## The Dutch education system

# Why: Inequities in graduation rates in HE (2002-2012)

# Policy on Inclusion

## National Policy Agenda

Increasing urgency of Inclusion and Equity in (transition to) HE

1. National Quality Agreements (2019-2024)
2. Policy letter on Inclusion and Equity (October 2018)
3. National Strategic Policy Agenda for HE (in preparation) (2020-2025)

Focus inclusion and equity on different stages in students study paths:

- Trajectories before entering HE
- Trajectories within HE (Bachelor phase)
- Trajectories toward Master studies

## Moving toward *Individual student success*

Minister Van Engelshoven:

*“Student success should foremost focus on the student: students who enter HE should be enabled to successfully complete their educational program”*

- Breaks with past policy focus on performance output of HEI's.
- Question is how to capture this in quality assurance with HEI's as policy partners.
- Trilemma : How to balance: wide accessibility & high quality of education & high completion rates

# Policy & incentives

## • Binding study advise (BSA)

- Minimum ECT's completion requirement in first year bachelor
- How to avoid high drop out rate of underprivileged students

## • Selection before entering

- Only part of the programs
- How to make selection methods lead to more inclusive results

## • Social lending system

- Low socio-economic status receive scholarship as gift
- All students can lend against low interest rate
- Concern: lending fear among 1<sup>st</sup> gen students. Ministry provides information

## • Coalition Agreement on improving student well-being

- Aim: improve over all well being for students.

## • Yearly Conference on Inclusive HE

- Collaboration between ministry, ECHO and HEIs

## • Regional collaborations VET & HE

- VET Institutes and Universities of Applied Sciences collaborate on a regional scale to improve successful transitions for their students.

## • Comenius Grants

- Grants focus on teaching innovation
- Teaching, Senior & Leadership grants

## Bottum up initiative

- Staff initiative of Ministry of Education, Culture & Science.
- Programme is supported by the Minister and the Secretary General

### Aim:

- Practice what we preach: create awareness about the impact of implicit bias in the organization
- creating awareness on cultural diversity in our organisation
- **Color blind → Color brave**
- Innovate processes concerning recruitment and staff-selection

## Activities

- Network of Ambassadors within our organisation
- Mentoring programs: staff become mentor of students and (young) professionals with bi-cultural backgrounds
- Focus group research into sense of belonging of diverse groups in the organisation
- Innovate HRM processes on recruitment and staff-selection
- Support (top) management to develop inclusive leadership

## Student Labs

- The ministry initiated and organized these Student Labs.
- VET & HE Students developed project proposals for improving transition to HE in *Student Labs*
- HEI's were eligible for funding to implement these student proposals.

## Students-4-Students

- Peer role-modeling projects improving transition, retention and inclusion.
- Collaboration of Ministry and ECHO.
- Four year period (2018-2021)
- Students and HEIs can apply

# Innovation in policy to enhance equity and inclusion in Dutch Higher Education:

## Students-4-Students

How can students play an important role in making HE more accessible and inclusive

Superdiversity in society → Inclusion in HE

## How?

- Funding from the Ministry of Education. Students and institutions can apply for funding to improve inequities based on an zero base analysis
- Proposals from institutions have to be developed in collaboration with students
- Students play a role in developing content, as volunteer or within the project management. Funding is also meant to pay students
- Programs of institutions and students have to be: **innovative**, enhancing **inclusion**, closing the **achievement gap**, creating **sense of belonging** and leading to **sustainability**
- Programs of students have to be embedded in institutions
- ECHO coordinates peer learning activities for student and institutional program coordinators
- In total 16 institutional and 11 students projects (4 mln euro in total)

