Preface

The [OECD Tax-Benefit model \(TaxBEN\)](#) incorporates detailed policy rules for tax liabilities and benefit entitlements as they apply to individual families across OECD member countries. Its main use is to calculate the amount of taxes that people are liable to pay, and the government transfers they are likely to receive, in different family and labour-market situations. The model includes legal policy rules that are relevant for people of **working age** (from 18 years old until the statutory retirement age) and their dependent children. Income tax liabilities and benefit entitlements are calculated for a broad set of *stylised* families (“vignettes”, e.g. a married couple of 40 years old adults with two children aged 4 and 6 respectively). Model users are free to change many of these characteristics, including the age and number of children, activity status of adult members, hours of work, current and past earnings levels, unemployment duration, social contribution records, and housing-related costs. The model has been updated annually since the early 2000s for most OECD countries.

TaxBEN’s policy scope includes the main taxes on employment income (earnings), social contributions paid by individuals and by employers, as well as the main cash and near-cash benefit programmes, including unemployment benefits, family benefits, guaranteed minimum-income benefits, cash housing benefits, and employment-conditional benefits. Disability benefits and support for non-parental childcare are included for a sub-set of countries and years. The most important policy areas that are outside the scope of the model include taxes on wealth (e.g. taxes on immovable and unmovable properties, including local taxes), indirect taxes (e.g. VAT), early-retirement benefits, sickness benefits and in-kind transfers (e.g. free school meals, subsidised transport and free health care).

This report describes the taxes and benefits that are included in the model and focuses on the rules that are relevant for family, individual and labour-market circumstances that are within its scope. The **Annex** provides information on other cash benefits and taxes on employment incomes that can be relevant for some members of the working-age population, but which are not included in the TaxBEN model.

Reading notes and further details on the scope and content of this report

- The **reference date** for policy rules described in this report is **January 1, 2019**.
- **Guidelines for completing and updating this report** are provided [here](#).
- Further information on the model, model results, and references to reports and analytical uses is available on the [project website](#). A [methodology](#) document provides a full description of the assumptions underlying the model as well as the model choices that users can make. The symbol  in the text provides a link to a glossary of technical terms.
- Section titles provide the names of taxes and benefits as they are known in the country: first, direct translation into English, then (in brackets) the name in the national language.
- In order to facilitate transparency between the policy descriptions and the associated code in the model, the variable names are indicated in the text in square brackets using the following format: **[variable name]**, for instance: **[AW]** for the average wage.

The OECD tax-benefit model for Canada: Policy rules in 2019

1. Reference wages

Average wage **[AW]**: The OECD tax-benefit model uses Secretariat estimates of the average full-time wage (available [here](#)).¹ If Secretariat estimates are not available yet, the model uses wage projections obtained by applying forecasted wage growth² to the latest available wage estimate.

The minimum wage **[MIN]** used by the TaxBEN model in 2019 is CAN 27 310.40 per year.

2. Unemployment benefits

2.1. Unemployment insurance (*Employment Insurance*)

Variable names:³ **[UB; UI_p; UI_s; FSUP]**

It is contributory, not means-tested and taxable. 

The Employment Insurance (EI) program provides temporary income support to Canadians workers while they are temporarily unemployed and looking for work or upgrading their skills. The EI program also provides special benefits to workers who take time off work while they are pregnant or caring for a newborn or adopted child, while they are sick, or for workers who need to take a short-term absence from work in order to provide care or support to a gravely ill family member facing a significant risk of death within six months, or for parents unable to work while providing care or support to a child whose life is at risk as a result of an illness or injury. Benefits are earnings-related and are subject to a maximum amount.

2.1.1. Eligibility conditions

All persons in paid employment and self-employed fishers, who contribute to the Employment Insurance (EI) program by paying premiums, are potentially eligible to receive EI regular and special benefits. All workers who have paid premiums in the past year and meet the qualifying and entitlement conditions can apply to receive EI benefits, regardless of age.

¹ Average Wages are estimated by the Centre for Tax Policy and Administration at the OECD. For more information on methodology see the latest Taxing Wages publication.

² Wage growth projections are based on [OECD Economic Outlook](#) and [EU economic forecasts](#) (for non-OECD countries).

³ The variable names ending with “_p” refer to the first adult (so-called “principal” adult) whereas those ending with “_s” are related to the spouse.

Self-employed Canadians (other than self-employed fishers) are able to opt in to the EI program on a voluntary basis to be only eligible for EI special benefits (e.g., maternity, parental, sickness, compassionate care and family caregiver for children or adults).

Contribution/employment history: entrance requirements for EI regular benefits vary with the local monthly EI unemployment rate. A minimum of 420 hours of work in their qualifying period (generally a 52-week period prior to the loss of employment) is required in areas of relatively high unemployment (over 13%) and 700 hours in areas of relatively low unemployment (6% or lower).

EI Entrance Requirements

Regional rate of unemployment (%)	Required number of insured hours of employment in the qualification period
6 and under	700
Over 6 to 7	665
Over 7 to 8	630
Over 8 to 9	595
Over 9 to 10	560
Over 10 to 11	525
Over 11 to 12	490
Over 12 to 13	455
Over 13	420

For paid employees in insurable employment, access to all EI special benefits is a flat entrance requirement of 600 hours of insurable employment in the 52-week period immediately preceding the claim or the period since the start of the previous claim. This requirement does not vary according to regional unemployment rates. Qualification for EI fishing benefits is based on earnings, as opposed to weeks or hours of work.

Behavioural requirements and related eligibility conditions:  TaxBEN assumes that the following compulsory conditions are satisfied when simulating unemployment benefits.⁴ To be eligible to receive special benefits, self-employed Canadians must

1. be registered with the Canada Employment Insurance Commission
2. have contributed to the EI program for a period of at least 12 months.

In order to qualify for special benefits, they must demonstrate that they have reduced the amount of time devoted to their business by more than 40% and have earned a minimum

⁴ Details on behavioural requirements and sanction provisions for unemployment benefits are reported in regularly updated companion reports, see [Immervoll and Knotz \(2018\)](#), [Langenbacher \(2015\)](#) and [Venn \(2011\)](#).

amount of self-employment earnings in the preceding calendar year (\$7,121 in 2018 for claims made in 2019).⁵

2.1.2. Benefit amount

Calculation base: The calculation of benefit is based on average weekly insurable earnings. Since April 7, 2013, average weekly insurable earnings are calculated from the best weeks of earnings in the qualifying period (usually 52 weeks). The number of best weeks ranges between 14 and 22 depending on the monthly regional EI unemployment rate.

