

FOURTH AD-HOC TECHNICAL WORKSHOP ON CIRCLE: AIR POLLUTION

Tuesday 24 May 2016

Stockholm, Sweden

Hosted by the Swedish EPA, organised jointly by OECD and Stockholm Environment Institute

Updated annotated agenda

8:30 – 9:00 *Coffee*

9:00 **Opening**

Chair: Martin Eriksson (Swedish EPA)

This session first introduces the CIRCLE project and provides the general background for this workshop.

 ***Introduction and background on CIRCLE***

Speaker: Shardul Agrawala (OECD)

 ***Air pollution emissions and their impacts***

Speaker: Charlie Heaps (SEI)

10:15 *Coffee break*

10:45 **Session 1: The costs of inaction on air pollution**

Chair: Mike Holland (EMRC)

This session aims to provide detailed discussions of the costs of inaction on air pollution.

 ***The concentrations of air pollutants***

Speaker: Rita van Dingenen (EC-JRC-Ispira), presenting projections of concentrations of PM and ozone

 ***The health impacts of air pollution***

Speaker: Joseph Spadaro (SERC), presenting the most important health impacts of air pollution, with a focus on the Global Burden of Disease

 ***The costs of outdoor air pollution***

Speaker: Elisa Lanzi (OECD), presenting the main results from the CIRCLE report on air pollution

12:30 *Lunch break*

13:45 Session 2: (Co-)benefits of integrated climate and air pollution policies

Chair: Jean Chateau (OECD)

This session aims to provide detailed discussions of the interactions between climate change and air pollution, and the potential co-benefits from integrated policies.

Interactions between climate change and air pollution

Speaker: Rob Dellink (OECD), presenting an overview of some major links between these two environmental issues

Modelling the costs of air pollution control

Speaker: Corjan Brink (PBL), discussing how to represent the costs of emission reductions induced by regulatory and market-based policies in a dynamic CGE modelling framework

Benefits of energy policies for air pollution

Speaker: Olivier Durand-Lasserve (OECD-IEA), presenting preliminary insights from the WEO special report that the IEA will publish in June

15:30 Coffee break

16:00 Session 3: The costs and benefits of air pollution policies

Chair: Måns Nilsson (SEI)

This final session deals with the question of how to implement air pollution policies.

Benefits of air pollution policies in Europe

Speaker: Bert Saveyn (EC-JRC-IPTS), presenting the insights from their recent report

Benefits of integrated air pollution policies at the national level

Speakers: Selected country representatives will be asked to briefly discuss how assessments on the costs and benefits of air pollution policies can help in their national policy context.

17:30 Wrap-up

Speaker: Shardul Agrawala (OECD) to summarise the conclusions from the meeting and identify next steps

18:00 Reception (joint with the Nordic conference of 25 May)
