

Country case: The Transparency Portal of the Federal Public Administration in Brazil

Description

www.portaldatransparencia.gov.br was created in November 2004 in Brazil to provide free real-time access to information on budget execution, as a basis to support direct monitoring of federal government programmes, including procurement spending by citizens. Access to the Transparency Portal is available without registration or password. Data are automatically extracted and published on the portal from existing information systems of the federal public administration, removing the need for any specific actions by federal public organisations to publish information.

Public Procurement
Principle: **Transparency,
E-procurement**

Procurement Stage:
All phases

Audience: **Policy Maker,
Procuring Entity, Private
Sector, Civil Society**

Since May 2010, revenue and expenditure data available through the Transparency Portal are updated daily. Citizen use of the portal has grown since its launch from approximately 700,000 hits per month to approximately 2.3 million hits per month, with the number of users growing from approximately 10,000 per month to 230,000 per month.

The Transparency Portal has received recognition internationally. For example, in 2008 the Transparency Portal was recognised as one of the good practices for transparency and the fight against corruption at the 2nd Conference of State Parties to the United Nations Convention Against Corruption.