Benefit amount: The replacement rate is 55% of average weekly insurable earnings. The maximum weekly EI benefit rate is CAD 562 per week based on the maximum weekly insurable earnings of CAD 1021 for 2019.

EI claimants from low-earning families with children are eligible for the EI Family Supplement, which increases the replacement rate of their earnings. In this context, low-earning is defined as net family income under CAD 25 921. Recipients can receive up to an 80% replacement rate depending on their net family income and the number and age(s) of the children (see table below). Claimants with family income below CAD 20 921 receive the full supplement available to them based on the number and age(s) of their children.

Family Supplement - rate increase
(in CAD)

Family income range	Number of children			Top-up for each additional child	Age supplement for each child under 7
	1	2	3		
Below 20 921	31.30	58.70	86.10	27.45	4.15
20 921 - 21 250	31.25	58.60	86.00	27.40	4.10
21 251 - 21 500	28.50	53.60	78.80	25.60	3.85
21 501 - 21 750	26.45	49.90	73.45	24.25	3.65
21 751 - 22 000	24.45	46.25	68.20	22.85	3.45
22 001 - 22 250	22.55	42.70	63.15	21.50	3.25
22 251 - 22 500	20.70	39.30	58.15	20.15	3.05
22 501 - 22 750	18.90	35.95	53.30	18.75	2.80
22 751 - 23 000	17.15	32.70	48.60	17.40	2.60
23 001 - 23 250	15.45	29.55	44.00	16.00	2.40
23 251 - 23 500	13.80	26.50	39.55	14.65	2.20
23 501 - 23 750	12.25	23.55	35.25	13.30	2.00

⁵ TaxBEN does not model unemployment benefits for self-employed workers. Therefore EI special benefits are not modelled.

23 751 - 24 000	10.70	20.70	31.05	11.90	1.80
24 001 - 24 250	9.25	17.95	26.95	10.55	1.60
24 251 - 24 500	7.85	15.30	23.05	9.15	1.40
24 501 - 24 750	6.55	12.75	19.20	7.80	1.20
24 751 - 25 000	5.25	10.25	15.55	6.45	1.00
25 001 - 25 250	4.00	7.90	12.00	5.05	0.75
25 251 - 25 500	2.85	5.65	8.55	3.70	0.55
25 501 - 25 750	1.75	3.45	5.25	2.30	0.35
25 751 - 25 921	0.70	1.40	2.10	0.95	0.15

Although Family Supplement recipients can receive up to an 80% replacement rate overall, the maximum weekly EI benefit rate, including the Family Supplement, is subject to the maximum of CAD 562 for 2019.

2.1.3. Benefit duration

EI regular benefits are payable for a maximum period of 45 weeks, starting after an unpaid one-week waiting period.⁶ The number of weeks of benefits to which a claimant is entitled is a function of the number of hours worked in the qualifying period and the local unemployment rate. Entitlement varies from 14 to 45 weeks.

As shown in the table below, in general, a one-percentage point increase in the regional monthly unemployment rate provides an additional entitlement of two weeks of benefits. An additional 70 hours of work adds one week of entitlement for a claimant with short employment duration (less than 1 400 hours) in the qualifying period and two weeks of entitlement to claimants with long employment duration (over 1 400 hours).

⁶ TaxBEN models income on a monthly period. Waiting periods less than one month are not modelled.

Insured Hours of Work	Regional Unemployment Rate (%)											
	6% and under	Over 6% to 7%	Over 7% to 8%	Over 8% to 9%	Over 9% to 10%	Over 10% to 11%	Over 11% to 12%	Over 12% to 13%	Over 13% to 14%	Over 14% to 15%	Over 15% to 16%	Over 16%
420-454	0	0	0	0	0	0	0	0	26	28	30	32
455-489	0	0	0	0	0	0	0	24	26	28	30	32
490-524	0	0	0	0	0	0	23	25	27	29	31	33

1820 and over	36	38	40	42	44	45	45	45	45	45	45	45

Average Canada unemployment rate is 5.8% 2018 (source: CANSIM - Tableau: 14-10-0287-01 (formerly CANSIM 282-0087) available at Statistics Canada - <http://www5.statcan.gc.ca/cansim/>). We will thus use this average to determine maximum duration (36 weeks in 2019).

Each EI special benefit is payable for a specified maximum duration. Sickness benefits are payable for up to 15 weeks family caregiver benefit for children can be paid for up to 35 weeks, family caregiver benefit for adults can be paid for up to 15 week, and compassionate care benefits can be paid for up to 26 weeks. EI maternity and parental benefits are available to across Canada except in the province of Quebec, which has its own maternity and parental benefits plan. EI maternity benefits can be paid for up to 15 weeks.

As of March 17, 2019, EI standard parental benefits can be paid for up to 40 weeks when parents share benefits (no parent can access more than 35 weeks). EI extended parental benefits can be paid for up to 69 weeks when parents share benefits (at a lower rate). No parent can access more than 61 weeks.⁷

Under the EI program, self-employed fishers are separated into two distinct qualifying periods: summer and winter fishing. Fishers who are active in both seasons can establish two claims for EI fishing benefits in a single year. All fishers who qualify for the program are entitled to up to 26 weeks of benefits per benefits period.⁸

2.1.4. Means test

The benefit is not means-tested.

⁷ TaxBEN does not model maternity or disability benefits for Canada.

⁸ TaxBEN does not model self-employment and so does not model benefits for self-employed fishers.

2.1.5. Tax treatment

Recipients of EI benefits pay income taxes on benefits received, but they are not subject to SS contributions. EI Beneficiaries whose net income exceeded CAD 66 375 in 2019 have to repay the lesser of 30% of the total regular or fishing benefits received in that taxation year or 30% of the income above that threshold. This provision does not apply to those who have not received EI regular or fishing benefits in the ten years prior to the taxation year in question. First time claimants, as well as special benefits claimants, are exempt from this repayment provision.⁹

2.1.6. Interactions with other components of the tax-benefit system

No information.

