

Thomas Deckers Bio

Thomas has been a member of BaFin since 2013. Since November 2017 he is Deputy Head of the section which deals with innovations in financial technologies and their potential impact on the financial market. Because of his academic background in econometrics Thomas is mostly focused on topics dealing with innovative data analysis. As part of this, he was substantially involved in the preparation of BaFin's report "Big Data meets Artificial Intelligence". In addition to his work at the BaFin, Thomas regularly holds lectureships in machine and statistical learning.