## Criteria for funding

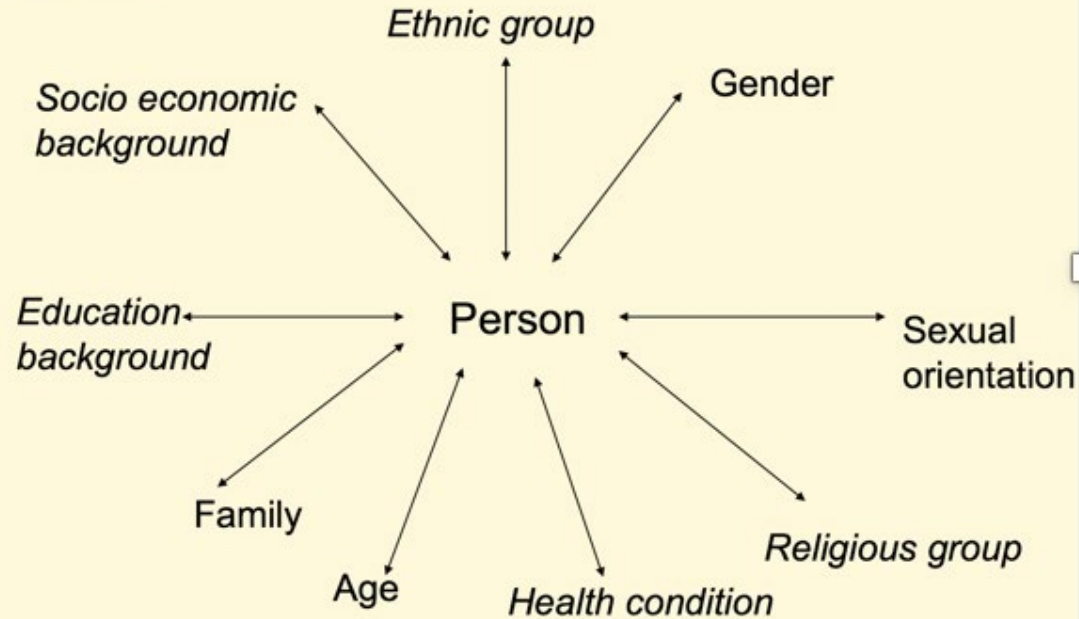

- **None!**
  - Invitation to fill in a questionnaire → leads to a baseline analysis
  - A proposal that is in fact an answer to the issues raised from the baseline analysis
- Awarded proposals were selected by an independent committee of experts

## Social identities & intersectionality

Edwin Hoffman

## Programmes

- ECHO Junior Academy
- Erasmus Pre Academic Program
  
- ECHO Award/ ECHO Foundation
- Masterclass on Inclusive Excellence
- Mentor program for almost graduated students
- Outreach and mentor programs to increase diversity in PhD and academia
- Leadership development through Community Meetups