2.1.7. Combining benefit receipt and employment/starting a new job

On August 8, 2018, the previously temporary Working While on Claim (WWC) became permanent. The WWC reduces EI benefits by 50 cents for every dollar earned, up to a threshold of 90% of the weekly insurable earnings used to calculate the EI benefit amount. Earnings above this threshold are deducted dollar for dollar from EI benefits. If benefits are reduced to zero for a week, that week of entitlement is kept by the claimant for use in the benefit period.

2.2. Unemployment assistance

Employment Insurance provides a number of Employment Benefits and Support Measures (EBSMs), under Part II of the EI Act, which help unemployed workers get back to work as quickly as possible. These include:

- Long-term employment benefits available only to unemployed EI clients such as Skills Development benefits, Self-employment Assistance, Targeted Wage Subsidies and Job Creation Partnerships.
- Short-term interventions such as Employment Assistance Services which includes counselling and group services that are available to all unemployed Canadians.

These benefits are not modelled in TaxBEN.

3. Social assistance and housing benefits

3.1. Social Assistance (Ontario Works)

Variable names: [\[SA\]](#)

This is a non-contributory, means-tested and non-taxable benefit.

Social assistance provides financial assistance to cover the cost of basic living requirements, and in-kind goods and services, for an individual or family when all other financial resources have been exhausted.

⁹ TaxBEN does not model unemployment benefit histories, and so this repayment provision is not included in the model.

Social assistance (or welfare) is administered by the provinces and territories, which set their own rules and payment rates. The Province of Ontario's system for providing social assistance is used in this report.

3.1.1. Eligibility conditions

Social assistance is a “needs-tested” benefit. If the assets of an applicant's household are within allowable limits, non-exempted income is applied to the cost of basic needs. If there is a budgetary deficit, the household qualifies for social assistance. Where there is a budgetary surplus that is insufficient to cover the cost of a special need that is approved by welfare authorities, social assistance may be granted to cover the special need only. Each jurisdiction defines assets, income and needs in its social assistance legislation.

Eligible employable persons are actively encouraged to pursue, accept, and retain any reasonable offer of employment or retraining as an initial and continuing condition of eligibility for social assistance. Thus, many jurisdictions offer employment services and training opportunities in combination with financial assistance. Should a recipient choose not to pursue employment or retraining, he/she may be subject to penalties ranging from a specified reduction in benefits over a prescribed period of time to the full cancellation of benefits.

To ensure that those who successfully leave social assistance for employment are better off working, a number of provinces and territories have introduced earned income or working income supplements.

As a condition of continuing eligibility for assistance, beneficiaries must report immediately any change in the circumstances of their household that would affect their entitlement to assistance. In addition, some jurisdictions require that long-term social assistance clients be reviewed every year, and more frequently for short-term clients.

3.1.2. Benefit amount

The total payment amount consists of a basic personal allowance, a shelter allowance to assist in the payment of (total actual) housing costs and, in some jurisdictions, allowances for regularly-recurring approved special needs (e.g., diabetic food allowance).

Shelter allowances are set by provincial governments to reflect actual costs within their jurisdictions. However, in New Brunswick and Quebec, social assistance benefits are paid as a “global” benefit, and clients are responsible for apportioning the allowance to shelter and other needs as they see fit.

In Ontario, there are two major social assistance programs: Ontario Works, which provides income and employment assistance for people who are in temporary financial need; and the Ontario Disability Support program, designed to meet the unique needs of people with disabilities who are in financial need, or who want and are able to work and need support (not modelled). This section is based on the Ontario Works program.

Monthly Ontario Works rates, in CAD

Effective October 2018 (still valid 1 January 2019)
(basic allowance + maximum shelter allowance)

Family structure	Single	Couple
No children	733 (343+390)	1136 (494+642)
One child aged 0 - 17	1002 (360+642)	1191 (494+697)
Two children aged 0 - 17	1057 (360+697)	1250 (494+756)

The maximum basic needs allowance rates are based on the presence of a spouse, the number of members in the household and the number of children in the household.

In Ontario, when childcare is used, a deduction can be made on the reference income for the calculation of Social Assistance. In 2019, this deduction is set at the actual cost of licensed childcare and a maximum of \$600 per month, per child if unlicensed child care is used.

3.1.3. Benefit duration

Benefits are paid as long as there is a need, i.e., as long as household assets are within allowable limits and non-exempt income is insufficient to cover basic needs or approved special needs, and provided that all other administrative requirements are met (e.g., job search for employable clients). There are no time limits on benefit duration in Ontario.

3.1.4. Means test

Effective September 1, 2013, the earnings exemption allows for up to \$200 per month per family member of employment earnings before social assistance benefits are reduced. Employment earnings above \$200 reduce social assistance benefits at a rate of 50 percent. This earnings disregard does not take effect until a client household has been in receipt of social assistance for three full months.

3.1.5. Tax treatment

Social assistance benefits are not taxable, but must be declared on a tax filer's income tax return.

3.1.6. Interaction with other components of the tax-benefit system

Benefits are counted as income in calculating entitlement to federal and provincial child tax benefits and sales tax credits.

3.1.7. Combining benefit receipt and employment/starting a new job

Full-Time Employment Benefit (FTEB):

Up to \$500 FTEB will be provided to help participants who obtain fulltime employment (i.e., 30+ hours per week) with the costs of going to work if they have been on assistance for 3 consecutive months or more.¹⁰

¹⁰ TaxBEN does not model social assistance histories, and so the Ontario Full-Time Employment Benefit is not included in the model.

Extended Employment Health Benefit:

Current Ontario Works health benefits may be provided to participants who exit Ontario Works to employment for a transitional period of up to 6 months or until the participant receives health benefit from his/her employer with the possibility of extension for an additional 6 months in exceptional circumstances. The health benefits include items such as prescribed drugs, cost for dental services and vision items etc.

Other Employment and Employment Assistance Activities Benefit

The Other Employment and Employment Assistance Activities Benefit is available for a social assistance beneficiary (and a spouse or same-sex partner) who begins employment or a training program, changes employment or begins an employment assistance activity. The benefit provides up to CAD 253 once in every 12-month period for actual reasonable expenses.

3.2. Housing benefit

No regular housing benefit exists but social assistance includes shelter allowance (see Section 3.1).

4. Family benefits

Variable names: **[FB]**

The Canada Child Benefit is a federal universal income-tested benefit for families with children under 18 years of age.

