

20%

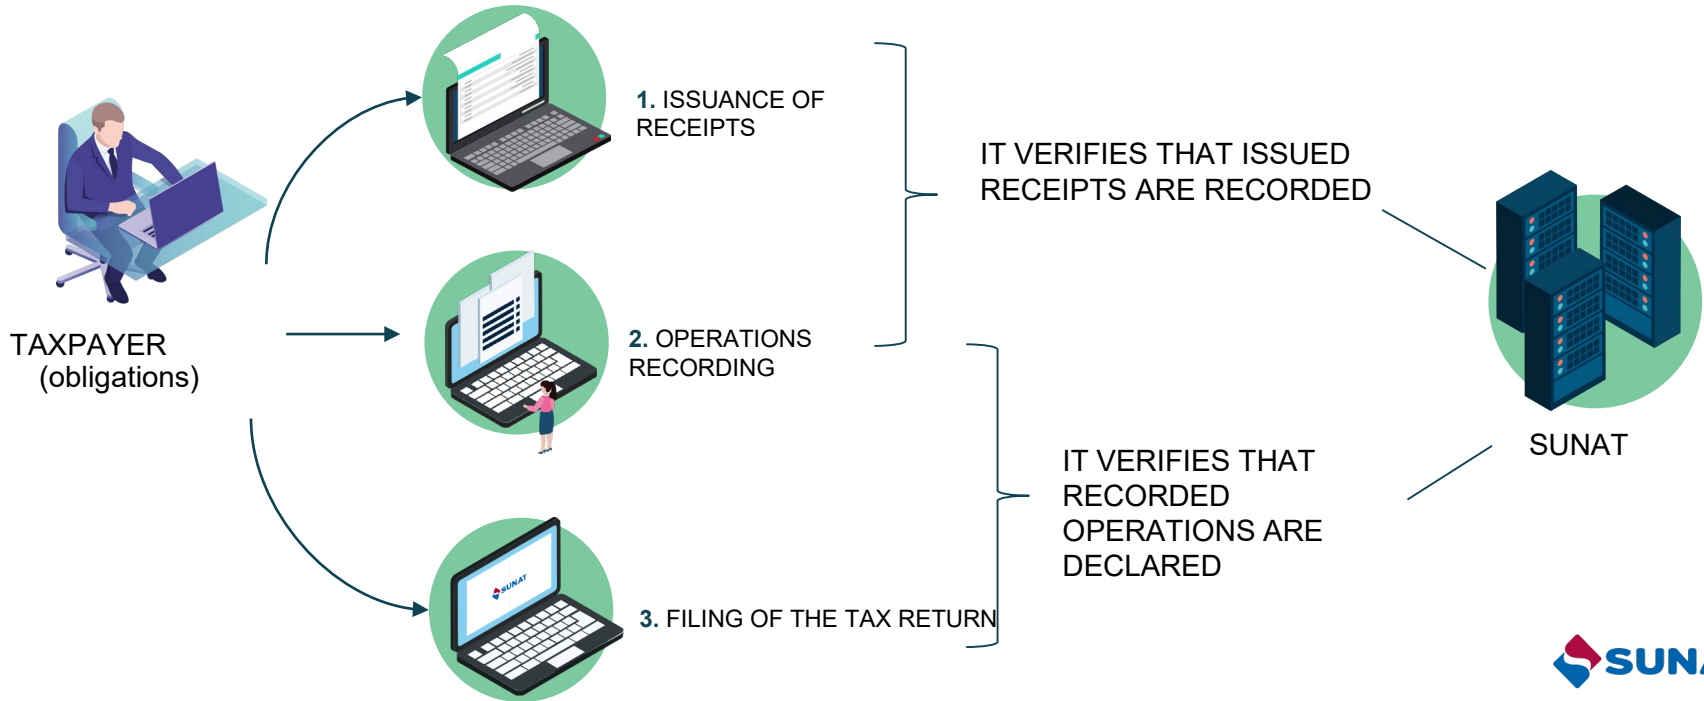

Proposal on value -added tax return

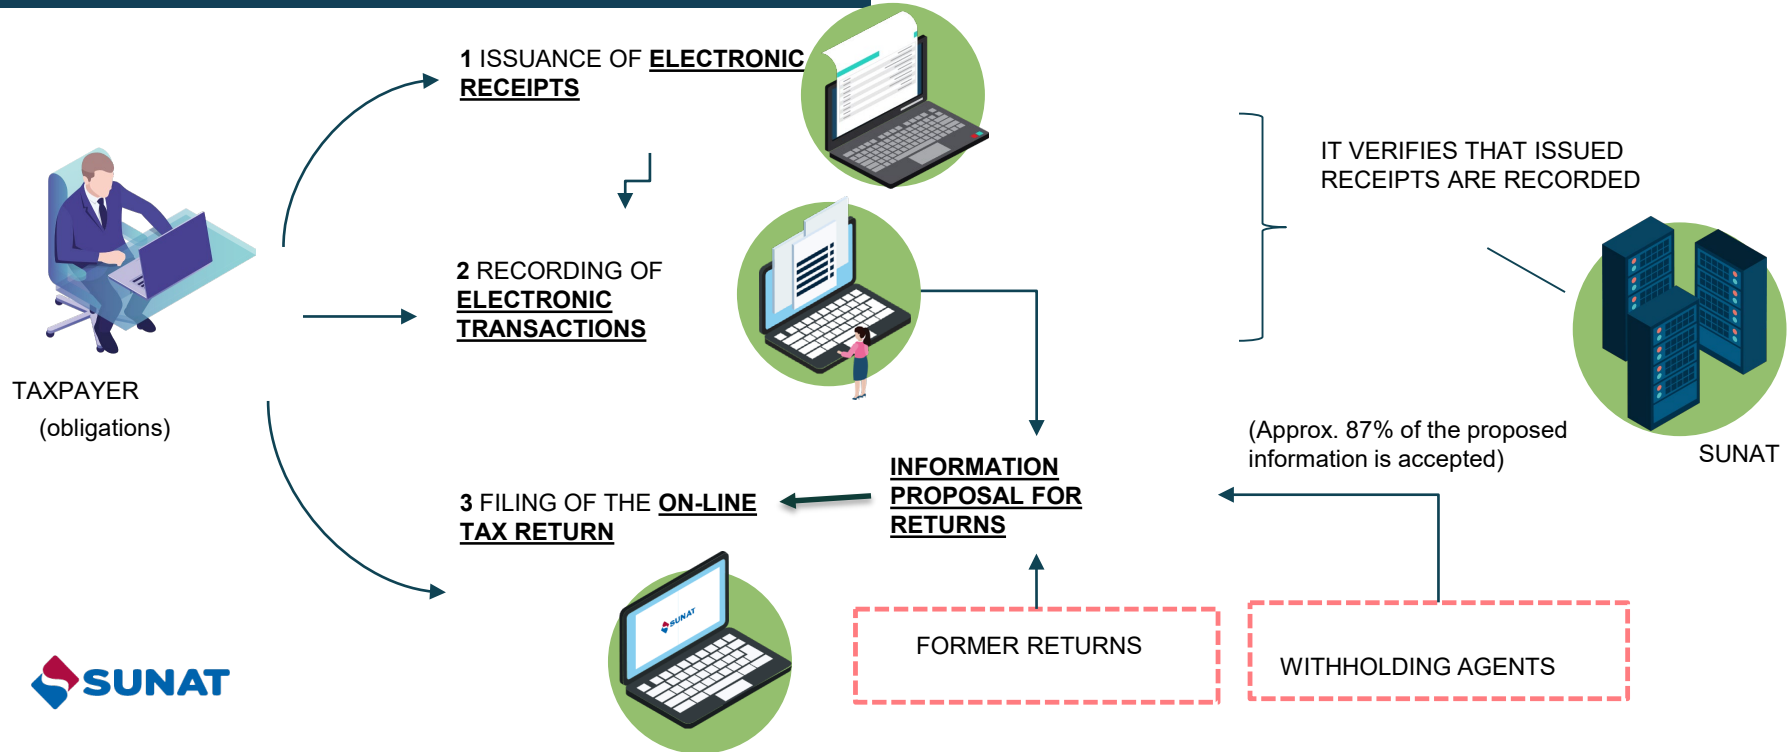

Initial

Business transactions subject to value added tax experience three processes that have been virtualized to improve the quality of information declared by the client.