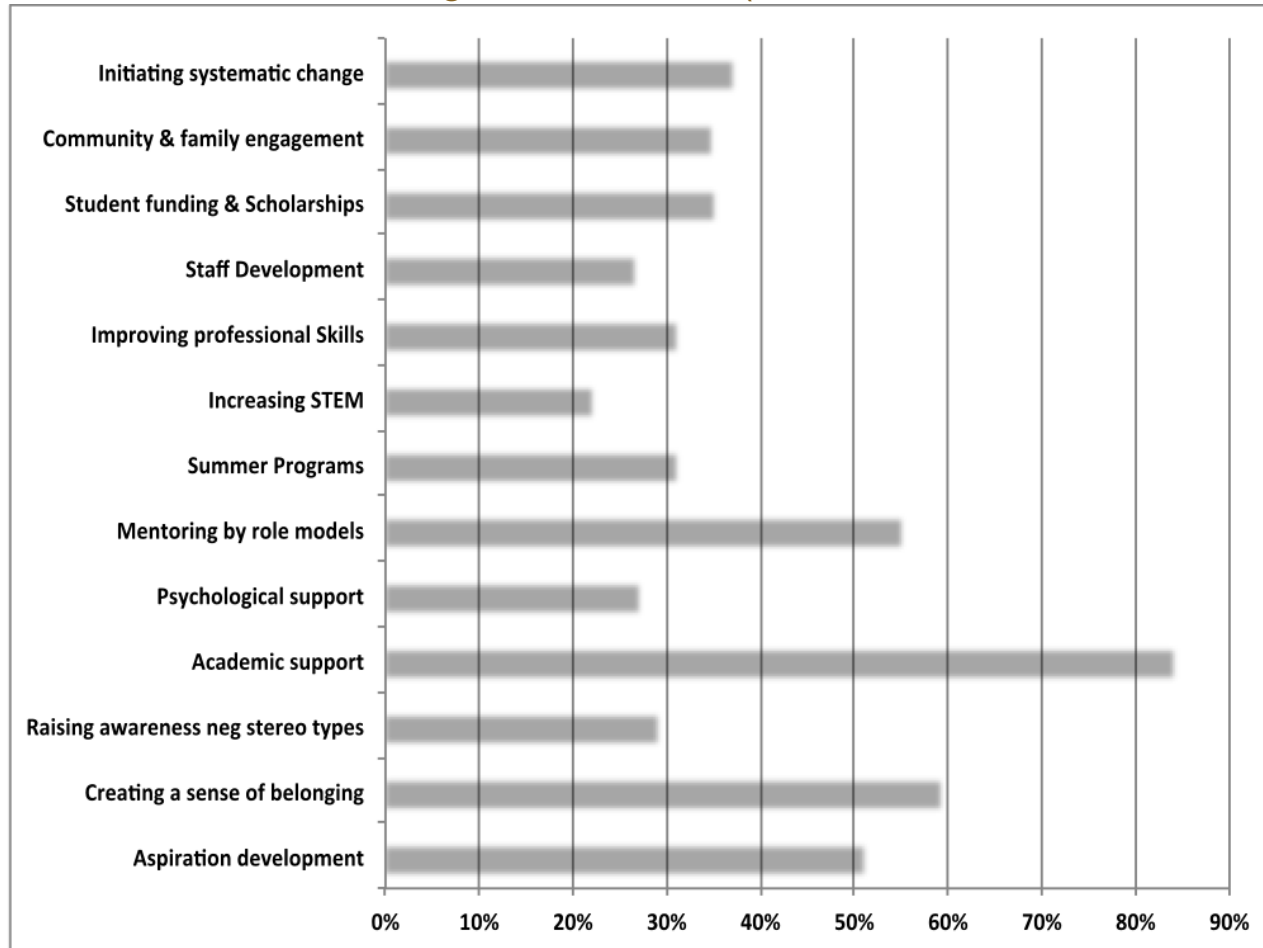

## ➤ Target groups

- Children in primary school
- First year students Erasmus University (1st generation)
- Students with a migrant background
- Professionals in higher education
- Students with a migrant background
  
- MA students, PhD's, post docs etc.
  
- Students and young professionals

# Why: EU funded project IDEAS

Identifying effective approaches to enhancing the social dimension in Higher Education (<http://www.equityideas.eu>)

# Having Needs Addressed

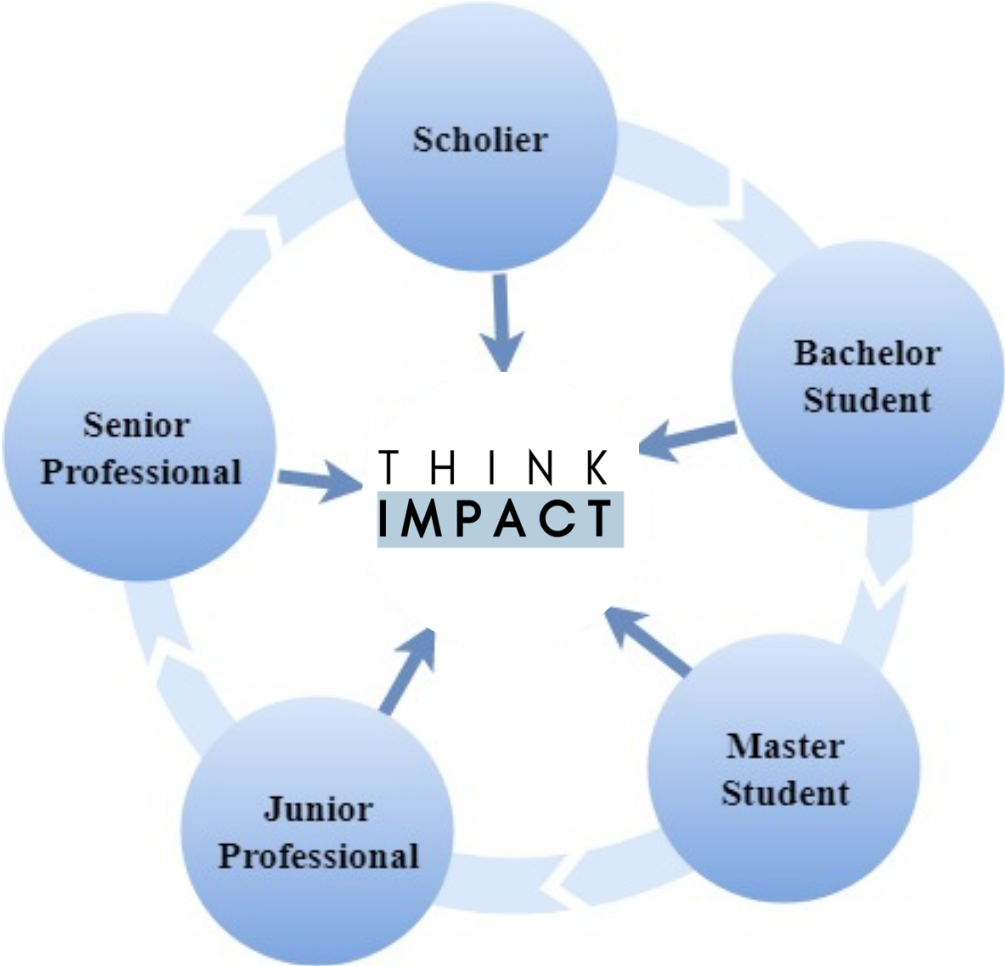

echo

expertisecentrum diversiteitsbeleid

DIVERSITY  
TALKS

# Having Needs Raised

- Does not take role of pedagogue, but puts marginalized voices central in problems and solutions
- Subjugated knowledge → Epistemic knowledge
- Creates and fosters leadership qualities and development (and role modeling!)
- Stimulates (HEI) social responsibility and active citizenship
- Uses (human-)capital to create platforms of exposure
- Project managers → frameworks & guidelines; Participants → concrete interpretations
- Improved reach and retention of target group through agency
- Addressed both Individuals (←StudieHub) as well as Institutional (←Think Impact) needs
- Sustainability
- Pipeline trajectories
- NB: Interesting unintended outcomes!
