

Monica Brezzi is Head of the Regional Analysis and Statistics Unit in the OECD Directorate for Public Governance and Territorial Development. Her current activities focus on the analysis of regional comparative advantages and the assessment of policies to reduce inequalities in the access to key services for citizens. She has recently contributed to design a web mapping tool to help decision makers and citizens develop a better knowledge of their society using statistical information. Before joining OECD, she worked for the Ministry of Economic Development in Italy where she contributed to design and launch a performance-based policy to measure the efficiency of local public services.

Mario Piacentini is a Young Professional in the OECD Directorate for Public Governance and Territorial Policies. His work at the OECD focuses on the analysis of patterns of internal and international migration and their effects on regional development. He also works on rural-urban linkages and urban policies for green growth. Before joining the OECD, he dedicated extensive research to the links between secondary schooling and internal migration, and to the impacts of student migration on scientific productivity in source and host countries. He has consultancy experience at the World Bank, the Swiss Development Cooperation, UNCTAD, and the African Economic Research Consortium.