Provinces and territories also provide a range of benefits and services for families with children. Both the federal government and the provinces and territories are involved in the provision of child care assistance through direct benefits, the personal income tax system and subsidies.

4.1. Family benefit on the federal level (Canada Child Benefit (CCB))

Variable names: **[CCB]**

This is a non-contributory benefit, means-tested and not taxable.

In July 2016, the Government of Canada replaced the Canada Child Tax Benefit (CCTB), National Child Benefit Supplement (NCBS) and the Universal Child Care Benefit (UCCB) with a new Canada Child Benefit (CCB).

The Canada Child Benefit application is used to determine eligibility for a number of related provincial and territorial child benefit and credit programs. Provincial/territorial investments are made in a number of areas, including: childcare, earnings supplements and child benefits, early childhood services, and supplementary health benefits.

4.1.1. Eligibility conditions

All families with children under the age of 18 are eligible for the CCB benefit.

To be eligible for the CCB, an individual must be a resident of Canada for tax purposes and must reside with the qualified dependant and be the parent who primarily fulfils the responsibility for the care and upbringing of the qualified dependant or be a shared-custody parent.

4.1.2. *Benefit amount*

The Canada Child Benefit (CCB) is calculated as follows:

A maximum benefit of CAD 6 496 per year (CAD 541.33 per month) for each eligible child under the age of 6 and CAD 5 481 per year (CAD 456.75 per month) for each eligible child aged 6 to 17.

The maximum benefit amount is reduced when the adjusted family net income (AFNI) is over CAD 30 450 at the following rates:

- For families with one eligible child, the reduction is 7% of the amount of AFNI between CAD 30 450 and CAD 65 975, plus 3.2% of the amount of AFNI over CAD 65 975.
- For families with two eligible children, the reduction is 13.5% of the amount of AFNI between CAD 30 450 and CAD 65 975, plus 5.7% of the amount of AFNI over CAD 65 975.
- For families with three eligible children, the reduction is 19% of the amount of AFNI between CAD 30 450 and CAD 65 975, plus 8% of the amount of AFNI over CAD 65 975.
- For families with four or more eligible children, the reduction is 23% of the amount of AFNI between CAD 30 450 and CAD 65 975, plus 9.5% of the amount of AFNI over CAD 65 975.

4.1.3. *Benefit duration*

Benefits are paid monthly over a 12-month period from July 2018 to June 2019 based on:

- the adjusted family net income from 2017
- the number of eligible children living in the family, and
- the ages of those children.

4.1.4. *Means test*

The combined adjusted net income reported by both spouses (that is, family net income adjusted by family size) is used to calculate benefit entitlements.

4.1.5. *Tax treatment*

Canada Child Benefit payments are not taxable.

4.1.6. *Interaction with other components of the tax-benefit system*

Amounts received under the new CCB will not be taxable and will not reduce benefits paid under the goods and services tax credit. They will also not be included in income for the purposes of federal income-tested programs delivered outside of the income tax system.

4.1.7. *Combining benefit receipt and employment/starting a new job*

4.2. *Family benefit on the regional level (Ontario Child Benefit (OCB))*

Variable names: [\[OCB\]](#)

This is a non-contributory benefit, means-tested and not taxable.

In its 2007 Budget, the Government of Ontario announced the creation of the Ontario Child Benefit (OCB) for low-income families.

4.2.1. Eligibility conditions

A person may qualify for the Ontario Child Benefit (OCB), if they:

- are the primary caregiver of a child under 18;
- are a resident of Ontario;
- have filed and had assessed a previous year's income tax return, and so have their spouse or common-law partner; and
- registered their child for the federal Canada Child Benefit.

The Canada Revenue Agency will automatically review eligibility the applicant's spouse/common law partner's income tax returns from the previous year are assessed and they have registered their child for the Canada Child Benefit.

If eligible, the Ontario Child Benefit is included with Canada Child Benefit monthly payments.

4.2.2. Benefit amount

From July, 2017, to June, 2018, the OCB program provided a maximum annual benefit of CAD 1 378 for each child under age 18. Beginning July 2018 the maximum payment increased to CAD 1 403 per year for each child under age 18.

Ontario Child Benefit (OCB)	2019 (annual basis)
Maximum per child <18	CAD 1 403
Level of adjusted family net income for tax purposes where benefit starts to be reduced	CAD 21 416
Reduction rate	8%

4.2.3. Benefit duration

Benefits are paid monthly over a 12-month period from July 2018 to June 2019. OCB payments are delivered with the Canada child benefit in a single monthly payment.

4.2.4. Means test

For the purposes of determining how much will be received for the Ontario Child Benefit, adjusted family net income is defined as the net income amount on line 236 of the Canada Revenue Agency personal income tax form for both the applicant and spouse/common-law partner if applicable minus any federal Universal Child Care Benefit payments.

4.2.5. Tax treatment

The benefit is not taxable.

4.2.6. *Interaction with other components of the tax-benefit system*

No information.

4.2.7. *Combining benefit receipt and employment/starting a new job*

No information.

5. Net costs of Early Childhood Education and Care

The **reference date** for the policy rules described in this section is **January 1, 2019**.

The type of childcare provided in Canada varies across the provinces and territories. The federal government works with provinces and territories to address the unique childcare needs of each region through funding supports in bilateral agreements, and a Multilateral Early Learning and Child Care Framework.

While the Government of Canada supports provinces and territories and works to help develop childcare across the country, legislative and regulatory childcare and education decisions fall largely within provincial and territorial jurisdictions. This includes legislation and policy in areas such as the compulsory school age and internal funding arrangements.

The compulsory school age for most of Canada begins at six years old, with kindergarten provision beginning either at age 5 or 4 depending on the region. While kindergarten is publicly funded across Canada, provinces and territories differ by providing either full-day or half-day kindergarten at certain ages.

5.1. *Gross childcare fees*

Variable names: `[CAcc_cost]`

Parent fees for regulated care vary within and across provinces and depend on the age of the child in care, the type of care arrangement (centre-based, family care, preschool) and the hours of care (full/part time). For children age 4 and under, the median cost of full-time child care differed by province ranging from \$152 a month in Quebec to \$677 per child in Ontario.¹¹

In the model the rules for Ontario are simulated.

