May 2019

Executive Summary

Introduction

At the 2016 G20 Hangzhou Summit, the G20 Leaders adopted a declaration “*stressing the importance of quality infrastructure investment, which aims to ensure economic efficiency in view of life-cycle cost, safety, resilience against natural disaster, job creation, capacity building, and transfer of expertise and know-how on mutually agreed terms and conditions, while addressing social and environmental impacts and aligning with economic and development strategies*”.

In 2018, the G20’s Infrastructure Working Group (IWG) identified the key elements for infrastructure growth in the “Roadmap to Infrastructure as an Asset Class”. The Roadmap is organised under three overarching pillars and seven work-streams. Quality Infrastructure is one of the key work-streams identified under the second pillar - improving the investment environment for infrastructure. In line with this objective, in 2019 the IWG has sought to develop Principles for Quality Infrastructure Investment (QII) in six categories, as follows:

Principle 1	Maximizing the positive impact of infrastructure to achieve sustainable growth and development
Principle 2	Raising economic efficiency in view of life-cycle cost
Principle 3	Integrating environmental considerations in infrastructure investments
Principle 4	Building resilience against natural disasters and other risks
Principle 5	Integrating social considerations in infrastructure investment
Principle 6	Strengthening infrastructure governance

Against this background, the G20 IWG has asked the Global Infrastructure Hub (GI Hub) to prepare an online database (the Database) of ‘resources’¹ and ‘facilities’² relating to QII. This work has been undertaken in conjunction with the Organisation for Economic

Cooperation and Development (OECD) and the World Bank Group (World Bank).

Throughout May 2019, the detailed QII Principles were developed by the IWG and the number of Principles increased from five to six. The GI Hub has updated the Database to reflect the IWG’s agreed position and will continue to reflect any changes required by the G20.

About the QII Database

The Japanese Presidency of the G20 has asked for the creation of a QII Database, to provide a one-stop reference to existing resources for policymakers, project agencies and the private sector to plan and implement quality infrastructure investments. The Database will be a dynamic reference tool for governments and practitioners involved in infrastructure planning and delivery. It is built on a review and classification of existing resources and facilities across the six identified categories of QII Principles.

The Database builds on an assessment of 466 materials, covering both resources and facilities, which are intended to guide stakeholders in planning and executing quality infrastructure investments. Apart from the classification of the materials under the six categories of QII Principles and various sub-categories, the Database also captures other salient aspects of the materials, including key objectives, year of publishing (for resources) / establishment (for facilities), geographic scope, sectoral focus, and policy area. The database content is organised under facilities and resources, as described below:

- **Resources:** Under this grouping, 343 resources have been identified, under the headings of *framework/toolkits* (16%), *reference guides* (19%), *study reports* (13%), *websites, data and analysis* (20%), *publications, academic papers, and others* (32%).
- **Facilities:** Under this grouping, 123 facilities have been identified, of which at least 50% provide multiple forms of support, including guarantees and technical assistance, project preparation, and investment support. Around 48% of the facilities identified provide project preparation assistance of

¹ For the purpose of this Database, a “resource” refers to guidance materials, toolkits, study reports and other knowledge products pertaining to Quality Infrastructure Investment.

² For the purpose of this Database, a “facility” refers to a program or ‘window’ offering financial support (in the forms of grants, equity investments, debt investments or project preparation support) pertaining to QII.

some form. The facilities are mainly managed by multilateral development banks (MDBs), national and sub-sovereign governments.

The compilation of the database under these two groupings follows a review of the *G20/OECD/World Bank 2018 Stocktake of Tools and Instruments related to Infrastructure as an Asset Class*, plus the GI Hub's own database of resources and facilities, along with submissions to the GI Hub's structured questionnaire by individual G20 countries, MDBs and other international organisations. In addition, these inputs have been supplemented by independent secondary research undertaken by the GI Hub. Following this mapping and compilation of information, the strategic fit of these resources and facilities to each of the six categories of QII Principles was identified.

Attached as Annex 1 is an instruction guide on using the online Database. The lists of resources and facilities, which can be found in Annexes 2 and 3, are organised by the name of the organisation(s) which has/have produced the resource or facility. It should be noted that the lists in Annexes 2 and 3 do not contain links to the resources and facilities, but these links are provided in the online version of the Database. Annex 4 is a sample of the template used to collect data from the contributing organisations. This template in Annex 4 refers to the original five draft principles, and GI Hub has since updated the Database to incorporate the sixth principle (now QII Principle 1) that was added as a result of the subsequent IWG agreement.

Annex 1 – How to Use the Database

The Database is intended to serve as a single-stop point of guidance for policymakers, practitioners, investors, citizens and project companies to access reference materials and resources for ensuring quality in infrastructure planning and delivery. The Database sets out: (i) master lists of resources and facilities supporting QII; (ii) the geographic scope of the resources and facilities; (iii) the sectoral focus and policy areas addressed by the resources and facilities; and (iv) additional information on the objectives of the resources and facilities. It is envisaged that the Database will be a dynamic knowledge product, which will be refined and updated on an ongoing basis.

