

# Capacity-building activities on online tools to access legislation

## Agenda

### The project

In coordination with the PMO and its counterparts, the OECD is implementing the EU-funded project “Support the Palestinian Authority to enhance Governance and the Rule of Law” (2020-2024). The overall objective of the project is to support the Palestinian Authority and contribute to achieving a more effective, transparent and participatory policy- and law-making process set in a clear normative framework, and thus enhance citizens and businesses trust in their government’s action. More specifically, the project will aim at enhancing the capacity of law and policy-makers to:

- Produce clear, effective and transparent primary and secondary legislation,
- Use efficient public consultation mechanisms as part of the policy development process, and
- Develop (and improve) online tools providing access to adopted and draft legislation.

### The activities

In this framework a training will be organized on 13, 14 and 15 July 2021 in order to enhance and strengthen the content of the Diwan’s online platform on adopted legislation by introducing best technical practices for better communication and social media use and enhance access to new innovative online platforms.

The activities will be delivered by two local experts (on-site). OECD peers will intervene remotely to share best practices from OECD countries in terms of innovative online platforms and tools.

Funded by  
the European Union

### Training with the Diwan, the General Secretariat, line ministries and PA institutions

Content Day 1	Time
Pre-training evaluation	09:00 – 09:15