Current

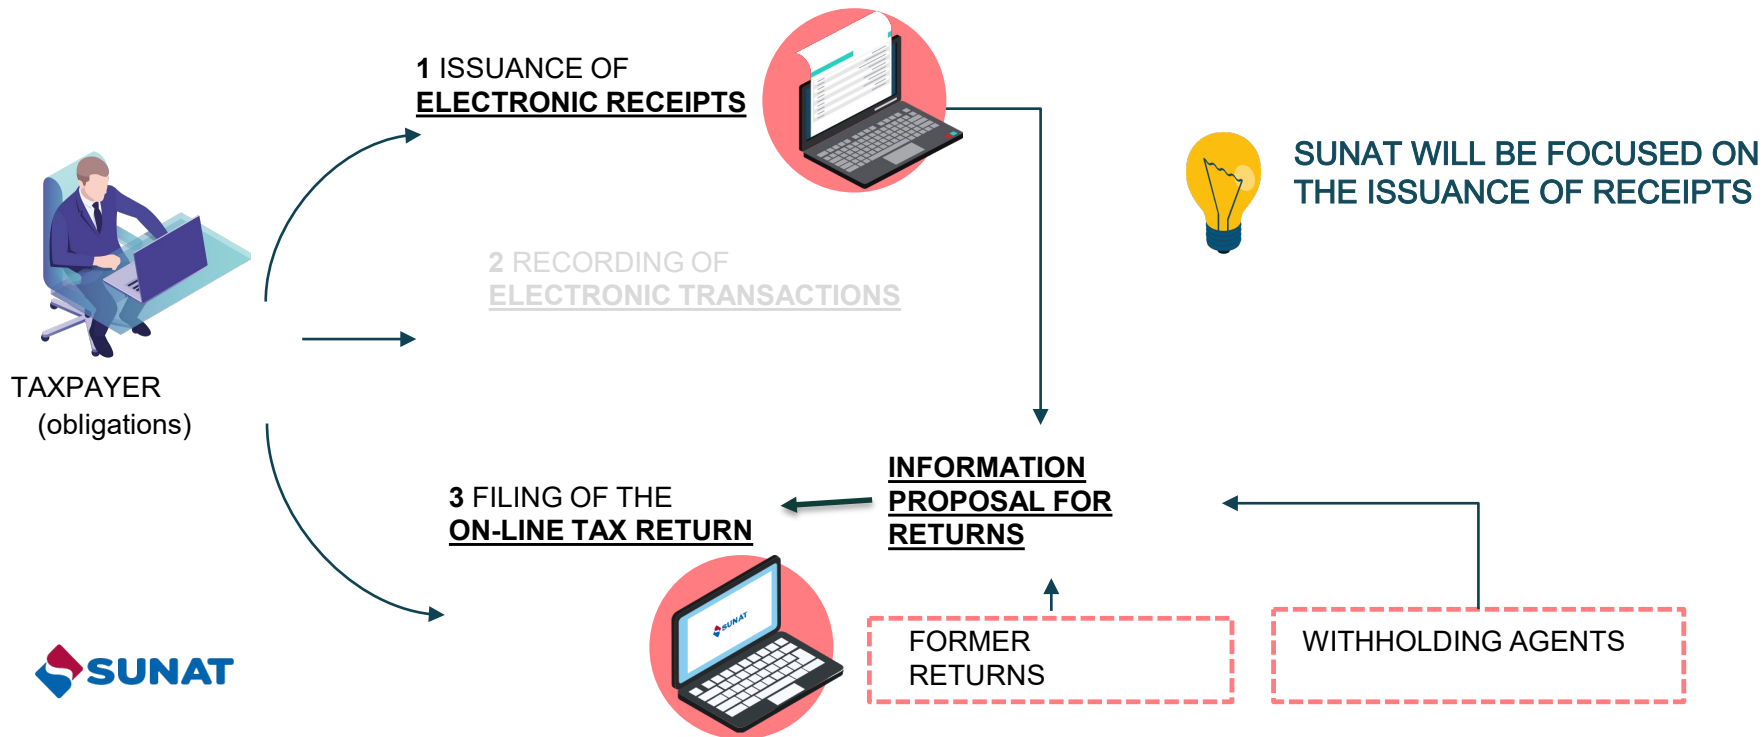

Currently, with the use of technologies, taxpayers issue electronic receipts and prepare records of electronic operations ; and the Tax Administration was able to simplify tax returns by developing virtual forms that show the proposed information .

NEXT IMPROVEMENT

Improvements to the process will allow that information proposed for the virtual tax return arises from electronic receipts. As a result, taxpayers will be exempted from the recording of further electronic transactions

Thank you