The Database is structured to assist stakeholders in project planning and preparation by providing specific guidance materials and information on facilities for delivering quality infrastructure investment. For example, a project preparation agency based in a developing economy may wish to employ the latest practices in improving the economic efficiency of projects (which falls under Principle 2 of the QII), using resources developed by MDBs or by the governments of advanced economies. In such cases, policymakers may select all the resources associated with QII Principle 2. Policymakers may also select specific sub-categories under each principle for more targeted search results. Similar selections can be made in respect of the listed facilities.

A sample image of the **draft** version of the online database is provided below:

The screenshot displays the homepage of the Quality Infrastructure Investment Database. At the top, there is a navigation menu with links for 'About us', 'Countries', 'Sectors', 'Knowledge Resources', 'News & Events', and 'Infrastructure tools', along with a search icon. Logos for G20 2019 JAPAN, OECD, THE WORLD BANK, and Global Infrastructure Hub are visible. The main heading is 'Quality Infrastructure Investment Database'. Below this, a paragraph states: 'The Quality Infrastructure Investment Database is an initiative of the G20 under the 2019 Japanese Presidency, in collaboration with the Global Infrastructure Hub, the OECD and the World Bank.' Another paragraph describes the database's scope: 'The database includes resources and facilities relevant to Quality Infrastructure Investment under the principles of Sustainable Growth & Development, Economic Efficiency, Environmental Considerations, Building Resilience, Social Considerations, and Infrastructure Governance.' A red note reads: 'NOTE: THIS DRAFT VERSION OF THE DATABASE IS SUBJECT TO DISCUSSION BY THE INFRASTRUCTURE WORKING GROUP.' A search bar contains the text 'Search the Quality Infrastructure Investment Database'. On the left, a 'Filter By' sidebar lists categories: 'GI Hub Resources', 'Sector', 'Country', 'Region', 'Quality Infrastructure', 'Infrastructure Driver', and 'Resource Type'. The main content area shows '475 results found' with a 'Share' button and a 'SORT BY: Relevance' dropdown. The first result is titled 'Improving infrastructure delivery: project initiation routemap' and includes a brief description: 'To achieve more efficient outcomes and address the high cost of delivering infrastructure in the UK it is necessary for both public and private sector clients to ensure their capability aligns with the challenges they face and to optimise their approach to engaging their supply chains.' Below the title are links for 'Project Initiation Routemap', 'View Data Resource', and 'Download the document [PDF]'.

Annex 4 – Sample response to GI Hub’s Request for Information

ANNEX A: QUALITY INFRASTRUCTURE INVESTMENT RESOURCE TEMPLATE

Title of the Resource	Public Investment Management Assessment (PIMA)
Name of the Organisation Publishing the Resource	IMF
Author(s) Name(s) (last name, first initial)	
Type (select one option)	<input type="checkbox"/> academic paper <input type="checkbox"/> website <input type="checkbox"/> reference guide <input type="checkbox"/> data <input type="checkbox"/> report <input type="checkbox"/> analysis <input checked="" type="checkbox"/> framework/toolkit <input type="checkbox"/> other knowledge product <input type="checkbox"/> case study
URL	https://www.imf.org/external/np/fad/publicinvestment/
Publication Date (yyyy.mm.dd)	2015.05.01 2018.05.10
Geographic Scope	<input checked="" type="checkbox"/> Global <input type="checkbox"/> Africa <input type="checkbox"/> Americas <input type="checkbox"/> Asia <input type="checkbox"/> Europe <input type="checkbox"/> Oceania <input type="checkbox"/> or country (.....)
Sector Focus (select one)	<input checked="" type="checkbox"/> all sectors <input type="checkbox"/> information and communications <input type="checkbox"/> energy <input type="checkbox"/> water, waste and sanitation <input type="checkbox"/> transport <input type="checkbox"/> other sector (.....) <input type="checkbox"/> social infrastructure
Policy Area Focus (select one)	<input checked="" type="checkbox"/> governance <input type="checkbox"/> project delivery <input type="checkbox"/> planning and project preparation <input type="checkbox"/> regulatory <input type="checkbox"/> procurement <input type="checkbox"/> no specified policy area
QII Principle (select as many as may be appropriate) Note: For guidance regarding the selection, see the Draft QII Principles and Table 1, below.	<input type="checkbox"/> Principle 1: Raising Economic Efficiency in View of Life-Cycle Cost <input type="checkbox"/> Principle 2: Integrating Environmental Considerations in Infrastructure Investments <input type="checkbox"/> Principle 3: Building Resilience against Natural Disasters and Other Risks <input type="checkbox"/> Principle 4: Integrating Social Considerations in Infrastructure Investment <input checked="" type="checkbox"/> Principle 5: Strengthening Infrastructure Governance

<p>Abstract, including a description of the link to QII (maximum of approx. 100 words)</p>	<ul style="list-style-type: none"> • QII requires strong infrastructure governance (IG). Public Investment Management Assessment (PIMA) is a comprehensive assessment framework developed by the IMF to help countries strengthen IG. • The PIMA framework assesses 15 key institutions that are involved in the three major stages of the public investment cycle: planning, allocation and implementation. • Each PIMA assessment report includes an overview of strengths and weaknesses of a country's IG, comparisons with peer countries, and a sequenced action plan to strengthen IG. A number of PIMA country reports have been published on the IMF website.