5.1.1. *Discounts for part-time usage*

No information.

5.2. *Fee discounts and free provision*

Variable names: `[cc_subsidy]`

5.2.1. *Eligibility*

Families can benefit from Ontario child care subsidy for children under 12 years old (or up to 18 years old if the child has special needs) attending a licensed child care program or a

¹¹ These costs are based on the amount of money spent by parents, but do not consider income tax credits or other financial supports that can reduce out of pocket expenses.

school-aged child enrolled in an approved recreation program or a before- and after-school program operated directly by a school board.

Financial eligibility based on income test and social assistance status; parents must be working, in training, or participating in employment assistance activities, unless the child has special needs.

5.2.2. Amount of discount or free provision

The amount parents pay for child care depends on family's adjusted net income and is determined by municipalities. Full subsidy eligibility is up to family net income of up to \$20,000.

5.2.3. Variation by income

Families earning less than \$20,000 may be able to get a full subsidy, and families earning between \$20,000 and \$40,000 will pay 10% of income above \$20,000. Families earning over \$40,000 will pay \$2,000 plus 30% of their income that is over \$40,000.

5.3. Child-care benefits for formal centre-based care

Variable names: [\[cc_benefit\]](#)

In July 2016, the federal government introduced the Canada Child Benefit (CCB). The CCB replaced the Canada Child Tax Benefit (CCTB), the National Child Benefit Supplement, and the Universal Child Care Benefit with one tax-free and targeted benefit (see Section 4.1).

In Ontario, when childcare is used, a deduction can be made on the reference income for the calculation of Social Assistance. In 2016, this deduction is set at the actual cost of licensed childcare and a maximum of \$600 per month, per child if unlicensed child care is used (see Section 3.1.2).

5.4. Child care allowance for children not using child care centers

None.

5.5. Tax concessions for childcare expenditures

The Child Care Expense Deduction is a deduction in the federal tax system that could be claimed by the person supporting the eligible child under 16 years of age (**or** the person with the lower net income if more than one person is supporting the eligible child).

5.5.1. Eligibility

Child care expenses are amounts paid to have someone look after an eligible child so that person or people supporting the eligible child could:

- earn income from employment;
- carry on a business either alone or as an active partner;
- attend school under the conditions identified under Educational program; or
- carry on research or similar work, for which you or the other person received a grant.

Child care expenses could be claimed for services paid to:

- caregivers providing child care services;
 - day nursery schools and daycare centres;
 - educational institutions, for the part of the fees that relate to child care services;
 - day camps and day sports schools where the primary goal of the camp is to care for children (an institution offering a sports study program is not a sports school);
- or

boarding schools, overnight sports schools, or camps where lodging is involved.

5.5.2. Maximum amount

Annual child care expense amount that could be claimed is

- \$8,000 for each child under seven years of age at the end of the year;
- \$5,000 for each child over six years of age at the end of the year and under 16 years of age at any time during the year; or

\$5,000 for each child over 15 years of age throughout the year who has a physical or mental infirmity and is dependent on the taxpayer, or the taxpayer's spouse or common-law partner.

5.5.3. Variation by income

The annual child care expense amount for each child is determined with reference to the child's age, physical and mental condition.

A taxpayer's claim for child care expenses for a year cannot exceed two-thirds of the taxpayer's earned income for that year.

5.5.4. Impact on overall income tax calculation

The annual child care expense amounts are deducted as indicated in the maximum eligible amounts indicated in section 5.5.2.

6. In-work benefits

Variable names: **[IW]**

In 2007, the Government of Canada introduced an earned-income supplement, the Working Income Tax Benefit (WITB), to help make work pay for low- and modest-income Canadians. The 2018 federal budget introduced the Canada Workers Benefit (CWB). The CWB is an enhanced, more accessible version of the Working Income Tax Benefit for the 2019 and subsequent tax years.

A number of provinces and territories have also implemented programs, which provide earned-income supplements. In addition, all Canadian provinces offer special work-related supports to social assistance clients who are joining or re-joining the labour force. These range from coverage for special work-related expenses such as clothing, transportation and, in some jurisdictions, day care, to an actual bonus for participation in work activities.

6.1. Canada Workers Benefit (CWB)

This is a non-contributory benefit, not means-tested and not taxable.

6.1.1. Eligibility conditions

No information.

6.1.2. Benefit amount

The Canada Workers Benefit (CWB) is a refundable tax credit, which provides up to CAD 1 355 for single individuals and CAD 2 335 for couples and families with children in 2019. The benefit is phased in at a rate of 26% on working income greater than CAD 3 000.

For single individuals without children, the maximum benefit is paid if working income is between CAD 8 212 and CAD 12 820 in 2019. For single individuals, the CWB is reduced at 12% on net income greater than CAD 12 820. No CWB is paid when net income exceeds CAD 24 112.

For families, the maximum benefit is paid if working income is between CAD 11 981 and CAD 17 025 in 2019. For families, the CWB is reduced at 12% on net income greater than CAD 17 025. No CWB is paid when family net income exceeds CAD 36 484.

6.1.3. Benefit duration

Eligible individuals and families have the option to apply for CWB advance payments. The CWB advance payments correspond to a maximum of 50% of the CWB refundable tax credit (including the disability supplement, if applicable) the individual or family expect to claim on their income tax return. Any CWB that they are entitled to and did not receive as advance payments are paid when the income tax return is assessed. The Canada Workers Benefit advanced payments are generally issued on the 5th day of each quarter from April of one year to January of the next year.

6.1.4. Means test

Not means-tested.

6.1.5. Tax treatment

The benefit is not taxable.

6.1.6. Interaction with other components of the tax-benefit system

No information.

7. Social security contributions and payroll taxes (2019)

7.1. Social security contributions

7.1.1. Contributions payable by employees and benefit recipients

Pensions

All employees are eligible for coverage under the Canada Pension Plan (Québec Pension Plan in the province of Québec). For 2019, all employees are required to contribute to the Canada Pension Plan at a rate of 5.10% of income up to a maximum contribution of CAD 2 748.90 (the contribution rate is 5.55% of income for the Québec Pension Plan up to a maximum contribution of CAD 2 991.45). Income subject to contributions is earnings (wages and salaries) less a CAD 3 500 basic exemption. The maximum contribution of CAD 2 748.90 is reached at an earnings level of CAD 57 400 i.e. $(CAD\ 57\ 400 - CAD\ 3\ 500) \times 0.0510 = CAD\ 2\ 748.90$. For employees, contributions to the base component of the CPP or QPP (contribution rates of 4.95% and 5.40%, respectively) give rise to a tax credit equal to 15% of the contributed amount. The additional contributions toward the CPP and QPP enhancements (0.15% in 2019) are deductions from taxable income. Employers are also required to contribute to the Canada Pension Plan on behalf of their employees at the same rate and can deduct their contributions from taxable income (refer § 2.21).

