

DG EAC Webinar

Tuesday, 27 September 2022

13:30 - 14:30

Brussels/Paris time

Do children have what it takes to promote the green transition today and in the future?

Are young people equipped with the adequate knowledge, skills, attitudes and values to become the future drivers of the green transition?

Are there significant gender and socio-economic disparities in young people's environmental sustainability competence?

How does young people's environmental sustainability competence relate to other key skills for the green and digital transition, such as collaborative problem-solving, financial and digital literacy?

Answering these questions is crucial to enable policymakers to design and monitor policy actions in the area of education for environmental sustainability.

This webinar – hosted by the European Commission's Directorate-General for Education, Youth and Culture (EAC) – will present two recent studies by the OECD Centre for Skills in collaboration with the European Commission's Joint Research Centre, which analyse data from various editions of PISA to map young people's environmental sustainability competence in EU and OECD countries:

- [Young people's environmental sustainability competence: Emotional, cognitive, behavioural, and attitudinal dimensions in EU and OECD countries](#)
- [The environmental sustainability competence toolbox: From leaving a better planet for our children to leaving better children for our planet](#)

Join us to listen to the authors present their work and discuss their findings with them.

WHEN

Tuesday, 27 September 2022

13:30 -14:30 Brussels/Paris time

LANGUAGE

English

HOW TO PARTICIPATE

The webinar will take place via Webex.

To register and receive the link, please **send an email before 23 September** to EAC UNITE A4: eac-unite-a4@ec.europa.eu
