Advisor to the Chairman of the Management Board of Groupe BPCE, in charge of Public Affairs

Nicolas Duhamel served as a general auditor (Inspecteur des finances) in the French Ministry of the Economy and Finance until 1984. He then accepted positions of responsibility in a number of companies; he was head of the Finance Department of France Telecom from 1984 to 1988, Chief Financial Officer of the Havas Group (a CAC 40-listed company) from 1993 to 1998, and Deputy Chief Executive Officer of Vivendi Universal until 2001. In 2002, he was appointed Executive Vice President and Chief Financial Officer of the La Poste with a seat on the group's Executive Committee. Nicolas Duhamel then joined Groupe BPCE upon its creation in 2009 as a member of the BPCE Management Board responsible for Finance. Since December 2012, he has served as an Advisor to the Chairman of the Management Board, in charge of Public Affairs.

**Fabian Barsky**

Advisor, Financial Systems Development, GIZ

Fabian Barsky is a development economist with particular focus on Financial Systems Development. He holds a Master's degree in International Economics from Georg-August University in Göttingen, Germany. During his studies he has conducted research in Puebla, Mexico and in Stellenbosch, South Africa. In his professional career he held various positions in Europe, Latin America and Sub-Saharan Africa, both in the development sector and in the private sector. At present he works as advisor in the competence centre Financial Systems Development in GIZ headquarters where he is focusing on Credit Information Sharing Systems and Green Finance in emerging and developing economies.

**Cristina Martinez**

Senior Policy Analyst, OECD LEED

Dr. Cristina Martinez-Fernandez is a Senior Policy Analyst at the OECD's Local Economic and Employment Development (LEED) Programme. She works on issues related to skills and training systems for SMEs, entrepreneurial and innovation activities, industrial policy, climate change and the transformation of labour markets into the low-carbon economy, and the challenges of demographic change and an ageing society for skills and employment development. Cristina also manages the OECD LEED Initiative on Employment and Skills Strategies in Southeast Asia (ESSSA). Before joining the OECD she was an Associate Professor at the Urban Research Centre, University of Western Sydney, Australia where she led the Urban and Regional Dynamics Program. The Program analysed industry change, urban performance and socio-economic development within the frameworks of innovation, globalisation and the knowledge economy.

**GROUP 3: How to mobilise investment in the transport sector?**

**Stephen Perkins**

Head of Research, International Transport Forum

Stephen Perkins is the Head of the Joint Transport Research Centre of the OECD and the International Transport Forum. The Joint Research Centre undertakes economic research in support of transport policy development. Its work underpins the activities of the Forum and facilitates policy dialogue and exchange of experience for transport research institutes and transport ministries. The Centre works on all transport modes and most aspects of transport economics including regulation, competition, investment, pricing and taxation, safety, security, congestion and environmental protection. Stephen's previous experience includes energy industry restructuring and regulation at the International Energy Agency, work on economic regulation for a major gas utility and consultancy on energy policy and environmental issues for government and industry.

**Andreas Schäfer**

Professor, Energy and Transport, University College London

Andreas W. Schäfer is a Professor of Energy and Transport. Prior to this position, he held appointments at the International Institute for Applied Systems Analysis (IIASA), the Massachusetts Institute of Technology (MIT), the University of Cambridge, and Stanford University. He holds an MSc in Aerospace Engineering and a PhD in Energy Economics, both from the University of Stuttgart, Germany. He is lead author of "Transportation in a Climate-Constrained World" (MIT Press, 2009).

**Per Kågeson**

Professor, Environment System Analysis, Centre for Transport Studies of the Royal Institute of Technology, Stockholm, Sweden

Per Kågeson holds a Ph.D. in Environment and Energy System Analysis from the University of Lund, Sweden and is the author of more than 30 books and numerous reports and papers. He is director of Nature Associates, a small private consultancy in Stockholm, and specialised on the cost-efficiency of measures and policies for improving the environmental performance of transport. He is also professor (part-time) in Environment System Analysis at the Centre for Transport Studies of the Royal Institute of Technology in Stockholm, Sweden.

**John Farrow**

Chairman, LEA Group Holdings Inc.

John Farrow is Chair of LEA Group Holdings Ltd, an international transportation, urban planning and management consulting company with over 1400 employees worldwide. Previously he was Canadian Managing Partner for The Coopers & Lybrand Consulting Group, and CEO of the Canadian Urban Institute. He is an expert in city management and urban policy. He has undertaken projects on regional planning, city management, and infrastructure investment in 10 countries, many of which were in India. He has also worked extensively for the private sector including Honda, General Motors, Spar Aerospace, the Bank of Montreal and Bentall Capital. He currently serves on the Board of the Canadian Urban Institute and recently retired from the Board of the West Northamptonshire Development Corporation in the UK.

**Simon Wilde**

Senior Managing Director, Power, Utilities & Renewables, Macquarie Capital, London

Simon Wilde is Senior Managing Director, Power, Utilities & Renewables at Macquarie Capital, London. Simon has 21 years of advisory experience in power and utilities having worked in the sector since joining the banking industry in 1992. He has acted on behalf of most of Europe's major utilities such as Centrica, EDP, Endesa/Enel, E.ON, GDF Suez, Iberdrola, National Grid and Vattenfall, as well as for governments in Western and Eastern Europe. In recent years, Simon has increasingly facilitated investments of Asian and financial investors into the sector such as AMP, CKI, Macquarie, MEAG and Tokyo Gas. Simon was previously Head of Power & Utilities at RBS / ABN AMRO and prior to that, gained experience at J.P. Morgan, Credit Suisse and Creditanstalt.

**Kurt van Dender**

Head of the Tax and Environment Unit, OECD

Kurt Van Dender is Head of the Tax and Environment Unit of the OECD's Centre for Tax Policy and Administration. Previously, he was Chief Economist at the International Transport Forum at the OECD and Associate Professor of Economics at the University of California, Irvine, USA. He has published widely on congestion management, energy use and pollution control in surface and air transport. Recent work has focused on productivity and growth effects of transport policy reform and public investment, as well as on energy taxation. Kurt holds a Ph.D. in economics from the University Leuven, Belgium.

**Nils-Axel Braathen**

Principal Administrator

Nils Axel Braathen is a principal administrator in the Environmental Performance and Information Division of OECD's Environment Directorate, working on assessments of environmental policies. He has in particular worked on environmental taxation, transport and environment issues, valuation of environmental externalities and effective carbon prices. Prior to joining OECD in 1996, Braathen was deputy director general in the Ministry of Finance in Norway.

15:00 – 16:00

**PLENARY SESSION: CONCLUSIONS**

**Simon Upton**

Director, Environment Directorate, OECD

Simon Upton is the Environment Director at the Organisation for Economic Co-operation and Development (OECD). The Environment Directorate is responsible for *Environmental Performance Reviews* of Member Countries, the economic analysis of policy instruments used to improve environmental outcomes and a wide range of work related to water, biodiversity, climate and chemicals. The team he leads recently released the Environmental Outlook to 2050 – a model-based analysis of the environmental consequences of business-as-usual growth at the global level. Mr. Upton played a key role in the development of the OECD's *Green Growth Strategy*.