Not modelled: Self-employed persons must also contribute to the Canada Pension Plan (Québec Pension Plan in the province of Québec) on their own behalf. However, the self-employed are required to contribute at the combined employer/employee rate of 10.2% of earnings up to a maximum of CAD 5 498 (11.10% of earnings up to a maximum of CAD 5 982.90 in Quebec). The self-employed can deduct the employer portion of their contribution from income, equal to 50% of the total contribution or CAD 2 748.90 (2 991.45 in Quebec), as well as the enhancement component of the employee portion. The remaining amount, representing the base component of the employee portion, is then claimed as a tax credit at 15%.

Sickness Benefit

The Government of Canada's Employment Insurance (EI) program offers a sickness benefit that provides up to 15 weeks of short-term income replacement. This benefit is available to eligible claimants who are unable to work because of illness, injury or quarantine to allow them time to restore their health so that they can return to work. Workers who have access to employer paid leave need to exhaust their benefits before accessing the EI sickness benefit

All provinces have provincially-administered health care insurance plans. Three provinces, Quebec, Ontario, and British Columbia, levy health insurance premiums on individuals separately from the personal income tax to help finance their health programmes.

In the case of Ontario, the premium is determined based on taxable income. Individuals who earn up to CAD 20 000 are exempt. The premium is phased in with a number of different rates to a maximum of CAD 900 for taxable income levels greater than CAD 200 600. The following table provides further details on the structure that is applicable in 2019.

The Ontario Health Premium:

Taxable Income	Fixed Component (CAD)	Variable Component
0 to CAD 20 000	0	
CAD 20 000 to CAD 25 000	0	6% of the taxable income in excess of CAD 20 000
CAD 25 000 to CAD 36 000	300	
CAD 36 000 to CAD 38 500	300	6% of the taxable income in excess of CAD 36 000
CAD 38 500 to CAD 48 000	450	
CAD 48 000 to CAD 48 600	450	25% of the taxable income in excess of CAD 48 000
CAD 48 600 to CAD 72 000	600	
CAD 72 000 to CAD 72 600	600	25% of the amount of taxable income in excess of CAD 72 600
CAD 72 600 to CAD 200 000	750	
CAD 200 000 to CAD 200 600	750	25% of the amount of taxable income in excess of CAD 200 000
Over CAD 200 600	900	

Unemployment

In general, all employees are eligible for Employment Insurance. Eligibility to receive benefits is determined by insurable hours worked (with a minimum entry threshold of 420 to 700 hours, depending on region and the unemployment rate at the time the claim for benefits starts). For 2019, employees outside Quebec are required to contribute at the rate of 1.62% of insurable earnings. Insurable earnings are earnings (wages and salaries) up to a maximum of CAD 53 100 per year. The maximum employee contribution is therefore CAD 860.22 per year. Employment insurance contributions give rise to a tax credit equal to 15% of the amount contributed. Employers are also required to contribute to the plan.

Quebec residents contribute to Employment Insurance at a rate of 1.25%; the same earnings ceiling applies. They also contribute to the Quebec Parental Insurance Plan at a rate of 0.526% of insurable earnings; maximum insurance earnings for 2019 are CAD 76 500. For a Quebec resident, the maximum employee contribution (Employment Insurance plus Quebec Parental Insurance Plan) is CAD 1 066.14.

7.1.2. Contributions payable by employers

Pensions

Employers are required to contribute to the Canada Pension Plan on behalf of their employees an amount equal to their employees' contributions. Thus, employers also contribute at the rate of 5.10% of earnings (less the CAD 3 500 earnings exemption) to a maximum of CAD 2 748.90. For the Quebec Pension Plan, the contribution rate is 5.55% of earnings, to a maximum of CAD 2 991.45.

Sickness Benefit

The Government of Canada's Employment Insurance (EI) program offers a sickness benefit that provides up to 15 weeks of short-term income replacement. The EI program also encourages the delivery of sickness benefits by private sector employers. Employers who provide short-term disability plan coverage to their employees may be eligible to receive a reduction in their EI premiums through the EI Premium Reduction Program (PRP). The objective of the PRP is to encourage employers to continue to offer their short-term disability plan and assume the risk of the first-payer position when employees became sick. The PRP provides participating employers a premium reduction which recognizes the savings to the EI program resulting from workers using employer benefits for short-term sickness leave rather than accessing EI sickness benefits.

All provinces have provincially-administered health care insurance plans. Three provinces levy a special tax on employer payrolls to finance health services (Québec and Ontario) or health services and education (Manitoba). These payroll taxes are deductible from the employer's income subject to tax. In the case of the province of Ontario, employers pay a Employer Health Tax on the value of their payroll, tax rates varying from 0.98% on Ontario payroll less than CAD 200 000, up to 1.95% for payroll that exceeds CAD 400 000. Certain employers are eligible for a higher exemption of CAD 450 000.

Unemployment

Employers are required to contribute to the employment insurance scheme. The general employer contribution is 1.4 times the employee contribution, that is, 2.27% of insurable earnings (outside Quebec). Premiums are adjusted for employers who provide sick pay superior to payments provided under the employment insurance regime. All employment insurance contributions are deductible from the employer's income subject to tax.

Work injury

There is no national work injury benefit plan administered by the federal government. However, employers are required to contribute to a provincial workers' compensation plan which pays benefits to workers (or their families in case of death) for work-related illness or injury. The employer contribution rates, which vary by industry and province, are related to industry experience of work-related illness and injury. Premiums are deductible from the employer's income subject to tax. In the case of Ontario, employers broadly corresponding to industry Sectors B-N inclusive pay, on average, 2.79% of the wages paid to each employee to a maximum of CAD 88 500.

7.2. Payroll taxes

None.

