

Appendix D: Reading Components Scoring Thresholds

The Reading Components module provides scores in three skill areas:

1. Vocabulary
2. Sentence Comprehension
3. Passage Comprehension

For each of these skill areas, test takers are given a score of high, medium, or low for their rate (how fast they answer questions) and accuracy (the percentage of questions they answer correctly).

- Test takers that receive a score of “low” have a rate or accuracy that is below the 25th percentile for test takers with similar literacy scores.
- Test takers that receive a score of “medium” have a rate or accuracy that is between the 25th percentile and 75th percentile for test takers with similar literacy scores.
- Test takers that receive a score of “high” have a rate or accuracy that is above the 75th percentile for test takers with similar literacy scores.

The following charts show the 25th and 75th percentile cut off points for rate and accuracy in each of the skill levels for each language version. The percentiles are based on the Programme for the International Assessment of Adult Competencies (PIAAC) 2012 administration of Reading Components.

Test takers who fail the core and are routed directly to Reading Components, receive a literacy score of N/A. Those test takers’ rate and accuracy are compared to test takers from PIAAC with a literacy score of 120 to determine their rate and accuracy levels in Education & Skills Online.
