1. The revenue from taxes on income, profits and gains may not add up to the sum of revenue from personal income tax and corporate income tax due to revenue that could not be allocated to these categories.

2. In this country note, "other taxes" is calculated as total tax minus taxes on income, profits and capital gains, social security contributions, taxes on property and taxes on goods and services. It includes taxes on payroll and workforce, and other taxes (as defined in the OECD Interpretative Guide).

Tax revenue includes net receipts for all levels of government; figures in the table may not sum to the total indicated due to rounding.
