Material well-being

**Household disposable income per capita, index (2007=100)**

Note: Between Q4 2019 and Q4 2020, household disposable income per capita decreased cumulatively by 2% in Italy, and increased 2% for the OECD on average.

**Labour underutilisation rate**

Note: The labour underutilisation rate includes the unemployed, marginally attached workers and the underemployed, expressed as a share of the total labour force. Between Q4 2019 and Q4 2020, the labour underutilisation rate increased from 25% to 30% in Italy, and from 12% to 18% for the OECD on average.

Quality of life

**Excess mortality**

Note: Excess mortality is expressed as the percentage change in the total number of deaths from week 11 2020 to week 19 2021, compared to the 2015-2019 average. Between March 2020 and May 2021, excess mortality averaged 17% in Italy, and 16% for the OECD 33.

**Share of people at risk of depression**

Note: Risk of depression is measured using the PHQ-4 instrument. In 2020 and 2021, the share of people at risk of depression in Italy was 38% and 40% respectively, and 27% for both years for the OECD 15 on average. In 2014, it was 6% in Italy, but this value is not strictly comparable with later years, as it stems from a different source.
Note: Risk of anxiety is measured using the PHQ-4 instrument. In 2020 and 2021, the share of people at risk of anxiety in Italy was 28% and 30% respectively, and 25% and 26% for the OECD 15 on average.

Note: Very low life satisfaction is defined as answering 4 or less on the 0 to 10 Cantril ladder scale. Between 2019 and 2020, the share of people reporting low life satisfaction decreased from 13% to 9% in Italy, and increased from 11% to 12% for the OECD 35 on average.

Community relations

Note: Data refer to people reporting feeling lonely “most” or “all of the time” in the past two weeks. In April-June 2020 and February-March 2021, it was 17% and 20% respectively in Italy, and 14% and 19% for the OECD 22 on average. In 2016, the share of people feeling lonely was 7% in Italy and 8% for the OECD 22 on average, but this value is not strictly comparable with later years, as it stems from a different source.

Sustainability

Note: Between Q4 2019 and Q4 2020, household debt increased from 81% to 84% of gross household disposable income in Italy, and decreased from 119% to 118% for the OECD 20 on average.

Note: Between Q4 2019 and Q4 2020, government gross debt increased from 135% to 156% of GDP in Italy, and from 81% to 96% of GDP for the OECD 27 on average.
**Share of people who reported changes in health behaviour**

- **Lost weight**
  - Italy: -16%
  - OECD 19: -16%
- **Gained weight**
  - Italy: 31%
  - OECD 19: 31%
- **Exercised less**
  - Italy: -33%
  - OECD 19: -26%
- **Exercised more**
  - Italy: 17%
  - OECD 19: 17%
- **Consumed less alcohol**
  - Italy: -4%
  - OECD 19: -7%
- **Consumed more alcohol**
  - Italy: 9%
  - OECD 19: 12%
- **Stopped smoking**
  - Italy: -3%
  - OECD 19: -3%
- **Started smoking**
  - Italy: 2%
  - OECD 19: 2%

**Share of people with trust in the government**

Note: Between 2019 and 2020, the share of people answering "yes" to a question about whether they have confidence in the national government increased from 22% to 37% in Italy, and from 45% to 49% for the OECD 35 on average.

**Red List Index of threatened species**

Note: A Red List Index value of 0 refers to all species having gone extinct, and a value of 1.0 refers to all species qualifying as "Least Concern". Between 2019 and 2021, the Red List Index of threatened species decreased from 0.90 to 0.89 in Italy, and from 0.89 to 0.88 for the OECD on average.

**For more information**

Whenever data are available for fewer than all 38 OECD countries, the number of countries included in the calculation of the OECD average is specified in the figure and note (e.g. OECD 33).

Whenever data for the country of this note are not available, only the OECD average is shown.
