Comparable and transparent

Assessment of individual and collective progress towards 2° goal

Environmental integrity of the regime

Framing commitments

- Underpinning targets
- Contribution to and conditions
- Carbon leakage, financial support needed

What level of 'homogeneity' would be necessary?

Framing progress towards the targets

- Credibility of the MR assessment
- 'Standardized' enforcement
- Vector for enforcement at multilateral level

Could accounting rules play a positive role in framing 'unilateral enforcement measures'?