8. Taxes (2019)

Variable names: **[IT]**

The federal personal income tax system in Canada is progressive, meaning that tax rates rise as taxable income rises. It also includes many deductions, exemptions, and tax credits (both refundable, i.e., non-wastable, and non-refundable i.e., wastable) which serve to reduce taxes payable.

Provinces and territories also set their own tax on personal income.

The federal personal income tax system considers personal income in two ways: it taxes personal income on an individual basis (i.e. individuals pay income tax on their own income); whereas it pays benefits to people based on family income (i.e. family benefits are calculated based on the income of both spouses).

8.1. Federal personal income tax

8.1.1. Tax allowances

8.1.2. Tax base

8.1.3. Income tax schedule (central government income tax)

Variable names: [\[F_INCTAX_s\]](#); [\[F_INCTAX_p\]](#)

2019 Federal Income Tax Rates:

Taxable Income (CAD)	Rate (%)
0 – 47 630	15
47 630 – 95 259	20.5
95 259 – 147 667	26
147 667 - 210 371	29
210 371 and over	33

8.1.4. Tax credits

Variable names: [\[...\]](#)

- *Basic personal amount:* All taxpayers qualify for a basic personal tax credit of CAD 1 810.35 in 2019.
- *Credit for Spouse or Eligible Dependant:* A taxpayer supporting a spouse or other eligible dependant receives a tax credit of CAD 1 810.35 which is reduced by 15 cents for each dollar of the dependant's income.
- The *Goods and Services Tax Credit* provides a relief of CAD 290 for each adult 19 years of age or older and CAD 153 for each dependent child under the age of 19. Single tax filers without children and with an employment income higher than CAD 9 412 receive an additional CAD 153 that is phased in at a rate of 2%. Single tax filers with children receive an additional CAD 153 that is not subject to phase-in. The credit received for the first dependent child of a single parent is also increased from CAD 153 to CAD 290. The total amount is reduced at a rate of five percent of net family income over CAD 37 789. The amount is paid directly to families.¹²

¹² The payments that relate to the 2018 tax year are payable between July 2019 and June 2020.

- *Social security contributions:* Taxpayers are entitled to claim 15% of their contributions to the Canada or Quebec Pension Plans (to a maximum credit of CAD 2 748.90 for the Canada Pension Plan and to a maximum credit of CAD 2 991.45 for the Quebec Pension Plan) and their Employment Insurance premiums (to a maximum credit of CAD 860.22 outside Quebec. The Employment Insurance premium rate is lower for Quebec residents, who also pay into the Quebec Parental Insurance Plan; the maximum combined credit for a Quebec resident is CAD 1 066.14).
- *Canada Workers Benefit (CWB), formerly the Working Income Tax Benefit:* The CWB provides a non-wastable tax credit equal to 26% of each dollar of earned income in excess of CAD 3 000 to a maximum credit of CAD 1 355 for single individuals without dependents and CAD 2 335 for families (couples and single parents). The credit is reduced by 12% of net family income in excess of CAD 12 820 for single individuals and CAD 17 025 for families. This is the default national design; provinces may choose to propose jurisdiction-specific changes to this design, subject to certain principles.
- *Canada Employment Tax Credit:* A tax credit of up to CAD 183.30 on employment income.
- *Child care expenses:* A portion of child care expenses is deductible if incurred for the purpose of earning business or employment income, studying or taking an occupational training course or carrying on research for which a grant is received. The lower-income spouse must generally claim the deduction. The amount of the deduction is limited to the least of:
 1. the expenses incurred for the care of a child;
 2. two-thirds of the taxpayer's earned income; and
 3. CAD 8 000 for each child who is under age seven, and CAD 5 000 per child between seven and sixteen years of age. The amount for a disabled child under seventeen is CAD 11 000.

8.2. State and local income taxes

Variable names: [LOCTAX_s; LOCTAX_p]

All provinces and territories levy their own personal income taxes. All, with the exception of Quebec, have a tax collection agreement with the federal government, and thus use the federal definition of taxable income. They are free to determine their own tax brackets, rates and credits. Quebec collects its own personal income tax and is free to determine all of the tax parameters, including taxable income. In practice, its definition of taxable income is similar to the federal definition.

TaxBEN assumes the worker lives in Ontario, the most populous of the 10 provinces and 3 territories. The main features of the Ontario tax system relevant to this report are summarised below.

8.2.1. Tax allowances

No information.

8.2.2. Tax base

No information.

8.2.3. Tax Schedule

Income Bracket	Rate (%)
CAD 0 to CAD 43 906	5.05
CAD 43 907 to CAD 87 813	9.15
CAD 87 813 to CAD 150 000	11.16
CAD 150 000 to CAD 220 000	12.16
Over CAD 220 000	13.16

Provincial tax after accounting for wastable credits	Surtax rate
Amounts Exceeding CAD 4 740	20% of the excess amount
Amounts Exceeding CAD 6 067	36% of the excess amount

8.2.4. Tax credits

Wastable tax credits

- A basic tax credit of CAD 534.39.
- A maximum credit of CAD 454.08 for a dependant spouse or eligible dependant that is withdrawn as the income of the spouse or eligible dependant exceeds CAD 898 and is completely withdrawn when the income of the spouse is at least CAD 9 883.
- 5.05% of contributions made to the Canada Pension Plan and of Employment Insurance premiums.

Non-wastable tax credits

- Ontario has a Sales Tax Credit that provides a relief of up to CAD 301 for each adult and each child. It is reduced by 4% of adjusted family net income over CAD 23 156 for single people and over CAD 28 944 for families. Families are paid the amount directly.
- Ontario also offers an Energy and property tax credit (OEPTC). This credit is available to renters and, in 2019, provides a maximum of \$1 065 for non-seniors. Of this, \$237 is for the energy component and \$828 is for the property tax component (in addition to a base amount of 59 CAD). Seniors are eligible for an additional \$148, providing a total of \$1 213. For the computation of the credit, TaxBEN assumes that property taxes are 20% of a household's rent.

Tax Reduction

- An earner is entitled to claim a tax reduction where the initial entitlement is equal to CAD 244 plus CAD 452 for each dependent child under the age of 19. Where someone has a spouse, only the spouse with the higher net income can claim the dependent child tax reduction. If this amount is greater or equal to the liable provincial tax, then no tax is due. If the amount is less than the liable tax, then the actual tax reduction is equal to twice the initial entitlement amount less the liable tax (if this calculation is zero or negative, the reduction is equal to zero).

