM, in contrast, provides a holistic approach, encouraging a multi-dimensional assessment that allows organisations to understand how individual risks relate to one another and how they align to the goals and priorities of the organisation.

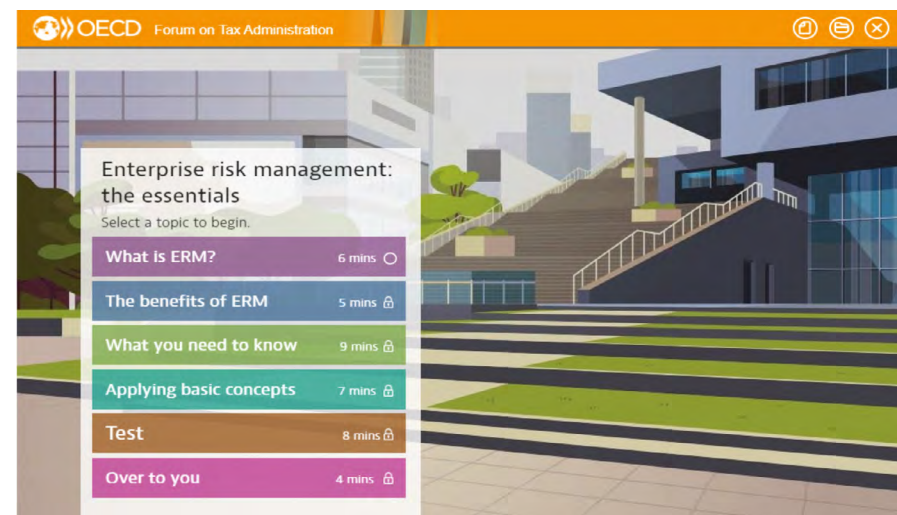

This course provides an overview of ERM and how it is different from traditional risk management and identifies the essential elements that must be put in place for a successful ERM programme.

Tax Administration

Digital Transformation Maturity Model (DTMM)

The Digital Transformation Maturity Model is a diagnostic tool that allows a tax administration to assess their current level of maturity with regard to digitalisation and digital transformation.

The e-learning module on the Digital Transformation Maturity Model is based on the FTA's publication *Tax Administration 3.0*, which covers the digital transformation changes Administrations can make in the way they operate, responding to the changes in how taxpayers interact and conduct business with each other. In particular, this digital transformation is centered around the increasing migration of taxation processes into taxpayers' natural systems, i.e. the systems they use in their daily lives and/or businesses.

The Digital Transformation Maturity Model allows administrations to compare their own maturity in the different aspects of digital transformation to that of their peers.

Tax Administration

Virtual Training to Advance Revenue Administration (VITARA) : a comprehensive catalogue of courses for tax administration managers

The Inter-American Center of Tax Administrations (CIAT), the International Monetary Fund (IMF), the Intra-European Organisation of Tax Administrations (IOTA) and the OECD collaborated to develop a comprehensive 18-course curriculum in tax administration management.

VITARA (Virtual Training to Advance Revenue Administration) is a comprehensive catalogue of online courses specifically designed for tax administrations, consisting of several short, structured online modules that can be taken individually or as a whole. It covers both institutional arrangements and management of strategic reform, as well as design and implementation of core taxation processes. Course content is tailored to senior managers and executives of tax administrations.

The curriculum includes:

Part A. Institutional governance • Compliance risk management • Organization • Strategic management • IT and data management • Reform management (I and II) • Human resource management • Performance management • Enterprise risk management

Part B. Introduction to tax administration • Taxpayer registration • Taxpayer services • Filing of declarations • Payment and debt collection • Audit and other verification methods • Dispute resolution • Revenue management.
