

Revenue Statistics in Asian and Pacific Economies 2020 – China

Tax-to-GDP ratio

Tax-to-GDP ratio compared to other Asian and Pacific economies and regional averages, 2018

China's tax-to-GDP ratio was 17.0% in 2018, below the OECD average (34.3%) by 17.2 percentage points, and also below the LAC and Africa (26)* averages (23.1% and 17.2%, respectively).

* Data for 2017 are used for the Africa (26) average, Australia and Japan as the 2018 data are not available. The tax-to-GDP ratio for China does not include revenue from social security contributions (SSCs) as detailed data were not available.

Tax-to-GDP ratio over time

The tax-to-GDP ratio in China decreased by 0.4 percentage points from 17.4% in 2017 to 17% in 2018. From 2007 to 2018, the tax-to-GDP ratio in China increased by 0.1 percentage points from 16.9% to 17.0%. The highest tax-to-GDP ratio in this period was 18.7% in 2012, and the lowest 16.9% in 2007.

* The tax-to-GDP ratio for China does not include revenue from social security contributions (SSCs) as detailed data were not available.

In the OECD classification the term “taxes” is confined to compulsory unrequited payments to general government. Taxes are unrequited in the sense that benefits provided by government to taxpayers are not normally in proportion to their payments.

Tax structures

Tax structure compared to the regional averages

Tax structure refers to the breakdown of total taxes by tax type. The highest share of tax revenues in China¹ in 2018 was derived from value added taxes (7.1% of GDP). The second highest share of tax revenues in 2018 was derived from corporate income tax (4.5% of GDP).

* Data for 2017 are used for the Africa (26) average as the 2018 data are not available. All figures within the chart are rounded.

¹ The tax-to-GDP ratio for China does not include revenue from social security contributions (SSCs) as detailed data were not available. The OECD Secretariat estimates SSCs to be approximately 4.0% of GDP in 2018 based on publicly available data from China's Ministry of Human Resources and Social Security.

Summary of the tax structure in China¹

	Tax Revenues in national currency			Tax structure in China		
	Yuan, Billions			% in GDP		
	2018	2017	Δ	2018	2017	Δ
Taxes on income, profits and capital gains	5 484	4 899	+ 584	6.0	5.9	+ 0.1
<i>of which</i>	-	-	-	-	-	-
Personal income, profits and gains	1 387	1 197	+ 191	1.5	1.4	+ 0.1
Corporate income and gains	4 097	3 703	+ 394	4.5	4.5	+ 0.0
Social security contributions	-	-	-	-	-	-
Taxes on goods and services	8 836	8 329	+ 507	9.6	10.0	- 0.4
<i>of which</i>	-	-	-	-	-	-
Value added taxes / Goods and services tax	6 734	6 284	+ 450	7.3	7.6	- 0.2
Taxes on specific goods and services	1 867	1 797	+ 70	2.0	2.2	- 0.1
<i>of which</i>	-	-	-	-	-	-
Excises	1 420	1 362	+ 57	1.5	1.6	- 0.1
Customs and import duties	285	300	- 15	0.3	0.4	- 0.1
Other taxes	1 321	1 208	+ 112	1.4	1.5	- 0.0
TOTAL	15 640	14 437	+ 1 204	17.0	17.4	- 0.3

¹ The tax-to-GDP ratio for China does not include revenue from social security contributions (SSCs) as detailed data were not available. The OECD Secretariat estimates SSCs to be approximately 4.0% of GDP in 2018 based on publicly available data from China's Ministry of Human Resources and Social Security.

Tax revenue includes net receipts for all levels of government; figures in the table may not sum to the total indicated due to rounding.

In this country note, "other taxes" is calculated as total tax minus taxes on income, profits and capital gains, social security contributions and taxes on goods and services. It includes taxes on payroll and workforce, taxes on property and other taxes (as defined in the OECD Interpretative Guide).