Ontario LIFT Credit

- Effective January 1, 2019, Ontario tax filers who have employment income will be able to claim the Low-income Individuals and Families Tax (LIFT) Credit when they file their 2019 tax returns. The credit will be equal to the lesser of CAD 850 and 5.05% of employment income. This amount is reduced by 10% of the greater of adjusted individual net income in excess of CAD 30,000 and adjusted family net income in excess of CAD 60,000. The resulting amount is limited to the taxpayer's personal income tax otherwise payable, excluding the Ontario Health Premium.

9. Selected output from the OECD tax-benefit model (TaxBEN)

This section shows selected output of the TaxBEN model for Canada in 2019 (see figure below). TaxBEN by default produces the following output: 1) net household incomes (**black line**) and 2) related income components (**coloured stacked areas**) for selected family and individual circumstances (users are free to select many of these circumstances). The model and the related web calculator is accessible from the [project website](#). The figure below shows output for a two-adult family with two children (adults are both 40 years old whereas children are 4 and 6 years old respectively) and four different scenarios:

- By percentage of the average wage (**Panel A**);
- By unemployment duration (in months) for a jobseeker claiming unemployment benefits (**Panel B**);
- By previous gross earnings levels for a jobseeker claiming unemployment benefits (**Panel C**);
- By previous employment record (in months), for a jobseeker claiming unemployment benefits (**Panel D**).

The stacked areas show the following household income components: **GROSS** = gross earnings; **UB** = unemployment benefits; **SA** = social assistance / guaranteed minimum income benefits; **HB** = housing benefits; **FB** = family benefits; **IW** = in-work benefits; **SSC** = social security contributions; **IT** = income tax. Note that these components may be the result of the aggregation of more than one benefit/tax into a composite category. Please refer to the sections above for the benefits/taxes included in each category.

Social assistance and housing benefit supplements are assumed to be available in all the four scenarios provided that the necessary income and eligibility requirements are met. Where receipt of social assistance or other benefits is subject to activity tests (such as active job-search or being available for work), these requirements are assumed to be met.

Panel A assumes that one adult family member (the so-called 'second adult' using the TaxBEN terminology) is out of work and not eligible for unemployment benefits (e.g.

because they have expired) whereas the other adult member (the so-called ‘first adult’) is employed full-time throughout the entire year at different earnings levels ranging between 0 and 200% of the average wage (AW). When earnings of the first adult are precisely 0% of the AW this person is assumed to be out of work without receiving unemployment benefits (again, e.g. because they have expired) but claiming social assistance or guaranteed minimum income benefits, as applicable.

Panels B to D assume that the second adult is out of work and not eligible to unemployment benefits whereas the first adult is also out of work and claiming unemployment benefits. In Panel B and C the first adult is assumed to have a ‘long’ employment record of 264 consecutive months before the job loss. The x-axis in Panel B measures the time of benefit receipt, starting from the first month. The x-axis in Panel C shows the amount of previous gross earnings (before any social contribution payments). Results in Panels C and D refer to the 2nd month of unemployment benefit receipt. In Panel B and D, previous earnings are assumed to be equal to the average wage.

Figure 9.1. Selected output from the OECD tax-benefit model

Couple with two children

Source: Calculations based on the OECD tax-benefit model.

Annex: Other benefits and direct taxes

This section provides a brief description of other cash benefits and taxes on employment incomes in Canada that are relevant for some members of the population below the statutory retirement age, but which are not included in the OECD tax-benefit model.

Ontario Disability Support Program (ODSP)

The Ontario Disability Support Program (ODSP) is designed to meet the unique needs of people with disabilities who are in financial need, or who want and are able to work and need support.

Family structure	Single	Couple (1 spouse disabled)	Couple (Both spouses disabled)
No children	1169 (672+497)	1750 (969+781)	2122 (1341+781)
One child aged 0 - 17	1596 (815+781)	1815 (969+846)	2187 (1341+846)
Two children aged 0 - 17	1661 (815+846)	1887 (969+918)	2245 (1341+904)

Employment earnings above \$200 reduce ODSP benefits at a rate of 50 percent. ODSP provides a disability related employment expense deduction up to a maximum of \$1,000 per month.

Canadian Benefit for Parents of Young Victims of Crime (PYVC)

In September 2018, the Government of Canada announced changes to the “Canadian Benefit for Parents of Young Victims of Crime (PYVC) which replaced the Federal Income Support for Parents of Murdered or Missing Children grant. This initiative provides a taxable payment of \$450 per week to parents of children under the age of 25 who are missing or are deceased as a result of a probable Criminal Code offence, for a period of up to 35 weeks.

Child Disability Benefit (CDB)

The child disability benefit (CDB) is a monthly benefit included in the CCB to provide financial assistance to qualified families caring for children who have a severe and prolonged impairment in physical or mental functions. Families with children under 18 years of age who qualify for the disability tax credit (DTC) are eligible to receive a CDB.

For the 2018-2019 payment year, the CDB provides up to CAD 2 771 per year (230.91 per month) for each child eligible for the DTC. The CDB is reduced when adjusted family net income (AFNI) is more than CAD 65 975. The reduction is calculated as follows:

- For families with one child eligible for the DTC, the reduction is 3.2% of the amount of AFNI over CAD 65 975.
- For families with two or more children eligible for the DTC, the reduction is 5.7% of the amount of AFNI over CAD 65 975.

Canada Caregiver Credit

The Canada caregiver credit (CCC) is a non-refundable tax credit available to individuals with dependants who have a physical or mental impairment. The claim amount depends on the relationship to the dependent, the individual's circumstances, the dependent's net income, and whether other credits are being claimed for the dependent. Subject to these conditions, in 2019, individuals could claim a maximum of \$6,986 if the dependent's, for those dependents aged 18 or older with a net income less than \$23,391.

Canada Workers Benefit disability supplement

The CWB includes a supplement equal to 26% of each dollar of earned income over CAD 1 150, to a maximum credit of CAD 700, for persons with disabilities in 2019. For single individuals, the WITB disability supplement is reduced at 12% on net income greater than CAD 24 111. For families, the WITB disability supplement is reduced at 12% on net income greater than CAD 36 483.
