COVID-19 and Well-being: Life in the Pandemic

THE SLOVAK REPUBLIC

**Material well-being**

Household disposable income per capita, index (2007=100)

![Chart](chart1.png)

Note: Between Q4 2019 and Q4 2020, household disposable income per capita increased cumulatively by 2% for the OECD on average.

Labour underutilisation rate

![Chart](chart2.png)

Note: The labour underutilisation rate includes the unemployed, marginally attached workers and the underemployed, expressed as a share of the total labour force. Between Q4 2019 and Q4 2020, the labour underutilisation rate increased from 8% to 12% in the Slovak Republic, and from 12% to 18% for the OECD on average.

**Quality of life**

Excess mortality

![Chart](chart3.png)

Note: Excess mortality is expressed as the percentage change in the total number of deaths from week 11 2020 to week 19 2021, compared to the 2015-2019 average. Between March 2020 and May 2021, excess mortality averaged 28% in the Slovak Republic, and 16% for the OECD 33.

Share of people at risk of depression

![Chart](chart4.png)

Note: Risk of depression is measured using the PHQ-4 instrument. In 2020 and 2021, the share of people at risk of depression was 27% for both years for the OECD 15 on average. Data for 2014 are not strictly comparable with later years, as they come from a different source.
Note: Risk of anxiety is measured using the PHQ-4 instrument. In 2020 and 2021, the share of people at risk of anxiety was 25% and 26% respectively for the OECD 15 on average.

Note: Very low life satisfaction is defined as answering 4 or less on the 0-10 Cantril ladder scale. Between 2019 and 2020, the share of people reporting low life satisfaction decreased from 17% to 14% in the Slovak Republic, and increased from 11% to 12% for the OECD 35 on average.

Community relations

Note: Data refer to people reporting feeling lonely “most” or “all of the time” in the past two weeks. In April-June 2020 and February-March 2021, it was 14% and 20% respectively in the Slovak Republic, and 14% and 19% for the OECD 22 on average. In 2016, the share of people feeling lonely was 4% in the Slovak Republic and 6% for the OECD 22 on average, but this value is not strictly comparable with later years, as it stems from a different source.

Sustainability

Note: Between Q4 2019 and Q4 2020, household debt decreased from 119% to 118% of gross household disposable income for the OECD 20 on average.

Note: Between Q4 2019 and Q4 2020, government gross debt increased from 54% to 67% of GDP in the Slovak Republic, and from 81% to 95% of GDP for the OECD 27 on average.
Note: Data refer to the share of people reporting changes in health behaviour since the start of the pandemic until October-November 2020.

Note: Between 2019 and 2020, the share of young people aged 15-29 not in employment, education or training increased from 13% to 14% both in the Slovak Republic and for the OECD on average.

Note: A Red List Index value of 0 refers to all species having gone extinct, and a value of 1.0 refers to all species qualifying as "Least Concern". Between 2019 and 2021, the Red List Index of threatened species remained stable at 0.95 in the Slovak Republic, and decreased from 0.89 to 0.88 for the OECD on average.

For more information

Find the data used in this country profile, and more information about indicator definitions, sources and methodology at: www.oecd.org/wise/COVID-19-well-being-country-notes-data.xlsx.

Whenever data are available for fewer than all 38 OECD countries, the number of countries included in the calculation of the OECD average is specified in the figure and note (e.g. OECD 33).

Whenever data for the country of this note are not available, only the OECD average is shown.
